

The Canyon News

VOLUME NUMBER XXXIII.

CANYON, TEXAS, THURSDAY, AUGUST 8, 1929.

NUMBER 20

Home Stuff

or otherwise

In fitting a pair of shoes, Lige Frieze asked the pertinent question why get 'em so tight when there is plenty of room on the outside. Buyers of fall goods off to market plenty of new things in Canyon soon. G. G. Foster chasing church finances let George do it, say the Methodist. Wonder when it's going to rain you, me, and all the rest of us. Rev. W. H. Bessire says that Canyon is a fine town and the Canyon News is one of the best country newspapers he has ever seen. Vacation time is hard on the ones who don't go two away from the News this week, and lo, the poor devils at home. H. Prichard, telephone man building one of the best homes in Canyon, and a beauty. Yes, we stayed out in the hot sun waiting for Col. Goebel never again. Canyon folks driving away out in the country to get to try out the new pavement and all are highly pleased. Am- arillo with the Junior College and don't know what to do next. Old cow hands will ride to the T-Ancor reunion in cars. no longer the hurricane deck.

W. A. Paul makes a good suggestion. If every farmer in Randall county would spend a few hundred dollars in painting up and repairing around their homes the looks of the country would improve a hundred per cent, and farm values would increase correspondingly. Nothing adds to the value of a place like paint. Incidentally, the same applies to town property.

C. C. Stewart says that his 600 acres of wheat made 30 bushels to the acre. His row crop looks good, but he would like to see some rain.

Mayor R. A. Bellah says that every business man should take a vacation, and sets the example by taking one himself. Nothing like getting away, forgetting your troubles, and brushing the cobwebs out of the brain. Wouldn't be surprised to see the Mayor issue a proclamation requiring everyone in Canyon to take a vacation.

The Santa Fe and Denver are still fighting over the Panhandle territory. Wonder how those birds in East Texas feel, who think this a wide and barren country, dedicated to the hoot owls and prairie dogs, when they see two great railroads fighting for control? We wonder.

H. W. Crain says this is the driest summer he has ever seen on the Plains. There has been practically no rain since the middle of May. Yet row crops look very good.

Drier around Claude than it is here, says Barney Conner. Cattle are doing fine, but calves do not seem to be in such good shape.

Jeff Wallace is mighty well pleased at the new law exempting farm fuel from the four cent tax. He believes that all farmers will go to the trouble to collect this tax, as it will amount to considerable in the course of a year.

The campaigners are busy in the News' \$2,000 circulation drive. Some one is going to be happy with the new Chevrolet coach on Sept. 14. Other valuable prizes are given. Read the announcement this week, and then get busy.

Trades Day in Canyon August 26th. Don't forget the date.

John L. McCarty of the Dalhart Texan says that all columns are bunk—with which we agree. But the readers of the News can stand a lot of punishment, and John thinks the Texan readers can stand it, for he has started his column.

H. S. finds that it takes a lot of time to fill up a column, more so than writing news stuff, but the customers must be served, and every newspaper must have its column, so we all suffer together.

PENN-SMITH WEDDING

William A. Penn and Miss Alice Smith of Happy were married Saturday night at the home of Rev. J. H. Braswell. They were accompanied here by a few friends from Happy.

L. T. Davault was in Amarillo yesterday on business.

NEW ENGLISH FACULTY HEAD IS APPOINTED

DR. GRANT MCCOLLEY IS TO SUCCEED L. A. OSGOOD.

He is Now With Arkansas Polytechnic—Took Ph. D. From Northwestern University.

That Dr. Grant McColley, present head of the English department at Arkansas Polytechnic Institute, at Russellville, Arkansas, will become head of the department of English in W. T. S. T. C. at the opening of the fall term was announced Saturday by President J. A. Hill.

Dr. McColley did his graduate study at Northwestern University, Evanston, Illinois, receiving the M. A. and Ph. D. degrees there. He has taught three years as instructor in English at the University of Arkansas, and is now teaching in the summer school there.

President Hill states that the University of Arkansas recommended Dr. McColley most highly as an instructor, and that Northwestern University rates him A-1 as a scholar. Dr. McColley is 35 years of age, a member of the Christian Church, married, and has two children. His wife is the daughter of a professor at the University of Arkansas.

L. A. Osgood, who has served for some time as acting head of the department of English, will continue in the department, assuming the work he had before accepting the temporary place as acting head. President Hill stated, President Hill expressed himself as being much pleased that Mr. Osgood is to remain here, and said that he considers him a very valuable man in many ways.

It was announced also that Miss Wiley will return here this fall. She has been working toward the doctor's degree in the University of Chicago.

Another change in the personnel of the English department will be made when Dr. George Mullins leaves to assume his duties in the position he accepted recently in Central State Teachers College, at Edmond, Oklahoma. He is to be head of the department of chemistry there.

Nine Months Term for All Schools of County is the Goal

School officials present Saturday at the conference held by Judge B. F. Fronbarger approved the plan to hold a nine months term in every school district in the county for the coming year. Representatives were present from nearly every district in the county, and all were enthusiastic over the outlook for the coming school year.

Members of the county school board were present and assisted the local trustees in mapping out the work for the coming school year.

Jesse James of Pleasant Hill, Missouri, was painfully injured early Thursday morning when the car in which he, his brother, William, and a friend, Robert Patterson, were riding overturned on the highway about one mile and a half west of here.

The boys were returning from a trip to California, and were on their way to their home in Missouri when the accident occurred. It was caused when William, who was driving the car went to sleep at the wheel. The injured boy was brought to Dr. C. E. Donnell for treatment, and he remained there until Sunday morning when he was taken home on the train by Robert Patterson. His brother drove the car through leaving Saturday. Neither of the other boys was injured.

DISTRICT GOVERNOR OF ROTARY HERE ON TUESDAY

Bernard Bryant, district governor of the 41st district of Rotary, will visit Canyon next Tuesday and address the members of the Canyon Rotary Club at the regular luncheon time.

This will be the first visit of a district governor to the Canyon Rotary Club since its organization last fall, and the members are looking forward with a great deal of pleasure to the meeting.

PHYSICIAN OPENS OFFICE

Dr. M. L. Sadoris, formerly of Decatur, Ill., opened offices over the First State Bank here this week for general practice in medicine and surgery.

Dr. Sadoris and his family moved here last week.

May Ride New Paved Highway to Amarillo Three Weeks From This Morning—1450 Feet Not Paved

Three weeks from this morning you may crank up the old buss and ride on the new paved highway all the way from Canyon to Amarillo. That is, you may ride all the distance on the new highway, and all but 1450 feet will be paved and opened for traffic. Two small stretches will be missing from the paving, and these will not be completed until the first of October.

Pouring of concrete was completed yesterday on all of the highway which may be finished at this time, and Ben Flynn will move his outfit to Groom where he has a ten mile contract for the Carson county highway.

According to Engineer A. E. Dyatt, there will be a gap of 150 feet at the underpass on the railroad. It was impossible to pave this owing to the fact that all of the construction work has not been completed by the Santa Fe. There will be another gap of 1300 feet on the new fill north of the underpass. It was hoped last week that this fill would be sufficiently settled so as to allow the paving of this section at the present time, but after careful tests the engineers decided that the dirt dump had not yet sufficiently settled for the paving.

Mr. Flynn is to return here about the first of October and complete these short gaps. Mr. Dyatt states that two courses are open in paving these gaps; first, to use quick setting cement, which will allow traffic 24 hours after the concrete is poured; second, to pave one-half of the highway at a time so as not to block traffic. The cost of the quick setting cement is very high, and this plan may be abandoned.

The highway from Hollywood to Amarillo will be opened this week. All of the paving from Hollywood south to the hill is now opened, excepting 2,000 feet, and this will be opened by the end of next week. It will be necessary for the concrete from the big hill south to Fourth Avenue to stand until three weeks from yesterday before being opened to traffic.

Guard fences will be constructed on both sides of the pavement along the entire fill north of town, owing to the high grade. This work, together with the curb and gutter, and the cleaning up will keep a force of men busy on the highway until about the first of September.

The plans on the highway south are still in Austin, being held up by the difficulty of the right-of-way.

No word has been received as to the route to be selected west from Canyon, but a route check is expected to be made by the federal and state engineers within the next two weeks, and the routing definitely announced. It is a well known fact that state engineers favored the highway to run north of Canyon, and connect with the pavement north of the underpass. Maps have been made showing this route, running all of the way to the New Mexico line, and a route is also shown to come through Canyon and go on the south side of the Santa Fe all of this distance. The final settlement rests with the federal engineers. An inspection of all routes is expected to be made before the final selection is made. The commissioners court and business interests of Canyon have taken a definite stand for the highway to come through Canyon, but it has been pointed out that the crossing on the Sweetwater branch of the Santa Fe is the main obstacle for the plan, and may cause the engineers to demand the original route north of the city.

HAROLD SHANKLIN MANAGES CANYON DAIRY BUSINESS

Harold Shanklin became manager of the Canyon Dairy on August first. The business is owned by his father, J. W. Shanklin. Otto Oleson, who has been manager for the past several months, has started a new dairy.

Harold Shanklin has had considerable dairy experience, and has decided to make this his life's work rather than return to the university to continue electrical engineering.

TARWATER HERE MONDAY

Hon. A. B. Tarwater of Plainview was here Monday with his daughter, Miss Ruth, a student in the College. Mr. Tarwater was author of the tax refund on gasoline used in farm tractors. He states that farmers generally are highly pleased on account of this refund. He urges that all take advantage of the refund, as it will not be so complicated to procure as many have gained an idea that it would be.

Ford Plane to be Brought Here by Miller-Lybrand Co.

In order to off-set the great disappointment of last Friday when Arthur Goebel failed to come to Canyon, J. M. Lybrand, Jr., manager of the Miller-Lybrand Company, Inc., Ford dealers, will bring a giant 14-passenger Trimotor Ford Monoplane here Saturday, which will remain during the entire day. Trips will be made at regular intervals during the day, and free rides will be offered to those who buy used or new Ford automobiles during the day.

The giant plane will be in Clayton, N. M., Friday. Mr. Lybrand, Clyde W. Warwick and Walter S. Black will meet the plane in Clayton and make the trip by air here Saturday morning.

Charles W. Hardin, pilot of the plane, was here Tuesday making arrangements for the day here Saturday. He was associated with Lindberg in the early days of Lindberg's rise to fame, and is mentioned in the book "We."

The giant plane will land east of the city at 9:30 and will be there all day Saturday. It is expected that a large number of Canyon people will avail themselves of the opportunity of riding in this plane, which is the largest ever to land in Canyon, and is the very latest type plane being produced by the Ford Motor Company.

Announcement of the coming of the plane will be found in this issue of the News.

Boy Scouts Mean Much to Development of Towns

Ross Rogers of Amarillo spoke Tuesday before the Canyon Rotary Club on the Boy Scout movement. To take care of the boys means that the girl problem is at a minimum in any community, thus solving two problems at one time, is the belief of Mr. Rogers after several years study and leadership in the Scout movement.

The speaker traced the twenty-one years of the history of the Scout movement. There have been fourteen million Scouts during this time, very few of whom have ever broken a law of their country. There are now 600,000 active Scouts. The movement works with the home, school and church. There are 20,000 Scout masters in this country.

The movement requires more of leadership and time than it does of money. Ninety percent of the boys of any town wish to be Scouts, and tie themselves to the leaders in real friendship. Men who give their time to the Scout work get as much out of it as do the boys.

Immediate results are seen in every town where the work is put on, according to Mr. Rogers, in the lessening of crime among the boys. It is the best paying investment that any community may make.

Short talks were made by Will C. Winch, Norris Ewing, and Col. C. T. Herring. Visiting Rotarians were George T. Maggard, Arch Hunsley, Ross Rogers, Col. C. T. Herring, C. Don Hughes, Will C. Winch, Norris Ewing, and Harrison W. Wood of Amarillo. Guests were Edw. Thomerson of Amarillo, Dr. M. L. Sadoris and W. J. Wooten of Canyon.

C. R. E. Weaver of Silverton visited with Sam Bond Sunday.

ONE FEATHER NOT ENOUGH

Remember the old story of the Indian who heard about feather beds and thought he would try one? He took one feather, laid it on a plank and slept on it all night. In the morning he woke up with a crick in his back and growled: "White man say feather bed heap soft. White man big fool."

Some retail merchants try advertising like that. They run an advertisement once or twice and because they do not note a big increase in business say that advertising is not good for them.

One feather is all right, but it takes more than one to make a feather bed.

The same principle applies to advertising. If intelligently planned and used, satisfaction and profitable returns are certain.

LIGHT WORK IN PROSPECT FOR SUMMER COURT

STALLWORTH CASE COMES UP NEXT MONDAY.

Two Divorces Granted This Week—Woman Attorney to Appear Here First Time.

District court opened here Monday with prospects for light criminal and civil dockets during the term. A grand jury was empaneled Monday by Judge Henry S. Bishop but no indictments had been filed with the district clerk early yesterday.

Mrs. Levi P. Stallworth will face trial a second time on charges of murder, in connection with the shooting of Mrs. Grace Morrison, here next Monday. Mrs. Morrison was killed May 13 in Amarillo. Stallworth attorneys, through Robert O'Keefe, indicated to the court when the case was set for trial that they would ask for a continuance because of the absence of material witnesses, according to officers. The Amarillo office of the legal firm subsequently denied plans for seeking continuance and announced that Mrs. Stallworth was ready for trial.

The case was transferred here from Potter County, after a jury had failed to agree, because Judge Bishop believed it impossible to get another jury. Publicity given the case in Amarillo was believed responsible for the change to Randall County. Attorneys agreed last Monday to get a jury for the case from panels for the first and second week, if possible, and to summon a special venire only in case it is found impossible to secure a panel from these groups.

Two divorces were granted by Judge Bishop, and several other divorce cases were set for hearing. Mrs. Nora Jones Cook was granted a divorce from O. W. H. Cook, Monday, and Mrs. Louella Gregory was granted a divorce from W. C. Gregory Tuesday.

Another case against O. J. Podzemny of Umlinger, charging sale of intoxicating liquor, was dismissed. Mr. Podzemny was acquitted during the last term of court on a similar charge. Two trials were necessary because the first jury failed to agree. The case dismissed this week was continued to this term of court, it was understood, because of the absence of C. V. Duncan, described as a party to the alleged sale by the indictment.

A suit filed by Paul L. Logue against the Patterson Drilling Company for wages was dismissed. Mr. Logue sought a laborer's lien against drilling equipment used on the Patterson No. 1 well near here.

The first woman attorney to appear in district court here, Mrs. Hattie Harper of Amarillo, will represent Myrtle M. Russell in a suit for divorce against Walter S. Russell. This case probably will be heard next week.

The members of the grand jury are: E. E. Adams, E. G. Bryan, J. B. Gamble, M. C. Sanders, J. B. Fox, Albert Byars, H. R. Riggs, Dick Allison, John Batenhorst, Jr., J. T. Coffey, W. C. Kunze, J. C. Dowd.

Members of the first week's petit jury panel are: A. B. Holt, Ed Reynolds, Ed Gidden, E. H. Porter, J. W. Haggan, R. E. Ball, A. A. Clark, W. H. Bilyeu, Frank Gruner, T. G. Lair, W. S. Cobb, Antone Beckman, C. S. Collins, D. S. Hill, L. A. Donnell, J. M. King, C. S. Dison, Earl Stewart, B. F. Machen, J. I. Ballengee, C. W. Campbell, John Haynes, G. C. Holland.

CAR DAMAGED BY FIRE

Damage amounting to about thirty dollars was caused when the upholstery of the car belonging to Golden Green caught fire Monday afternoon while it was parked near the M System. The cause of the fire could not be determined, but it is believed that a cigaret was accidentally flipped into the car causing the fire. The car was insured.

SPEAKS AT KINGSVILLE

President J. A. Hill will deliver the commencement address at the Teachers College at Kingsville next Tuesday. He will attend a meeting of the teachers college presidents at Alpine Saturday and a meeting of the board of regents at the same place on Monday.

LIGHT RAIN SATURDAY

A light rain of 32 of an inch fell Saturday afternoon in Canyon. The rainfall north was heavier, and there was a good rain near Happy.

Rev. Stuckey of Amarillo preached Sunday morning at the Methodist church in the absence of Rev. Jameson.

OPPORTUNITY CLUB MAKES A TREMENDOUS HIT; NOW IS THE TIME TO GO IN AND WIN PRIZE

Everybody Wins Feature Is Best Part of Live Wire Club Just Now Starting on Short, Snappy, Five Weeks Race For Rich Awards Offered by News. Plenty of Room at Top For Go Getters. First List of Entries Next Week.

The talk of the town! The hit of the town! What?

Why, The News' Opportunity Club, of course. On the streets, in the stores, in the homes, in fact every place where people congregate, the big list of awards, the liberal and fair plan; headed by a wonderful Chevrolet Coach, completely equipped and several other costly awards; and the shortness of the campaign are the main subjects of conversation in Canyon today.

The Opportunity Club just now getting started is a new departure from the old time "contest" of yesteryear, in fact it is an entirely new plan, embracing new features that are attractive to say the least. In fact the Opportunity Club is not a "contest" at all.

Plan New It is a thoroughly tested scientific plan to increase the quality circulation of the Canyon News, building a bigger and better paper, a bigger and better business mart for the merchants and business men of this trade territory, with an opportunity for the home folks to help build this newspaper and at the same time make themselves more money in the next few weeks, than the average person makes in the course of a year.

Awards That brand new, shiny, Chevrolet Coach is worth \$735.00 and was purchased right here in Canyon from The Imperial Chevrolet Company, Chevrolet dealer, and is on display at their show room. The Chevrolet Coach is the Grand Capital Award and will go to the Opportunity Club member, making the very best record of credits on subscription sales, on September 14th. The Second Grand Award, the Majestic Radio, console type, number 91, worth \$159.00, complete in every respect, including tubes, dynamic speaker, beautiful cabinet purchased from Burroughs' Jewelry in Canyon, will go to the Opportunity Club member making the next highest record of credits from subscription sales.

Then the wonderful diamond ring, worth \$75.00, purchased from Browning Jewelry of Canyon will be awarded the Opportunity Club member making the third highest record of credits on subscription sales. The fourth Grand Capital Award is the exquisite Gruen wrist watch worth \$45.00, and of course a white gold case and fifteen jewel movement, purchased from Browning Jewelry at Canyon, Texas, and to be awarded to the Opportunity Club member making the fourth highest record of credits from subscription sales.

And last but not least, the special fund that has been set aside for the payment of cash commission checks, on the basis of 20 per cent of all new subscription sales to be paid to all ACTIVE club members who do NOT win one of the Grand Capital Awards. Everybody wins, and there will be no losers, as all who participate will receive either an automobile, one of the valuable awards, or a handsome sum in cash.

This means that you should enter the Opportunity Club and for some reason or other, only secure a few subscriptions and not win one of the big awards, you will be paid \$1 out of every \$5 in NEW subscriptions that you collect. This 20 per cent goes back into your own pocket; a real commission that in itself is well worth working for.

Could there be a plan more fair? Extra Gold Prize Then there is the extra added award of \$25 in gold, an added special award to go to the club member, who turns in the greatest number of NEW subscription sales up to and including Saturday, August 31st. So a club member can win a car and \$25 in gold, or any other Grand Capital Award and \$25 in gold.

Closing Date The brand new, shiny, Chevrolet Coach and all the other costly awards, together with the 20 per cent commission checks will be awarded, in just five more short weeks, on September 14th, and you owe it to yourself to make the very utmost of your opportunity and get in on the ground floor while subscriptions are easy to get and count the most, for as the campaign progresses, the power of subscriptions decrease and

they become harder and harder to corral. In justice to yourself, you can not afford to stay out of a proposition that will swell the size of your pocketbook. Do you realize that the Opportunity Club was created especially for you and for your town? Do you realize that the winner of that marvelous Chevrolet Coach worth \$735.00 will be making about \$150.00 per week for the next five weeks. For You, Your Town It is only when everybody gets into the game and PLUGS that Canyon will realize its ambition. A bigger and better business mart and a bigger and better town. And the Opportunity Club is one of the big factors that will help to bring this about, making Canyon a better place to live and make a living in than most any other town you know of. Now if Canyon is good enough to live in and make a living in, it is certainly worth your while to get in the game and help, if you yourself can not take an active part in the Opportunity Club for some reason or other, get in behind your neighbor who is in the club and help.

Now is the Time to Enter The very best time to enter is NOW. As early work counts, though it is not when you start in this campaign that counts most, it's WHAT YOU DO, that counts most. While there have been a large number of nominations to date, so far there have been only a few who have made an active start, and today, one week since the announcement of the club there are more awards to be given away than there are real ACTIVE club members, and there is plenty of room at the top of the prize list for a few more real live, wide-awake folks to jump in the race and now win the award of their heart's desire in the big list. Especially those kind who can forego their afternoon nap and are willing to turn their spare time for the next few weeks into a brand new car or one of those other valuable awards or a handsome sum in cash. As one young married lady said when she came into the office, "I am not letting any grass grow under my feet, some of my friends have nominated me, and that Chevrolet Coach looks mighty good to me and I am out to do nothing else but WIN it."

Do It Now Remember, this is NOT a "popularity contest" nor a "beauty contest," nor a raffle, nor an auction, and the car or any of the other awards cannot be bought. There is no one in Canyon or for that matter, in the whole of Randall county or any of the surrounding counties who has enough money to buy any of the awards that are listed from a cash commission up to the top prize, the Chevrolet Coach; folks there just isn't that much money 'cause they are not for sale. They are to be awarded to the Opportunity Club members free of all cost in return for the work and efforts in boosting and building circulation of the quality newspaper of this section, the Canyon News. All You Need Everybody can't qualify for membership in the Opportunity Club, it takes tact, self-confidence and a willingness to work, coupled with a determination to do the very best you can, to win in this club. You don't need any salesmanship ability at all. You have those qualities mentioned above—haven't you? Then get the only other thing you need—a subscription receipt book of Opportunity Club headquarters at the News office. Now—Today, clip out those two coupons that you will find in (Continued on page five)

Neither of the other boys was injured.

DISTRICT GOVERNOR OF ROTARY HERE ON TUESDAY

Bernard Bryant, district governor of the 41st district of Rotary, will visit Canyon next Tuesday and address the members of the Canyon Rotary Club at the regular luncheon time.

This will be the first visit of a district governor to the Canyon Rotary Club since its organization last fall, and the members are looking forward with a great deal of pleasure to the meeting.

PHYSICIAN OPENS OFFICE

Dr. M. L. Saddoris, formerly of Decatur, Ill., opened offices over the First State Bank here this week for general practice in medicine and surgery.

Dr. Saddoris and his family moved here last week.

May Ride New Paved Highway to Amarillo Three Weeks From This Morning—1450 Feet Not Paved

Three weeks from this morning you may crank up the old buss and ride on the new paved highway all the way from Canyon to Amarillo. That is, you may ride all the distance on the new highway, and all but 1450 feet will be paved and opened for traffic. Two small stretches will be missing from the paving, and these will not be completed until the first of October.

Pouring of concrete was completed yesterday on all of the highway which may be finished at this time, and Ben Flynn will move his outfit to Groom where he has a ten mile contract for the Carson county highway.

According to Engineer A. E. Dyatt, there will be a gap of 150 feet at the underpass on the railroad. It was impossible to pave this owing to the fact that all of the construction work has not been completed by the Santa Fe. There will be another gap of 1300 feet on the new fill north of the underpass. It was hoped last week that this fill would be sufficiently settled so as to allow the paving of this section at the present time, but after careful tests the engineers decided that the dirt dump had not yet sufficiently settled for the paving.

Mr. Flynn is to return here about the first of October and complete these short gaps. Mr. Dyatt states that two courses are open in paving these gaps; first, to use quick setting cement, which will allow traffic 24 hours after the concrete is poured; second, to pave one-half of the highway at a time so as not to block traffic.

The cost of the quick setting cement is very high, and this plan may be abandoned.

The highway from Hollywood to Amarillo will be opened this week. All of the paving from Hollywood south to the hill is now opened, excepting 2,000 feet, and this will be opened by the end of next week. It will be necessary for the concrete from the big hill south to Fourth Avenue to stand until three weeks from yesterday before being opened to traffic.

Guard fences will be constructed on both sides of the pavement along the entire fill north of town, owing to the high grade. This work, together with the curb and gutter, and the cleaning up will keep a force of men busy on the highway until about the first of September.

The plans on the highway south are still in Austin, being held up by the difficulty of the right-of-way.

No word has been received as to the route to be selected west from Canyon, but a route check is expected to be made by the federal and state engineers within the next two weeks, and the routing definitely announced. It is a well known fact that state engineers favored the highway to run north of Canyon, and connect with the pavement north of the underpass. Maps have been made showing this route, running all of the way to the New Mexico line, and a route is also shown to come through Canyon and go on the south side of the Santa Fe all of this distance. The final settlement rests with the federal engineers. An inspection of all routes is expected to be made before the final selection is made. The commissioners court and business interests of Canyon have taken a definite stand for the highway to come through Canyon, but it has been pointed out that the crossing on the Sweetwater branch of the Santa Fe is the main obstacle for the plan, and may cause the engineers to demand the original route north of the city.

HAROLD SHANKLIN MANAGES CANYON DAIRY BUSINESS

Harold Shanklin became manager of the Canyon Dairy on August first. The business is owned by his father, J. W. Shanklin. Otto Oleson, who has been manager for the past several months, has started a new dairy.

Harold Shanklin has had considerable dairy experience, and has decided to make this his life's work rather than return to the university to continue electrical engineering.

TARWATER HERE MONDAY

Hon. A. B. Tarwater of Plainview was here Monday with his daughter, Miss Ruth, a student in the College. Mr. Tarwater was author of the tax refund on gasoline used in farm tractors. He states that farmers generally are highly pleased on account of this refund. He urges that all take advantage of the refund, as it will not be so complicated to procure as many have gained an idea that it would be.

Ford Plane to be Brought Here by Miller-Lybrand Co.

In order to off-set the great disappointment of last Friday when Arthur Goebel failed to come to Canyon, J. M. Lybrand, Jr., manager of the Miller-Lybrand Company, Inc., Ford dealers, will bring a giant 14-passenger Trimotor Ford Monoplane here Saturday, which will remain during the entire day. Trips will be made at regular intervals during the day, and free rides will be offered to those who buy used or new Ford automobiles during the day.

The giant plane will be in Clayton, N. M., Friday. Mr. Lybrand, Clyde W. Warwick and Walter S. Black will meet the plane in Clayton and make the trip by air here Saturday morning.

Charles W. Hardin, pilot of the plane, was here Tuesday making arrangements for the day here Saturday. He was associated with Lindberg in the early days of Lindberg's rise to fame, and is mentioned in the book "We."

The giant plane will land east of the city at 9:30 and will be there all day Saturday. It is expected that a large number of Canyon people will avail themselves of the opportunity of riding in this plane, which is the largest ever to land in Canyon, and is the very latest type plane being produced by the Ford Motor Company.

Announcement of the coming of the plane will be found in this issue of the News.

Boy Scouts Mean Much to Development of Towns

Ross Rogers of Amarillo spoke Tuesday before the Canyon Rotary Club on the Boy Scout movement. To take care of the boys means that the girl problem is at a minimum in any community, thus solving two problems at one time, is the belief of Mr. Rogers after several years study and leadership in the Scout movement.

The speaker traced the twenty-one years of the history of the Scout movement. There have been fourteen million Scouts during this time, very few of whom have ever broken a law of their country. There are now 600,000 active Scouts. The movement works with the home, school and church. There are 20,000 Scout masters in this country.

The movement requires more of leadership and time than it does of money. Ninety percent of the boys of any town wish to be Scouts, and tie themselves to the leaders in real friendship. Men who give their time to the Scout work get as much out of it as do the boys.

Immediate results are seen in every town where the work is put on, according to Mr. Rogers, in the lessening of crime among the boys. It is the best paying investment that any community may make.

Short talks were made by Will C. Winch, Norris Ewing, and Col. C. T. Herring. Visiting Rotarians were George T. Maggard, Arch Hunsley, Ross Rogers, Col. C. T. Herring, C. Don Hughes, Will C. Winch, Norris Ewing, and Harrison W. Wood of Amarillo. Guests were Edw. Thomason of Amarillo, Dr. M. L. Saddoris and W. J. Wooten of Canyon.

C. R. E. Weaver of Silverton visited with Sam Bond Sunday.

ONE FEATHER NOT ENOUGH

Remember the old story of the Indian who heard about feather beds and thought he would try one? He took one feather, laid it on a plank and slept on it all night. In the morning he woke up with a crick in his back and growled: "White man say feather bed heap soft. White man big fool."

Some retail merchants try advertising like that. They run an advertisement once or twice and because they do not note a big increase in business say that advertising is not good for them.

One feather is all right but it takes more than one to make a feather bed.

The same principle applies to advertising. If intelligently planned and used, satisfaction and profitable returns are certain.

LIGHT WORK IN PROSPECT FOR SUMMER COURT

STALLWORTH CASE COMES UP NEXT MONDAY.

Two Divorces Granted This Week—Woman Attorney to Appear Here First Time.

District court opened here Monday with prospects for light criminal and civil dockets during the term. A grand jury was empaneled Monday by Judge Henry S. Bishop but no indictments had been filed with the district clerk early yesterday.

Mrs. Levi P. Stallworth will face trial a second time on charges of murder, in connection with the shooting of Mrs. Grace Morrison, here next Monday. Mrs. Morrison was killed May 13 in Amarillo. Stallworth attorneys, through Robert O'Keefe, indicated to the court when the case was set for trial that they would ask for a continuance because of the absence of material witnesses, according to officers. The Amarillo office of the legal firm subsequently denied plans for seeking continuance and announced that Mrs. Stallworth was ready for trial.

The case was transferred here from Potter County, after a jury had failed to agree, because Judge Bishop believed it impossible to get another jury. Publicity given the case in Amarillo was believed responsible for the change to Randall County. Attorneys agreed last Monday to get a jury for the case from panels for the first and second week, if possible, and to summon a special venire only in case it is found impossible to secure a panel from these groups.

Two divorces were granted by Judge Bishop, and several other divorce cases were set for hearing. Mrs. Nora Jones Cook was granted a divorce from O. W. H. Cook, Monday, and Mrs. Louella Gregory was granted a divorce from W. C. Gregory Tuesday.

Another case against O. J. Podzemny of Umbarger, charging sale of intoxicating liquor, was dismissed. Mr. Podzemny was acquitted during the last term of court on a similar charge. Two trials were necessary because the first jury failed to agree. The case dismissed this week was continued to this term of court, it was understood, because of the absence of C. V. Duncan, described as a party to the alleged sale by the indictment.

A suit filed by Paul L. Logue against the Patterson Drilling Company for wages was dismissed. Mr. Logue sought a laborer's lien against drilling equipment used on the Patterson No. 1 well near here.

The first woman attorney to appear in district court here, Mrs. Hattie Harper of Amarillo, will represent Myrtle M. Russell in a suit for divorce against Walter S. Russell. This case probably will be heard next week.

The members of the grand jury are: E. E. Adams, E. G. Bryan, J. B. Gamble, M. C. Sanders, J. B. Fox, Albert Byars, H. R. Riggs, Dick Allison, John Batenhorst, Jr., J. T. Coffee, W. C. Kunze, J. C. Dowd.

Members of the first week's petit jury panel are: A. B. Holt, Ed Reynolds, Ed Gidden, E. H. Porter, J. W. Haggan, R. E. Ball, A. A. Clark, W. H. Bilyeu, Frank Gruner, T. G. Lair, W. S. Cobb, Antone Beckman, C. S. Collins, D. S. Hill, L. A. Donnell, J. M. King, C. S. Dison, Earl Stewart, B. F. Machen, J. I. Ballengee, C. W. Campbell, John Haynes, G. C. Holland.

CAR DAMAGED BY FIRE

Damage amounting to about thirty dollars was caused when the upholstery of the car belonging to Golden Green caught fire Monday afternoon while it was parked near the M System. The cause of the fire could not be determined, but it is believed that a cigarette was accidentally flipped into the car causing the fire. The car was insured.

SPEAKS AT KINGSVILLE

President J. A. Hill will deliver the commencement address at the Teachers College at Kingsville next Tuesday. He will attend a meeting of the teachers college presidents at Alpine Saturday and a meeting of the board of regents at the same place on Monday.

LIGHT RAIN SATURDAY

A light rain of 32 of an inch fell Saturday afternoon in Canyon. The rainfall north was heavier, and there was a good rain near Happy.

Rev. Stuckey of Amarillo preached Sunday morning at the Methodist church in the absence of Rev. Jameson.

OPPORTUNITY CLUB MAKES A TREMENDOUS HIT; NOW IS THE TIME TO GO IN AND WIN PRIZE

Everybody Wins Feature Is Best Part of Live Wire Club Just Now Starting on Short, Snappy, Five Weeks Race For Rich Awards Offered by News. Plenty of Room at Top For Go Getters. First List of Entries Next Week.

The talk of the town! The hit of the town! What? Why, The News' Opportunity Club, of course. On the streets, in the homes, in fact every place where people congregate, the big list of awards, the liberal and fair plan; headed by a wonderful Chevrolet Coach, completely equipped and several other costly awards; and the shortness of the campaign are the main subjects of conversation in Canyon today.

The Opportunity Club just now getting started is a new departure from the old time "contest" of yesteryear, in fact it is an entirely new plan, embracing new features that are attractive to say the least. In fact the Opportunity Club is not a "contest" at all.

Plan New
It is a thoroughly tested scientific plan to increase the quality circulation of the Canyon News, building a bigger and better paper, a bigger and better business mart for the merchants and business men of this trade territory, with an opportunity for the home folks to help build this newspaper and at the same time make themselves more money in the next few weeks, than the average person makes in the course of a year.

Awards
That brand new, shiny, Chevrolet Coach is worth \$735.00 and was purchased right here in Canyon from The Imperial Chevrolet Company, Chevrolet dealer, and is on display at their show room. The Chevrolet Coach is the Grand Capital Award and will go to the Opportunity Club member making the very best record of credits on subscription sales, on September 14th. The Second Grand Award, the Majestic Radio, console type, number 91, worth \$159.00, complete in every respect, including tubes, dynamic speaker, beautiful cabinet purchased from Burroughs' Jewelry in Canyon, will go to the Opportunity Club member making the next highest record of credits from subscription sales.

Then the wonderful diamond ring, worth \$75.00, purchased from Browning Jewelry of Canyon will be awarded the Opportunity Club member making the third highest record of credits on subscription sales. The fourth Grand Capital Award is the exquisite Gruen wrist watch worth \$45.00 and of course a white gold case and fifteen jewel movement, purchased from Browning Jewelry at Canyon, Texas, and to be awarded to the Opportunity Club member making the fourth highest record of credits from subscription sales.

And last but not least, the special fund that has been set aside for the payment of cash commission checks, on the basis of 20 per cent of all new subscription sales to be paid to all ACTIVE club members who do NOT win one of the Grand Capital Awards. Everybody wins, and there will be no losers, as all who participate will receive either an automobile, one of the valuable awards, or a handsome sum in cash.

This means that you should enter the Opportunity Club and for some reason or other, only secure a few subscriptions and not win one of the big awards, you will be paid \$1 out of every \$5 in NEW subscriptions that you collect. This 20 per cent goes back into your own pocket; a real commission that in itself is well worth working for.

Could there be a plan more fair? **Extra Gold Prize**
Then there is the extra added award of \$25 in gold, an added special award to go to the club member, who turns in the greatest number of NEW subscription sales up to and including Saturday, August 31st. So a club member can win a car and \$25 in gold, or any other Grand Capital Award and \$25 in gold.

Closing Date
The brand new, shiny, Chevrolet Coach and all the other costly awards, together with the 20 per cent commission checks will be awarded, in just five more short weeks, on September 14th, and you owe it to yourself to make the very utmost of your opportunity and get in on the ground floor while subscriptions are easy to get and count the most, for as the campaign progresses, the power of subscriptions decrease and

they become harder and harder to corral. In justice to yourself, you can not afford to stay out of a proposition that will swell the size of your pocketbook. Do you realize that the Opportunity Club was created especially for you and for your town? Do you realize that the winner of that marvelous Chevrolet Coach worth \$735.00 will be making about \$150.00 per week for the next five weeks.

For You, Your Town
It is only when everybody gets into the game and PLUGS that Canyon will realize its ambition. A bigger and better business mart and a bigger and better town. And the Opportunity Club is one of the big factors that will help to bring this about, making Canyon a better place to live and make a living in than most any other town you know of.

Now if Canyon is good enough to live in and make a living in, it is certainly worth your while to get in the game and help, if you yourself can not take an active part in the Opportunity Club for some reason or other, get in behind your neighbor who is in the club and help.

Now is the Time to Enter
The very best time to enter is NOW. As early work counts, though it is not when you start in this campaign that counts most, it's WHAT YOU DO, that counts most.

While there have been a large number of nominations to date, so far there have been only a few who have made an active start, and today, one week since the announcement of the club there are more awards to be given away than there are real ACTIVE club members, and there is plenty of room at the top of the prize list for a few more real live, wide-awake folks to jump in the race and now win the award of their heart's desire in the big list. Especially those kind who can forego their afternoon nap and are willing to turn their spare time for the next few weeks into a brand new car or one of those other valuable awards or a handsome sum in cash.

As one young married lady said when she came into the office, "I am not letting any grass grow under my feet, some of my friends have nominated me, and that Chevrolet Coach looks mighty good to me and I am out to do nothing else but WIN it."

Do It Now
Remember, this is NOT a "popularity contest" nor a "beauty contest," nor a raffle, nor an auction, and the car or any of the other awards cannot be bought. There is no one in Canyon or for that matter, in the whole of Randall or any of the surrounding counties who has enough money to buy any of the awards that are listed from a cash commission up to the top prize, the Chevrolet Coach; folks there just isn't that much money 'cause they are not for sale.

They are to be awarded to the Opportunity Club members free of all cost in return for the work and efforts in boosting and building circulation of the quality newspaper of this section, the Canyon News.

All You Need
Everybody can't qualify for membership in the Opportunity Club, it takes tact, self-confidence and a willingness to work, coupled with a determination to do the very best you can, to win in this club. You don't need any salesmanship ability at all. You have those qualities mentioned above—haven't you? Then get the only other thing you need—a subscription receipt book of Opportunity Club headquarters at the News office.

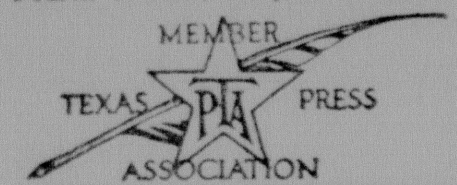

Now—Today, clip out those two coupons that you will find in (Continued on page five)

The Canyon News

SUBSCRIPTION \$1.50 PER YEAR

Entered at the postoffice at Canyon, Texas, as second class matter. Published weekly at office, 1513 Fourth Avenue, Canyon, Texas.

AMENDMENTS FAIL

Final returns on the two constitutional amendments voted upon in Texas July 16th shows that both were defeated by the voters. Several attempts have been made to increase the salary of the governor, and all have failed. It costs the state and the counties something like \$250,000 to hold a special election, therefore every time the voters turn down the amendment to increase the governor's salary, enough is wasted to pay the additional salary over a period of about 40 years. However, the voter does not take this into consideration.

So long as a dozen or more candidates are anxiously waiting to be sufficiently urged to get into the race, the voters will not be very anxious to increase the salaries. No one even guessed that the increased salary would bring out a better quality of men for the office. Texas is such a large state, it costs so much to make a statewide campaign, and the physical and mental strain is so great in making such a campaign, that it is doubtful if any different class of men could be induced to make the race.

After all, being governor is more or less a political job, and it takes a politician to really hold down the office. The people cry out for more business men to fill public office, and yet invariably the business man runs last in any political campaign. The people are a little afraid of a successful business man in public position, and it is a certainty that no politician wants to turn the affairs of the government to any business minded man. He knows that it is a political position, and wants it kept in that circle, even though his crowd may not be in favor. He knows that sooner or later, his bunch will be in control, and his willing to gamble his chances with the politician, rather than trust to a new man who may be a business man, and not think in the political way.

As for the defeat of the court amendment, this came natural. The layman does not understand the workings of the law, and is therefore suspicious of it. He sees the lawyers wrangle, and delay in court proceedings, and wonders what it is all about. He sees a simple statement of law twisted forty ways and interpreted to meet the exigencies of the occasion and thinks less of the laws of his country because it is possible to make such liberal interpretations. He knows that the lawyers very largely write the laws of the land, and that they are far from agreeing upon the proper court reform measures. He is afraid that if the present laws are changed that he will meet a greater tangle than he is experiencing under existing conditions. Therefore he votes against court reform, and no one can really blame him.

The Southwest Plainsman takes a fall out of the legislature over the refund features of the gasoline tax, and charges that the law makers have set up machinery which will make it impossible for the farmers to collect his refund; make it easier for other classes; and has set up more jobs in Austin; that much of the refund money will "stick" to fingers along the way, which should go into the pockets of the farmers. The blanket indictment is far from the truth, and shows the average misconception of the layman as to how the laws are made. If everyone were honest, there would be no need for law. Unfortunately everyone is not honest, and the maze of laws which are on the statute books is largely the result of an attempt to keep the crooked man straight. The farmer as a class is honest; he is entitled to the refund on his gasoline tax, but those acquainted with the facts

know that it was no easy matter in the first place to get him any kind of a refund; and in the second place it was necessary to add some other classes to the refund in order to procure it at all for the farmers. The law is not ideal, no one claims it is; but certainly it is an improvement in the right direction, and will mean thousands of dollars saved for the farmers of the Plains.

People of Canyon were amazed last week at the number of new automobiles which had been delivered during the past week, as shown by the published list in the News. It would seem that the automobile dealers were among the first to realize on the splendid wheat crop. That the Panhandle has a live bunch of automobile dealers is first seen from this published report, and in the second place, it shows that prosperity has hit all parts of the county, and that a large percent of the farmers realized a direct benefit from the large wheat yield, although the price at which they sold the major part of the crop was far below the price of the present time. All in all, Randall county is in a very fine condition.

Col. W. E. Easterwood Jr. of Dallas is the latest entry into the Governor's race for next year, and gives Dallas four candidates for governor at the present time. Easterwood is a flying colonel, and promises to visit every town in Texas during the campaign. He posted \$25,000 as an award in the Dallas to Rome flight. Less taxes, and fewer laws will be his campaign slogan. Col. Bill Easterwood knows how to get publicity. In fact, he has kept his name on the front page of Texas daily newspapers more than most any man in private life. He knows his stuff in the publicity line, and does not fail to strut it. Therefore, no one should be surprised to see a big vote piled up for him next July, if he takes his campaign seriously. The more the merrier in this governor's race.

"It is a revelation," stated Edward Gerald, Jr., yesterday, in discussing his past week's visit to the farms and ranches of Randall county in preparing articles for an edition to the News which will be published during the coming few weeks. Randall county has as good a class of farmers as will be found in any country on the Plains. They are well pleased with the county, and confident in the future of the county. The edition will likely be printed in September, or as soon as all information may be compiled.

The Opportunity Club of the Canyon News is attracting much attention among the men and women of this county. The campaign for a bigger subscription list is being conducted along the same high plane that has been the policy of this publication during the

19 years of the present management. We trust that by the time the campaign is over there will not be a single home in this great trades territory which is not on the subscription list of the News.

Professional beggars are flocking into Canyon, and other towns of the Plains. Along with them are all kinds of grafters. A woman last week collected \$59 in one day for a so-called church directory. It cost her \$12, making a net gain of \$47 for one day's work—which is pretty good wages for one with a sick tongue. Pass up the beggars and grafters.

The big ocean is getting smaller and smaller all the while, as men learn how to increase speed. Columbus would be quite surprised to know the time it now takes the Bremen, or the big Zeppelin, or Lindbergh to cross the ocean, in comparison to the speed he made in 1492.

Was Compelled To Stay Home Months

"Stomach trouble and indigestion had me in a terribly nervous, run-down condition. I was so weak and worn out I would have to stay in the house for months at a time. Constipation was helping to make my life miserable and there were times when I didn't care whether I lived or died. A good friend of mine told me about Sargon and how much it helped her so I decided to try it.

"What a blessed relief it is to be free of the troubles that worried me for 12 long years. The Sargon treatment has literally made me feel like a new woman. My stomach is now in perfect condition; my appetite is fine and I eat just anything I want, without any ill effects. My nerves are back to normal and I sleep sound and get up feeling just fine. Sargon Soft Mass Pills ended my constipation without ever griping or nauseating me.

"I'm so happy over regaining my health that I'll be glad to tell anyone what Sargon has meant to me. Just have them phone 2--7783 if they want to know what I think of this wonderful treatment."—Mrs. W. H. Higgins, 507 W. First St., Fort Worth.

Sargon represents the dawn of a new era in the field of modern medicine. It is turning old-fashioned moss-grown health theories upside down and is restoring countless thousands by methods undreamed of a few years ago.

Announcing Two New Models of the CHEVROLET SIX

Broadening the appeal of a line of cars which has already won over 950,000 buyers since January 1st, Chevrolet presents two distinguished new enclosed models of the Chevrolet Six—the Imperial Sedan and the Sport Coupe. With beautiful new Bodies by Fisher available in a variety of striking color combinations and with numerous advanced convenience features—these new models provide, in abundant measure, those elements of distinction ordinarily associated with more expensive automobiles.

When you examine the new Imperial Sedan and Sport Coupe,

you will be impressed by their individuality and completeness. But you cannot fully realize what an achievement they represent until you get behind the wheel and drive! For here are all the qualities of six-cylinder smoothness, power and acceleration which Chevrolet alone provides in the price range of the four—combined with economy of better than twenty miles to the gallon of gasoline!

Come in today. Learn for yourself the new standards of quality and luxury that Chevrolet has made available in six-cylinder cars—at prices within the reach of all!

The Roadster, \$525; The Phaeton, \$525; The Coupe, \$595; The Coach, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695; The Sedan Delivery, \$595; The Light Delivery Chassis, \$400; The 1½ Ton Chassis, \$545; The 1½ Ton Chassis with Cab, \$650. All prices f.o.b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

know that it was no easy matter in the first place to get him any kind of a refund; and in the second place it was necessary to add some other classes to the refund in order to procure it at all for the farmers. The law is not ideal, no one claims it is; but certainly it is an improvement in the right direction, and will mean thousands of dollars saved for the farmers of the Plains.

People of Canyon were amazed last week at the number of new automobiles which had been delivered during the past week, as shown by the published list in the News. It would seem that the automobile dealers were among the first to realize on the splendid wheat crop. That the Panhandle has a live bunch of automobile dealers is first seen from this published report, and in the second place, it shows that prosperity has hit all parts of the county, and that a large percent of the farmers realized a direct benefit from the large wheat yield, although the price at which they sold the major part of the crop was far below the price of the present time. All in all, Randall county is in a very fine condition.

Col. W. E. Easterwood Jr. of Dallas is the latest entry into the Governor's race for next year, and gives Dallas four candidates for governor at the present time. Easterwood is a flying colonel, and promises to visit every town in Texas during the campaign. He posted \$25,000 as an award in the Dallas to Rome flight. Less taxes, and fewer laws will be his campaign slogan. Col. Bill Easterwood knows how to get publicity. In fact, he has kept his name on the front page of Texas daily newspapers more than most any man in private life. He knows his stuff in the publicity line, and does not fail to strut it. Therefore, no one should be surprised to see a big vote piled up for him next July, if he takes his campaign seriously. The more the merrier in this governor's race.

"It is a revelation," stated Edward Gerald, Jr., yesterday, in discussing his past week's visit to the farms and ranches of Randall county in preparing articles for an edition to the News which will be published during the coming few weeks. Randall county has as good a class of farmers as will be found in any country on the Plains. They are well pleased with the county, and confident in the future of the county. The edition will likely be printed in September, or as soon as all information may be compiled.

The Opportunity Club of the Canyon News is attracting much attention among the men and women of this county. The campaign for a bigger subscription list is being conducted along the same high plane that has been the policy of this publication during the

19 years of the present management. We trust that by the time the campaign is over there will not be a single home in this great trades territory which is not on the subscription list of the News.

Professional beggars are flocking into Canyon, and other towns of the Plains. Along with them are all kinds of grafters. A woman last week collected \$59 in one day for a so-called church directory. It cost her \$12, making a net gain of \$47 for one day's work—which is pretty good wages for one with a slick tongue. Pass up the beggars and grafters.

The big ocean is getting smaller and smaller all the while, as men learn how to increase speed. Columbus would be quite surprised to know the time it now takes the Bremen, or the big Zeppelin, or Lindbergh to cross the ocean, in comparison to the speed he made in 1492.

Was Compelled To
Stay Home Months

her so I decided to try it.

"What a blessed relief it is to be free of the troubles that worried me for 12 long years. The Sargon treatment has literally made me feel like a new woman. My stomach is now in perfect condition; my appetite is fine and I eat just anything I want, without any ill effects. My nerves are back to normal and I sleep sound and get up feeling just fine. Sargon Soft Mass Pills ended my constipation without ever griping or nauseating me.

"I'm so happy over regaining my health that I'll be glad to tell anyone what Sargon has meant to me. Just have them phone 2-7783 if they want to know what I think of this wonderful treatment."—Mrs. W. H. Higgins, 507 W. First St., Fort Worth.

Sargon represents the dawn of a new era in the field of modern medicine. It is turning old-fashioned moss-grown health theories upside down and is restoring countless thousands by methods undreamed of a few years ago.

Help Keep Canyon Clean.

A Store With a Purpose

Our objective always has been to serve better with the best merchandise.
This purpose has made the store famous for its service.

J. J. WALKER DRUG STORE

WILL ATTEND THE AMERICAN
CONSERVATORY OF MUSIC

Misses Ava and Aleen Grisham were accompanied by their mother, Mrs. Lulu Grisham, to Chicago, where Ava and Aleen will attend the American Conservatory of Music.

Miss Ava was a vocal student of the Denver College of Music and of Grubb Studio at Denver, Colo. It appears that she will have a very successful career as a singer. Miss Aleen was a piano student of Grubb Studio, Denver. She has accomplished rapidly in her study.

TO THE MUSICAL PUBLIC

I shall return to complete my piano tuning here between the 8th and 15th of this month. It does not pay to let your pianos injure either by delay or by incompetent hands. Register your calls. Phone 426W. C. Daughtry, Fort Worth, Texas.

SPARING THEIR FEELINGS

Many a girl has her mother to blame for a mouth that even a lipstick can't love. And many a man wears a moustache because his mother couldn't bear to make him take his finger out of his mouth.

The Imperial Sedan

The Sport Coupe

Announcing Two New Models of the CHEVROLET SIX

Broadening the appeal of a line of cars which has already won over 950,000 buyers since January 1st, Chevrolet presents two distinguished new enclosed models of the Chevrolet Six—the Imperial Sedan and the Sport Coupe. With beautiful new Bodies by Fisher available in a variety of striking color combinations and with numerous advanced convenience features—these new models provide, in abundant measure, those elements of distinction ordinarily associated with more expensive automobiles.

When you examine the new Imperial Sedan and Sport Coupe,

you will be impressed by their individuality and completeness. But you cannot fully realize what an achievement they represent until you get behind the wheel and drive! For here are all the qualities of six-cylinder smoothness, power and acceleration which Chevrolet alone provides in the price range of the four—combined with economy of better than twenty miles to the gallon of gasoline!

Come in today. Learn for yourself the new standards of quality and luxury that Chevrolet has made available in six-cylinder cars—at prices within the reach of all!

The Roadster, \$525; The Phaeton, \$525; The Coupe, \$595; The Coach, \$595; The Sport Coupe, \$645; The Sedan, \$675; The Imperial Sedan, \$695; The Sedan Delivery, \$595; The Light Delivery Chassis, \$400; The 1½ Ton Chassis, \$545; The 1½ Ton Chassis with Cab, \$650. All prices f.o.b. factory, Flint, Mich.

COMPARE the delivered price as well as the list price in considering automobile values. Chevrolet's delivered prices include only reasonable charges for delivery and financing.

Summer Drouth Broken by Good Rains of Past Two Days; 3.75 Inches Fall Since Saturday

The longest summer drouth of recent years was finally broken yesterday by a general rain of 2.83 inches, which fell during all of the late afternoon and continued until late last night. There was a total of 1.40 inches during the afternoon, while 1.43 inches were added last night to the total.

There was a rain of .61 of an inch Tuesday, which covered a small part of the county. This rain came from the northeast, and was accompanied by considerable hail in some sections. The east part of town was hit by considerable hail, which did damage to flowers and foliage.

It is believed that this general rain will break the high temperature which has prevailed over the

Southwest during the past two weeks. While the thermometer has not reached the 100 mark in Canyon, it has been very hot here, and one of the driest summers in many years.

Farmers were becoming worried over the continued drouth owing to the fact that the row crop would have been materially damaged in another week. None has suffered so far.

The ranges were drying up, and the question of grass was troubling the stockmen.

Everyone is highly elated this morning over the splendid condition as the result of the rain, and predict that another record wheat crop acreage will be planted as a result of this general rain.

T-Anchor Members to Have Exclusive Use of Grounds

R. E. Baird stated yesterday that the members of the T-Anchor reunion party would have exclusive use of the Baird place one mile north of Canyon on August 21st and 22nd for the annual reunion. He made these arrangements yesterday with Manager Armstrong of the pleasure park.

Admission will be made only by ticket, which are for sale at \$2.00 by Mr. Baird. Guards will be at the gate to prohibit those not entitled to admission.

Mr. Baird believes that this will be by far the greatest reunion the T-Anchor boys have ever enjoyed.

B. Y. P. U.

The Claybrook Intermediate B. Y. P. U. of the Baptist Church was entertained with a delightful lawn party last Thursday evening at the home of Miss Bessie Lee Fite. Outdoor games were played until a late hour, then delicious refreshments were served.

Those present were: Bessie Lee Fite, Charles Westbrook, Maud-eana Bishop, Opal Smith, Alma Lynn Beem, Howard Young, Mabel Bishop, Anice Myers, Freda Gill, Russell Bishop, Johnnie Plaster, Helen Heath, Maymie Plaster, Cleo Heath, Dale Bowman, Irma Hinkle, Edna Carr, Sam Hill, Hosea Foster, Jewell Phillips, and Mae Beth Bishop.

ATTENTION BAPTISTS

Sunday is Assembly Day at Ceta Canyon. Together with other churches we are calling off Sunday morning services, but will meet at the church at 8:45 o'clock leaving promptly at 9:00 o'clock for the Assembly Grounds.

Fill your baskets and bring all the family. Get to the canyons for the biggest Sunday School on the Plains. Many will need conveyance. Give all the space possible in your car.

C. G. HOWARD, Pastor.

RAIN PREVENTS MEETING OF AMARILLO BOARD HERE

Members of the board of directors, Amarillo Board of City Development, had been invited to attend a dinner at the College last night, but owing to the rain the trip had to be postponed. It is thought if the weather remains clear the meeting may be held tonight.

LIGHTNING HITS CORNER OF COLLEGE BUILDING

During the rain yesterday lightning struck the cornice at the northeast corner of the administration building. Several bricks were jarred loose but no other damage was done.

The building was hit earlier in the year at the northwest corner of the auditorium.

BAND CONCERT

The Buffalo Band will give a concert Friday night at the band stand at 8:15 o'clock, according to C. E. Strain, director.

Phillips Company Explains Failure of Ship to Appear

Approximately 1000 people waited here for more than an hour last Friday to see the Woolaroo, famous Dole prize winning plane piloted by Col. Arthur Goebel. The plane was scheduled to arrive here at 3:20 p. m.

The Phillips Company general offices at Bartlesville, Okla., in an explanation addressed to the people of Canyon, said the plane was forced to pass Canyon up because of an error in the making of the schedule which took no account of the difference between mountain time and standard time.

The plane was an hour late in leaving Clovis, the company said, and was delayed additional time by trouble in the oil line connections on the Woolaroo. Feeling that it was necessary for the plane to reach the Amarillo airport before dark, officials in charge of the tour headed the ship directly for Amarillo.

The full explanation from the company appears in this issue of the Canyon News.

MRS. BURROW ENTERTAINS

One of the prettiest of mid-summer parties was given last Thursday when Mrs. C. R. Burrow entertained members of the Friday afternoon bridge club and a group of friends at bridge honoring Mrs. Thos. A. Shriver of Nashville, Tenn., who is visiting with her parents, Mr. and Mrs. John S. Humphreys.

The rooms were attractively decorated with roses and zenias, and bridge was played at five tables. Later a salad course was served to those present. Among the guests was Mrs. Dysart of Plainview.

W. A. Patterson of Ft. Worth was in Canyon the last of the past week attending to business.

J. L. Hammonds of Floydada was here on business Tuesday.

Mr. and Mrs. G. C. Hutchinson of Tulsa visited in the home of Mr. and Mrs. N. E. McIntire Sunday.

Golden Green visited in Amarillo Sunday.

Mrs. R. E. Prichard and children have returned from a visit with friends and relatives in Montague County.

Mrs. G. R. Reid and Mrs. J. C. Williams attended the Baptist Encampment Monday.

Mrs. Frank Hicks and Mrs. Sanford Black served a lovely birthday dinner last Sunday, honoring Mrs. James Collins and X. C. Umphres of Amarillo. Those present for the occasion were Mr. and Mrs. James Collins, X. C. Umphres and daughter, Mrs. G. R. Reid, T. F. Reid, Mr. and Mrs. E. E. Williams, Mrs. J. C. Williams, Mr. and Mrs. Sanford Black and family, Mr. and Mrs. Frank Hicks and family.

Miss Ruth Knight returned Saturday from St. Louis where she has been taking special work in music at the Washington University during the summer, and will spend her vacation at the home of her parents, Mr. and Mrs. John Knight.

SEED WHEAT

FOR SALE FROM CROP OF TURKEY RED
WHEAT PRODUCING 40 BUSHELS
THIS YEAR.

This wheat was grown from Certified Turkey Red Seed Wheat bought last year by County Agent Upchurch in Kansas. It was planted on summer fallowed ground free from Johnson grass and was cut with new combines, so that there is no other wheat mixed with it.

It is absolutely dry, as a windrowing machine was used to dry it.

The crop produced 40 bushels an acre this year on 200 acres, 8,000 bushels in all for sale.

Price \$1.50 a bushel at Wm. Ash Farm.

GIRLS' CAMP TO OPEN THURSDAY; MANY EXPECTED

MRS. T. C. DELANEY WILL BE MANAGER.

Noted People to Direct Activities At Methodist Girls' Encampment.

The tenth annual Northwest Texas Girls' encampment will open Thursday, August 8, at the Methodist Camp Ground in the Palo Duro Canyon and will continue until August 22, according to Miss Mattie Mae Swisher, Methodist student secretary.

A large number of girls of the Panhandle will be present at the encampment and will spend the days there learning many worthwhile things under competent leadership. Basketball, archery, nature lore, swimming, horseback riding, music and religious exercises will make the days memorable ones for every girl who takes part.

Several notable persons in the field of young people's work are to be present and will help direct the activities of the girls. One of these, Miss Julia Lake Stevens, council superintendent of young people of Nashville, Tennessee, comes from the Woman's Missionary Council and will do much to make the encampment worth much to the girls. She will be present at the encampment August 14-21.

Other workers who will probably be present are Miss Emma Jewell Ross, of New York City, representative of the Young Women's Christian Association and Girl Reserve work, and Miss Louise Price, of New York City, National Camp Director of Girl Scouts.

Mrs. T. C. Delaney will be manager of the encampment. Abe Mulkey will act as assistant manager, Verna Crump as executive secretary and treasurer, while Rev. Jno. E. Aldridge will be camp "Dad."

The camp staff will include platform managers, a dietitian, ground supervisors, leaders of devotionals and vespers, pianists, soloists and directors of physical education, nature lore, archery and basketball.

The girls will camp in groups of eight or ten, each group having a chaperone. Each group should have a tent which may be rented. Girls who want tents should notify Verna Crump, Memphis, Texas. Expenses for each camper have never exceeded \$10.00.

CAR DELIVERIES

Walker Implement Company, Ford pickup, J. C. Baker, Ford Tudor, J. O. Baker, Ford standard coupe, J. Evette Haley, Ford standard coupe, A. N. Burgan, Ford Tudor sedan, Carl Rogers, Ford roadster, Carl Schroeder, used Ford pickup.

RANCH RECORDS GIVEN BY SPUR MAN TO MUSEUM

ORWIN A. LAMBERT IS DONOR OF RELICS.

Records of Pitch Fork Land and Cattle Company's Ranch Include Valuable Material.

Orwin A. Lambert of Spur, manager of the Pitch Fork Land and Cattle Company's ranch in Kent and Dickens counties, has deposited with the museum of the Panhandle-Plains Historical Society a number of interesting ranch records and relics.

These records are made up of the ledgers of the ranch during the middle and late eighties, when the late D. E. Gardner, one of the charter members of the Texas Cattle Raisers Association, was president of the company and getting the work of the ranch well under way. Among these records are four maps giving in pictorial form the early history of the ranch lands. The Pitch Fork ranch, one of the oldest companies operating in West Texas, was started in 1885 and now owns approximately 130,000 acres of land in King and Dickens counties.

Among the records given by Mr. Lambert is a register of the old Barnes House, a hotel of Albany, Texas. This register begins in 1885. In it are recorded the names of some of the most prominent of Texas men connected with the cattle industry. Interspersed between the pages of the register are pages of advertising which have been used by Mr. Gardner as a scrap book. These contain clippings upon every phase of poetry from Tennyson to cowboy songs. They contain many clippings upon the early days of the cattle industry.

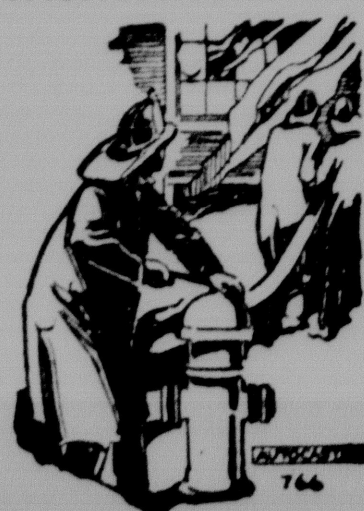

Among the relics contained in the Pitch Fork collection are three of the first types of wire used in fencing in West Texas, a pair of rawhide hobbles made by Mr. Lambert, old bits, and the Pitch Fork branding iron.

Horns of "Old Blue," Famous Longhorn, in Museum at College

The horns of the longhorn steer, Old Blue, the famous bell steer that led so many JA trail herds north to Dodge City, Kansas, have come to rest in the museum of the Historical Society at Canyon, thru the loan of the executors of the Adair Estate. T. D. Hobart of Pampa and Henry C. Coke of Dallas.

For years they have hung above the door of Clifton Henry's office, the present manager of the ranch. Old Blue was born in the Nueces country of Texas. He was brought to the Panhandle as a young steer and was selected by Colonel Goodnight as a lead steer. Every night upon the trail the bell which had rattled around his neck all day long guiding the steers that followed him, was muffled. The clapper was released by a cowboy of a morning and as soon as the bell started ringing the herd knew that it was time to move and set out upon the trail of Old Blue.

He accommodately led these herds into the shipping corrals at Dodge City, but always turned back down the trail with the cowboys when they again started for the ranch. He was led 250 miles to the JA's, walking with the stride of a horse. His last years were

They May Call You

When the firemen call, dressed for action, it is too late to think of insurance. The loss may be large—or the loss may be small—but a loss nevertheless unless you have your home and personal property well insured. Winter is the season of the year when fire losses are greatest. Putting off taking out a fire insurance policy is a gamble which no one can afford. Let us explain the economy which may be enjoyed in various kinds of policies.

J. D. GAMBLE Agent

spent on the ranch, independent in his old age because of the period of usefulness which had earned him these rights.

The horns measure four feet from tip to tip.

MOODY WILL ACT ON APPROPRIATIONS FRIDAY

Friday night is the time limit for Governor Moody to act upon the appropriations. He has been working on the bills for the past twenty days and must make vetoes Friday, or the entire amounts become effective.

No word has been received here as to what he will do with the items allowed by the legislature for the West Texas State Teachers College.

HAS OPERATION

Miss Irene Angel underwent a major operation in St. Anthony's hospital in Amarillo Tuesday. She is doing nicely.

INFANT DIES

A daughter was born to Mr. and Mrs. Roy Taylor Tuesday and died Wednesday, and the funeral held at the Dreamland cemetery.

CARD OF THANKS

We wish to thank the many friends for their assistance and sympathy at time of the death of our baby.

Mr. and Mrs. Roy Taylor

W. C. ROUNTREE, M. D.

If you have any of the following symptoms, I have the remedy no matter what your trouble has been diagnosed: Nervousness, stomach trouble, loss of weight, loss of sleep, sore mouth, pains in the back and shoulders, peculiar swimming in the head, frothy like phlegm in throat, passing mucous from the bowels, especially after taking purgative, burning feet, brown, rough or yellow skin, burning or itching skin, rash on the hands, face and arms resembling sunburn, habitual constipation, (sometimes alternating with diarrhoea) copper or metallic taste, skin sensitive to sunlight, forgetfulness, despondency and thoughts that you might lose your mind, gums a fiery red and falling away from the teeth, general weakness with loss of energy. If you have these symptoms and have taken all kinds of medicine and still fail, I especially want you to write for my booklet.

Mrs. J. B. Massey of Odessa, Texas, Box 112, whose picture appears here writes I wish to thank you very much for restoring my health from one of the most dreadful, miserable diseases that anyone can have. I was in bad health for several years, under care of Doctors for three years. I do not think I could have lived much longer. I am in better health today than for several years, weigh more than I ever did in my life. I believe I am rid of an awful disease that the other Doctors failed to cure. FOR FREE DIAGNOSIS AND LITERATURE WRITE: W. C. ROUNTREE, M. D. AUSTIN, TEXAS.

If you have any of the following symptoms, I have the remedy no matter what your trouble has been diagnosed: Nervousness, stomach trouble, loss of weight, loss of sleep, sore mouth, pains in the back and shoulders, peculiar swimming in the head, frothy like phlegm in throat, passing mucous from the bowels, especially after taking purgative, burning feet, brown, rough or yellow skin, burning or itching skin, rash on the hands, face and arms resembling sunburn, habitual constipation, (sometimes alternating with diarrhoea), copper or metallic taste, skin sensitive to sunburn, forgetfulness, despondency and thoughts that you might lose your mind, gums a fiery red and falling away from the teeth, general weakness with loss of energy.

If you have these symptoms and have taken all kinds of medicine and still lack I especially want you to write for my booklet.

Mrs. J. B. Massey of Odessa, Texas, Box 112, whose picture appears here writes: I wish to thank you very much for restoring my health from one of the most dreadful, miserable diseases that anyone can have. I was in bad health for several years, under care of Doctors for three years. I do not think I could have lived much longer. I am in better health today than for several years. I weigh more than I ever did in my life. I believe I am rid of an awful disease that the other Doctors failed to cure. FOR FREE DIAGNOSIS AND LITERATURE WRITE: W. C. BOUNTREE, M. D. AUSTIN, TEXAS

 Remember, someone will win that marvelous Chevrolet Coach and someone will win that wonderful Majestic Radio.
 Which one will YOU win?
 Now—today, obey that impulse, join that happy wide-awake bunch of Opportunity Club members. Come in—see the Club Manager—you will find him at his desk from 9 a. m. until 8 p. m. every day; if you can't get down until after supper, come then, you'll find him there and ready and willing to give you the full details and help you get started towards the wheel of that Chevrolet Coach. This is YOUR opportunity! Make the most of it!

THAT COMFORTABLE FEELING
 Teachers say that the well-dressed child often performs best in school even though the balance of brains may be in favor of a poorly dressed playmate.

PUBLIC PROPERTY
 "However much he may deplore it," says Calvin Coolidge, "the President ceases to be an ordinary citizen."

LOOK FOR THE NEW
 Henry Ford's advice to young men: "Never be afraid of tackling a job you've never done before."

Wayside Items

Still very warm and dry. All signs fail. Vegetation showing effects of the dry spell.
 Clyde Carter and family from Big Spring reached the parental home Tuesday night. Went on to Amarillo Thursday.

Willis Fisher and R. L. Carter left some days ago for Quinlan. He appears to be improving some in health.
 John T. McGehee, wife and Aunt Annie Wesley, also W. R. Stockett and wife made a trip to Guymon, Okla., and returned the past week.

A crowd of young people enjoyed a sociable at Mrs. J. R. Stockett's Saturday night.

Visitors and delegates to A. & M. Short Course got in Sunday night. A wonderful trip with some, while part of the bunch didn't seem to enjoy it as much. They saw much to interest them, especially at Galveston.

J. W. McCrerey and G. G. Foster of Canyon have recently traded land. Mr. McCrerey gets town property, houses and lots in Canyon. Mr. Foster gets the home and one and one half sections of land. Mrs. McCrerey and daughters, Osce and Ruth, will move in soon for school.

We understand J. E. Culwell has bought a nice brick residence in Tulsa recently. Mrs. Culwell and children will go in for benefit of schools soon. Wayside will miss these estimable families.

Clinton Selby and wife of Port, Oklahoma, came Sunday to visit her aunt, Mrs. Emma Franklin.

Mrs. Robert Kerlin and three children, Lena Ruth, Robert, and Imogene of Nara Visa, N. M., Mrs. Ralph Clifton and four children of South Plains, Mr. and Mrs. Roy Smith and son, of Hereford, W. R. Franklin, wife and three children, Mrs. Bonnie Sluder and family were dinner guests at the parental Franklin home Sunday. Mary Elizabeth Clifton of Amarillo was numbered with the thirty guests. All visited the canyons in the afternoon.

Mrs. Alec Whitten is entertaining a number of her relatives, brothers and sisters, from Arkansas.

Mrs. Fannie Franklin and Roy, Mrs. Bonnie Sluder and children made a trip to Canyon Monday.

W. R. Franklin, wife and little ones made a trip to Amarillo last Tuesday, spending the night with friends.

Mrs. Edith Kerlin and children visited with Mrs. Bertha Payne Tuesday. Robert Kerlin is still unable to use his hand.

Jowell News

Mr. and Mrs. Fred Grace moved to Wichita Falls where they will make their home.

Miss Katie Fields of Sierra Blanca is here to spend a few weeks with her sister, Mrs. Z. J. Steen.

Mrs. R. F. Bratcher, who has been visiting her niece in Gainesville, returned to her home one day last week.

The people of this community surprised Mr. and Mrs. Z. J. Steen with a basket dinner Sunday. Those present were: Mr. and Mrs. Mike Randolph, Mr. and Mrs. Henry Garvin, Mr. and Mrs. Lewis Henders, Mrs. Henry Burtz, Misses Helen, Mildred, and Ruth Burtz, Mr. and Mrs. J. J. Leavitt and family, Mrs. Jess Davis, Mr. Earl Davis, and Mrs. Buron Powell.

Mr. and Mrs. Curtis Robertson left Saturday for a trip to Carlsbad Cavern.

W. Arnold has gone to Missouri to visit his brother.

Frank Davis and John Stuits returned Friday from a trip to Carlsbad, N. M.

Mr. and Mrs. Ralph Bratcher visited in the parental R. F. Bratcher home Sunday.

John Stuits returned to his home Saturday.

Mrs. Charlie Hileman of New Mexico is visiting at the Pope Hileman home this week.

Mrs. Pope Hileman, who has been confined to her bed the past few weeks is improving.

Mr. and Mrs. Earl Burtz, Mr. and Mrs. Buron Powell visited at the parental Henry Burtz home Saturday evening.

A few of the people of this community are threshing this week. Mr. and Mrs. Earle Welch of Friona visited at the Jess Davis home one day last week.

Mr. and Mrs. Powell and Claude Powell motored to Hereford Monday.

Miss Helen Cox of Canyon visited Miss Mildred Burtz Sunday.

In a noisy argument, what dense silence follows, when another man but in with the facts.

The Medicine For Pellagra

Dr. J. L. Leavert, prominent, Paris, Texas, Specialist, is attracting National attention with his NEW method of treating Pellagra and certain forms of stomach trouble closely resembling Pellagra. Under a rigid test of more than 3000 patients the treatment proved to be all that was claimed. A 28 day trial treatment for \$5 and this money back if the patient is not benefited and the patient alone is the judge. The medicine doesn't make you sick to take it. For particulars, testimonials and blank for FREE diagnosis write
 J. L. LEVERT, M. D., Paris, Texas.
 16-18-20, 22

Teachers of Panhandle-Plains Will Attend Institute Here September 2-4; Noted Persons Are on Program

Eighteen Counties To Be Represented By Teachers In Attendance Here; Work Will Be Done In Sectional Divisions; Savage is Conductor.

The annual meeting of the Panhandle-Plains Teachers Association including over one thousand teachers from eighteen counties will be held at W. T. S. T. C. September 2-4. The institute will be conducted by F. E. Savage, head of the training school.

The following sectional divisions will be made in the institute: superintendents and principals, high school teachers, public speaking and music teachers, intermediate instructors, two primary sections, two rural school sections, and a home economics division.

The institute will be divided into two phases. The general assembly with noted speakers, and the sectional work as already outlined.

In addition to this work, there will be made plans for the entertainment of teachers during the week, with musical programs, evening picnics, and watermelon feasts.

Among those who will appear on the program are: W. L. Hughes, ex-president of Texas State Teachers Association, of A. & M.; Dr. T. B. Brooks, head of the education department of Baylor University; Hon. James O. Guleke, of Amarillo; Senator C. C. Small of Wellington; Congressman Marvin Jones, Amarillo; Eula F. Hunter, president of Class Room Teachers Association of N. E. A.; Dr. R. P. Jarrett, W. T.; Price Scott, superintendent of Floyd County; Annie McDonald, Assistant superintendent of schools, Amarillo; Elva Fronbarger, W. T.; Ada V. Clark, W. T.; and Perman Sawyer, Canadian.

Second Volume of Historical Review Ready in 2 Weeks

Volume Two of the Panhandle-Plains Historical Review, edited by J. Everts Haley, will be off the press in two weeks. It is a larger volume than that of last year and contains articles by some of the most distinguished of the Panhandle-Plains pioneers, as well as articles by well known historians of the Southwest.

Professor W. P. Webb of the University of Texas writes on the significance of the Great Plains country prior to and during the Civil War, under the subject, "The Great Plains blocked the Expansion of the South."

W. C. Holden, of the History Department at Texas Tech, writes of Texas Frontier Defense between

1861 and 1889. The vivid reminiscences of Hank Smith, who was the first permanent settler in the South Plains country, are concluded in this issue. They have been edited by Miss Hattie M. Anderson, of Canyon.

J. A. Rickard of the University of Texas tells of South Plains land rushes and the excitement incident to filling upon open West Texas lands. W. S. Mabry, now of Selma, Alabama, accompanied one of the first surveying parties into the Panhandle in 1873. He later surveyed as county surveyor of Oldham and attached counties, and was intimately connected with the development of the XIT ranch. He tells in this volume of the early West Texas and Panhandle surveys.

Judge Thomas F. Turner of Amarillo, inspired by the address of Chief Justice W. R. Hall, has expanded upon his subject of "Prairie Dog Lawyers" and written a fascinating biography of the early legal representatives of the Panhandle.

T. D. Hobart, Pampa, president of the Historical Society, has written of some characters and customs of old Mobetie. W. H. Patrick, Clarendon, tells of an evening service of a type long past. Another humorous and soundly historical article is that written by G. A. F. Parker, Hereford, upon "Incipient Trade and Religion in Amarillo."

L. F. Sheffy, Canyon, summarizes the life history of Colonel T. S. Bugbee, the second settler of the Panhandle.

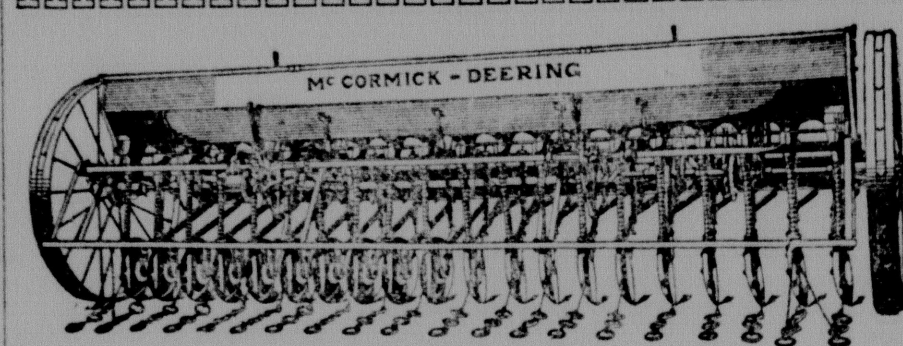

A section of book reviews and a membership list completes the book. It will be approximately 150 pages of clear-cut format and excellent workmanship.

NO FRESH EGGS WANTED
 Experiments at the University of Wisconsin show that the best angel food cakes are those made from eggs a week old. Newly laid ones are not so well adapted to this type of cake.

FORD PHILOSOPHY
 "Our country needs a great many boys who can trace their intellectual ancestry to Thomas A. Edison," says Henry Ford.

REAL LONG DISTANCE CALL
 The longest long distance telephone call that can be made is from San Diego to Stockholm, a distance of 8,630 miles.

The true wife always acts like one possessed.

McCormick-Deering and Van Brunt Drills

Latest improved and up-to-date in every way. In all sizes. Horse drawn or tractor drawn. All improvements of the very latest. Roller main bearings, disc bearings chilled and dust proof to insure long life. Easy draft.

Popularity.. begins with a Clear Skin

IT'S the person with a clear, smooth, lovely complexion that usually wins.

To be sure, not much is said openly about skin eruptions, but secretly they influence many important affairs. Personal likes and dislikes are quickly formed.

Everybody wants to be attractive. It is a just and natural ambition. A clear skin makes everyone more attractive.

Skilled physicians recognize the appearance of pimples, boils, eczema and other skin eruptions as being an indication that the body's power of resistance is low—that there is a deficiency of red-blood-cells.

The sure way to remedy this condition is to restore the red-blood-cells to normal.

SSS

This is why so many thousands have been enabled to free themselves of those unsightly blemishes and painful skin annoyances by taking a course of S.S.S.

S.S.S. helps Nature restore the blood to its normal state. Healthy blood makes the body strong and resistant to disease.

Without plenty of rich, red blood there could be no strong, sturdy, powerful men, or healthy, beautiful women.

If you are troubled with so-called skin disorders or if the count of your red-blood-cells is low, take a few bottles of S.S.S. Seek energy, vitality and a clear skin through the remedy, which is made from fresh vegetable drugs, and has stood the test of over 100 years.

All Drug Stores sell S.S.S. in two sizes. Ask for the larger size. It is more economical.

John T. McGeehe, wife and Aunt Annie Wesley, also W. R. Stockett and wife made a trip to Guymon, Okla., and returned the past week.

A crowd of young people enjoyed a sociable at Mrs. J. R. Stockett's Saturday night.

Visitors and delegates to A. & M. Short Course got in Sunday night. A wonderful trip with some, while part of the bunch didn't seem to enjoy it as much. They saw much to interest them, especially at Galveston.

J. W. McCrery and G. G. Foster of Canyon have recently traded land. Mr. McCrery gets town property, houses and lots in Canyon. Mr. Foster gets the home and one and one half sections of land. Mrs. McCrery and daughters, Osce and Ruth, will move in soon for school.

We understand J. E. Culwell has bought a nice brick residence in Tulsa recently. Mrs. Culwell and children will go in for benefit of schools soon. Wayside will miss these estimable families.

Clinton Selby and wife of Port, Oklahoma, came Sunday to visit her aunt, Mrs. Emma Franklin.

Mrs. Robert Kerlin and three children, Lena Ruth, Robert, and Imogene of Nara Visa, N. M., Mrs. Ralph Clifton and four children of South Plains, Mr. and Mrs. Roy Smith and son, of Hereford, W. R. Franklin, wife and three children, Mrs. Bonnie Sluder and family were dinner guests at the parental Franklin home Sunday. Mary Elizabeth Clifton of Amarillo was numbered with the thirty guests. All visited the canyons in the afternoon.

Mrs. Alec Whitten is entertaining a number of her relatives, brothers and sisters, from Arkansas.

Mrs. Fannie Franklin and Roy, Mrs. Bonnie Sluder and children made a trip to Canyon Monday.

W. R. Franklin, wife and little ones made a trip to Amarillo last Tuesday, spending the night with friends.

Mrs. Edith Kerlin and children visited with Mrs. Bertha Payne Tuesday. Robert Kerlin is still unable to use his hand.

Jowell News

Mr. and Mrs. Fred Grace moved to Wichita Falls where they will make their home.

Miss Katie Fields of Sierra Blanca is here to spend a few weeks with her sister, Mrs. Z. J. Steen.

Mrs. R. F. Bratcher, who has been visiting her niece in Gainesville, returned to her home one day last week.

The people of this community surprised Mr. and Mrs. Z. J. Steen with a basket dinner Sunday. Those present were: Mr. and Mrs. Mike Randolph, Mr. and Mrs. Henry Garvin, Mr. and Mrs. Lewis Hinders, Mrs. Henry Burtz, Misses Helen, Mildred, and Ruth Burtz, Mr. and Mrs. J. J. Leavitt and family, Mrs. Jess Davis, Mr. Earl Davis, and Mrs. Buron Fewell.

Mr. and Mrs. Curtis Robertson left Saturday for a trip to Carlsbad, N. M.

W. Arnold has gone to Missouri to visit his brother.

Frank Davis and John Stults returned Friday from a trip to Carlsbad, N. M.

Mr. and Mrs. Ralph Bratcher visited in the parental R. F. Bratcher home Sunday.

John Stults returned to his home Saturday.

Mrs. Charlie Hileman of New Mexico is visiting at the Pope Hileman home this week.

Mrs. Pope Hileman, who has been confined to her bed the past few weeks is improving.

Mr. and Mrs. Earl Burtz, Mr. and Mrs. Buron Fewell visited at the parental Henry Burtz home Saturday evening.

A few of the people of this community are threshing this week.

Mr. and Mrs. Earle Welch of Friona visited at the Jess Davis home one day last week.

Mr. and Mrs. Fewell and Claude Fewell motored to Hereford Monday.

Miss Helen Cox of Canyon visited Miss Mildred Burtz Sunday.

In a noisy argument, what dense silence follows, when another man butts in with the facts.

The Medicine For Pellagra

Dr. J. L. Leavert, prominent, Paris, Texas, Specialist, is attracting National attention with his NEW method of treating Pellagra and certain forms of stomach trouble closely resembling Pellagra. Under a rigid test of more than 3000 patients the treatment proved to be all that was claimed. A 28 day trial treatment for \$5 and this money back if the patient is not benefited and the patient alone is the judge. The medicine doesn't make you sick to take it. For particulars, testimonials and blank for FREE diagnosis write

J. L. LEVERT, M. D., Paris, Texas. 16-18-20, 221

Teachers of Panhandle-Plains Will Attend Institute Here September 2-4; Noted Persons Are on Program

Eighteen Counties To Be Represented By Teachers In Attendance Here; Work Will Be Done In Sectional Divisions; Savage is Conductor.

The annual meeting of the Panhandle-Plains Teachers Association including over one thousand teachers from eighteen counties will be held at W. T. S. T. C. September 2-4. The institute will be conducted by F. E. Savage, head of the training school.

The following sectional divisions will be made in the institute: superintendents and principals, high school teachers, public speaking and music teachers, intermediate instructors, two primary sections, two rural school sections, and a home economics division.

The institute will be divided into two phases. The general assembly with noted speakers, and the sectional work as already outlined.

In addition to this work, there will be made plans for the entertainment of teachers during the week, with musical programs, evening picnics, and watermelon feasts.

Among those who will appear on the program are: W. L. Hughes, ex-president of Texas State Teachers Association, of A. & M.; Dr. T. B. Brooks, head of the education department of Baylor University; Hon. James O. Guleke, of Amarillo; Senator C. C. Small of Wellington; Congressman Marvin Jones, Amarillo; Eula F. Hunter, president of Class Room Teachers Association of N. E. A.; Dr. R. P. Jarrett, W. T.; Price Scott, superintendent of Floyd County; Annie McDonald, Assistant superintendent of schools, Amarillo; Elva Fronbarger, W. T.; Ada V. Clark, W. T.; and Ferman Sawyer, Canadian.

Second Volume of Historical Review Ready in 2 Weeks

Volume Two of the Panhandle-Plains Historical Review, edited by J. Evetts Haley, will be off the press in two weeks. It is a larger volume than that of last year and contains articles by some of the most distinguished of the Panhandle-Plains pioneers, as well as articles by well known historians of the Southwest.

Professor W. P. Webb of the University of Texas writes on the significance of the Great Plains country prior to and during the Civil War, under the subject, "The Great Plains blocked the Expansion of the South."

W. C. Holden, of the History Department at Texas Tech, writes of Texas Frontier Defense between

1861 and 1889. The vivid reminiscences of Hank Smith, who was the first permanent settler in the South Plains country, are concluded in this issue. They have been edited by Miss Hattie M. Anderson, of Canyon.

J. A. Rickard of the University of Texas tells of South Plains land rushes and the excitement incident to filing upon open West Texas lands. W. S. Mabry, now of Selma, Alabama, accompanied one of the first surveying parties into the Panhandle in 1873. He later surveyed as county surveyor of Oldham and attached counties, and was intimately connected with the development of the XIT ranch. He tells in this volume of the early West Texas and Panhandle surveys.

Judge Thomas F. Turner of Amarillo, inspired by the address of Chief Justice W. R. Hall, has expanded upon his subject of "Prairie Dog Lawyers" and written a fascinating biography of the early legal representatives of the Panhandle.

T. D. Hobart, Pampa, president of the Historical Society, has written of some characters and customs of old Mobetie. W. H. Patrick, Clarendon, tells of an evening service of a type long past. Another humorous and soundly historical article is that written by G. A. F. Parker, Hereford, upon "Incipient Trade and Religion in Amarillo."

L. F. Sheffy, Canyon, summarizes the life history of Colonel T. S. Bugbee, the second settler of the Panhandle.

A section of book reviews and a membership list completes the book. It will be approximately 150 pages of clear-cut format and excellent workmanship.

NO FRESH EGGS WANTED

Experiments at the University of Wisconsin show that the best angel food cakes are those made from eggs a week old. Newly laid ones are not so well adapted to this type of cake.

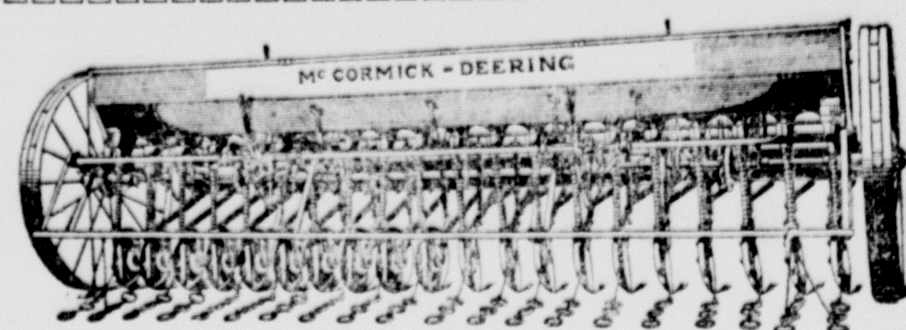

FORD PHILOSOPHY

"Our country needs a great many boys who can trace their intellectual ancestry to Thomas A. Edison," says Henry Ford.

REAL LONG DISTANCE CALL

The longest long distance telephone call that can be made is from San Diego to Stockholm, a distance of 8,630 miles.

The true wife always acts like one possessed.

Popularity... begins with a Clear Skin

IT'S the person with a clear, smooth, lovely complexion that usually wins.

To be sure, not much is said openly about skin eruptions, but secretly they influence many important affairs. Personal likes and dislikes are quickly formed.

Everybody wants to be attractive. It is a just and natural ambition. A clear skin makes everyone more attractive.

Skilled physicians recognize the appearance of pimples, boils, eczema and other skin eruptions as being an indication that the body's power of resistance is low—that there is a deficiency of red-blood-cells.

The sure way to remedy this condition is to restore the red-blood-cells to normal.

FARM AUCTION
SALE!

FARM MACHINERY---LIVESTOCK

Fri., Aug. 9th

SALE BEGINS PROMPTLY AT 1:30 P. M.

We will sell at Public Auction, without reserve, our farming equipment and livestock, located on the Wm. Ash farm, two miles west, and four miles north of Umbarger, the following:

Farm Machinery

2—Emerson 10-foot one-way plows.
1—Fordson tractor.
1—Case 15-27 tractor.
1—Ford truck.
1—Deering broadcast binder.
1—McCormick-Deering row binder.
1—Two-row P. and O. go-devil.
3—Slide go-devils.
2—Wagons.
2—One-row Cultivators.
Several wheat drills, Superior and McCormick-Deering.
Several 15-30 McCormick - Deering tractors.
Other machinery too numerous to mention. This machinery is up in good condition and ready to hitch to.

Milk Cows

5—Extra good Jersey milk cows, good ages and heavy milkers.
1—Durham cow, extra good.

Pure Bred Hampshire Gilts

5—Pure-bred Hampshire gilts.
Several Duroc and Poland China sows.

Horses

7—Head work and saddle horses.

Harness

Several sets good harness, collars, bridles, lines, etc.

THERE WILL BE PROPERTY CONSIGNED IN THIS SALE NOT MENTIONED IN AD.

WALKER IMPLEMENT CO.

W. C. BLACK, Clerk

COL. RAY BARBER, Auctioneer

Public Sale
Tues., Aug. 13

BEGINNING AT 1:00 P. M.

Located 4 1/2 miles South of High School on Schramm Farm.

FARM MACHINERY

1—Feed grinder (Bowser)
1—2-row lister.
1—2-row knife sled.
1—Slide go-devils.
1—Disc harrow, 8-ft.
1—3-section drag harrow.
1—3 1/2 Weber wagon.
1—3 1/4 farm truck.
1—Weber grain bed.
1—Hay frame
1—Emerson gang plow.
1—Emerson disc plow.
1—Deering mower, 5-ft.
1—Hay rake.
1—John Deere Lister.
2—Deering row binders.
1—1 1/2 h. p. Fairbanks Morris engine, good as new.
1—Emery stone power take off.

LIVE STOCK—HORSES

1—Team gray mares, wt. 2800.
1—Team gray mares, wt. 2700.
1—Black mare, wt. 1100.
1—Iron gray mare, 6 yrs. old, wt. 1550.
1—Iron gray mare, 4 yrs. old, wt. 1300.
1—Brown horse, 4 yrs. old, wt. 1100.

CATTLE

4—Head good Jersey Milch cows.
2—Jersey heifer calves.

HOGS

1—Brood sow.
6—Head shoats, 3 mos. old, good ones.

MISCELLANEOUS

4—Sets good harness and collars.
1—Army saddle.
Other articles too numerous to mention.

Terms---CASH

No property to be removed until terms are complied with.

WHAT HAPPENED BEFORE

The Sheridan Dramatic Club, of which Tom Bilbeck, the narrator, Maryella, the girl he cares for, and Jim Cooper, his rival, are members start a performance of Pygmalion and Galatea at the Old Soldiers' Home, but are interrupted by a fire. During the rehearsals Tom Bilbeck is accused by the husband of one of the actors, Mr. Hemmingway, of being in love with his wife.

Riding away from the scene of the ill-fated play in their costumes and overcoats, the group of players is held up by two escaped convicts, one of whom is captured by Bilbeck after a struggle.

The captured thief is tied to a chair at the Old Soldiers' Home. Unable to leave the home as the car refused to budge, the players must stay there, and Mr. Hemmingway, hearing this over the phone, says he is coming right to the home—as he is suspicious of his wife and Bilbeck. Meanwhile the sheriff arrives.

NOW GO ON WITH THE STORY

He stopped in amazement as he saw our group.

"You've got a lot of prisoners, ain't you?" he commented.

"These aren't prisoners," the colonel explained hastily. "There's only one."

He lead the way to Bill, who, trussed up in his chair, had fallen asleep peacefully.

The entire situation was explained to the sheriff while he peeled off a layer or two of clothing and revealed himself as a small old man, with watery eyes and considerable foliage in front of his face. His beard was white, except where it was stained with tobacco juice.

"If you don't mind," said the sheriff, "we won't go back until morning. It's storming so hard out now that I doubt if we could get through. I'll just put my horse in the stable."

"You can't," said the colonel.

"The stable is burnt up."

A compromise was effected by quartering the horse in the cellar. As it happened, there was an outside runway leading to the basement, down which supplies were usually wheeled in trucks. After considerable persuasion the horse was induced to negotiate this, and was tied to a post in one of the small storerooms below.

That done, the colonel assigned us quarters for the night. Fortunately there were enough vacant rooms so that each of the ladies could have an apartment, while we men were billeted on cots in the general dormitory, where most of the veterans slept.

CHAPTER VIII.

"Help"

Mrs. Hemmingway refused to retire until her husband came. I offered to sit up with her, but she declined vehemently.

"You know what John would think if he found you and me sitting up alone together," she explained.

I agreed with her heartily, so we fixed a good warm fire in the stove and left her alone to wel-

come her spouse. It would be only a few hours until morning, and I did not bother to undress, but threw myself exhausted, on my cot.

I did not sleep, however. The storm outside was making a continuous racket around the caves and corners of the building that nearly drowned the chromatic snores of the veterans.

The excitement of the evening still kept my blood racing and my nerves at high tension. I listened for the opening of the door which would indicate that Mr. Hemmingway had arrived.

The sonorous slumbers of our country's ex-defenders began to fray my temper. What right had anybody to sleep while I struggled in vain to woo Morpheus?

I might have become accustomed to a regular snore, but there was one—Comrade Pike Henwether, for a dollar—who gurgled in his sleep. The exasperating part about it was that he didn't do it all the time. Only occasionally above the diapason of his fellows came this unearthly gurgle, as if dishwasher were disappearing down a sink.

I tried to calculate the intervals between explosions and finally

thought I had him timed to twenty-eight seconds. Then he fooled me by missing on one cylinder and remaining quiet a full minute. It was almost a relief when he burst forth again.

Something had disarranged his timer, for he became erratic from now on, sometimes firing twice in succession and sometimes failing me for two and three revolutions at a time. His compression was wonderful. The trouble was in his spark.

At last my brain grew curdled with futile exasperation. I may have dozed, or possibly I had a fever delirium. I don't know. Anyway, it was not a refreshing sleep that came to me and it was crowded with nightmares.

Suddenly I opened my eyes and listened intently to a new sound that had been beating against my eardrums for several minutes during my doze. A series of irregular tappings, accompanied by a low moaning, became audible above the steady roar of the storm. My relaxed nerves became alert once more.

What was it?

The irregular thumping was repeated. It sounded far away, and yet strangely near, as if it might be in the walls of the building. Was it a spirit rapping?

I had never believed in such things, but then I had never had proof of any kind to convince me. One hair-raising supernatural incident will make a spiritualist of anybody.

A sudden sound of some one strangling made me sit up in bed. This last was in the room, so I soon decided that it was my friend the eccentric snorer, who quite by accident had hit upon a new specialty.

But the thumping and moanings continued. I threw off the covers and got out of bed, determined to investigate. I had no matches—there were no pockets in my tights; but I felt my way to the door, barking my shins only once on an iron cot.

Faintly came a cry for help.

I made haste. I am a chivalrous fool; no one ever yells for assistance without getting it from me. I rush in blindly where even angels would pause to put on goshes.

I stumbled down the stairs. Came again the faint cry.

"Help!"

It was Mrs. Hemmingway's voice. I peered in at the door of the great living room, which was faintly illuminated by a single oil lamp on the table—the electric current was supplied only until one o'clock. I discovered later. The room was chill with the penetrating cold of a winter's morning when the fires have reached their lowest ebb.

Mrs. Hemmingway was walking up and down frantically screaming, "Help!" every time the thumping and moaning would recur.

Suddenly she saw me as I advanced out of the darkness. As she did an inarticulate cry of desperate fear escaped her lips and

she pitched forward.

I jumped quickly enough to catch her. She had fainted.

While I looked around anxiously for a place to deposit her at full length, I became aware of a new sound—a rapping at the front door. I was too busy to bother about it then. I picked up Mrs. Hemmingway bodily and started for the table where the lamp was.

In the absence of a couch I could put her on that.

I had nearly reached it when the outer door was flung violently open, admitting a swirl of flying flakes. With them came a gentleman.

He was wearing a derby hat tied onto his head with a muffler and was otherwise ineffectually bundled against the storm in a black broadcloth overcoat with the collar turned up. On his feet were a pair of snow shoes.

"Good heavens!" I exclaimed.

"Who are you?"

"John Hemmingway, confound you!" he growled, stepping toward me with upraised fist and tripping over his own snowshoes which he had forgotten he had on.

That gave me a second to place my burden on the long table before he could reach me. Just in time I straightened up to find myself in his grasp.

We wrestled back and forth silently. Twice he kicked me in my bruised shin with his snowshoes. The only way I could prevent a repetition of those tactics was to stand on the broad webbing of the shoes myself. As I weighed something over two hundred and effectually anchored him to the floor.

While we stood embracing one another in a deadlock a low moan escaped the lips of Mrs. Hemmingway.

"Hadn't you better take care of your wife?" I panted, apprehensive lest she roll off the table.

"You seem to be able and willing to do that," he hissed vindictively. "You home-wrecker!"

"You're mistaken," I returned hastily.

"Of course," he sneered. "I didn't walk in just now and find her in

your arms at four o'clock in the morning! I only thought it was you. In reality it was some one else and you were up in your own room fast asleep."

To emphasize his remarks he hauled off with his right arm, which I had carelessly allowed to escape me, and belted me energetically in the ear.

I don't know what might have happened further between us had we not been separated by a willing assortment of half dressed old gentlemen.

"Stop this racket!" shouted the sheriff, displaying his star conspicuously. "I represent the law and order around here and I'm going to have peace."

I was dragged off from Hemmingway's snowshoes. We stood glaring at one another. It is impossible instantly to forget a ringing blow on the ear, I find, even if it is delivered by a very good friend. On his side I suppose that his resentment toward me was at least partially justified by appearances. It was hard to think of those things just then, however, and as a matter of fact, I didn't.

"Good morning, Mr. Hemmingway," greeted Jim Cooper, arriving in what I thought at first was an abbreviated sleeping garment, but which I later discovered was his Greek tunic. "Glad you got here at last. Why—what the deuce—?"

"Mrs. Hemmingway fainted," I explained.

"Oh, I see," he considered thoughtfully. "I suppose it's all for the best. I imagine that is the only way any one could get any rest in this institution."

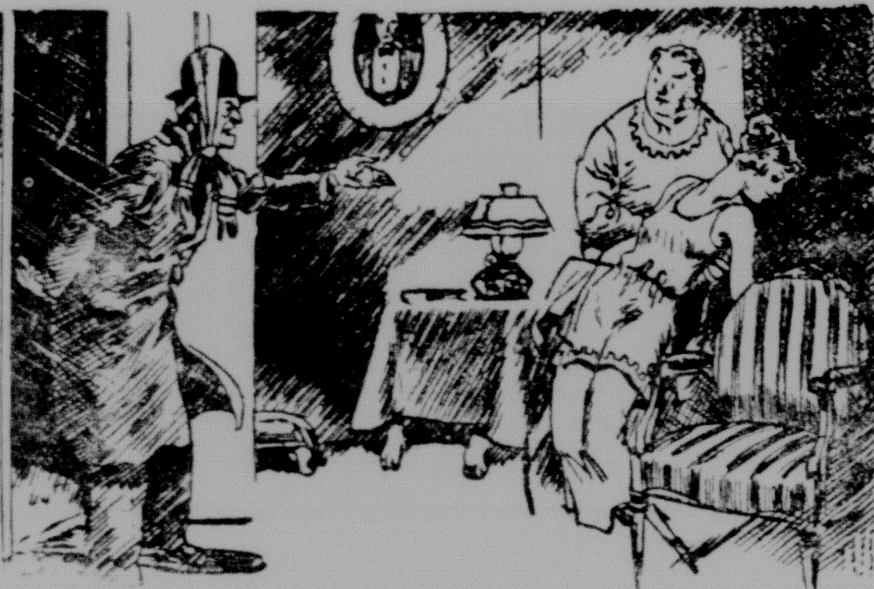

Evidently Jim had noticed the snoring too.

Mrs. Hemmingway opened her beautiful eyes.

"Oh, John!" she exclaimed joyfully as she recognized her husband even in a derby hat and snowshoes. He made no move to respond to the entreaty in her voice.

"Why, what's the matter?" she pleaded.

"You know very well," he returned savagely. "When I arrived

He made no move to respond to the entreaty in her voice.

"Why, what's the matter?" she pleaded.

"You know very well," he returned savagely. "When I arrived

I found you in Tom Bilbeck's arms." "Me?" she said interrogatively. "Impossible. It must have been Maryella you saw."

"It was not," hastily disclaimed a voice in the rear of the group. My heart sank. I was in hopes that I would be spared Maryella's participation in this scene.

"I don't know what happened," Mrs. Hemmingway went on, slightly bewildered, "but I am sure that I can explain everything."

While they were talking the floor trembled violently and there was a muffled crash beneath us. Soon followed a prolonged breaking of glass as if a chimney had fallen through a skylight.

CANYON

To the People of Canyon and Vicinity

We wish to take this means of offering our humble apology for the failure of the Woolaroc to stop in Canyon last Friday as scheduled. We assure those who had gathered to see the famous ship that there was nothing premeditated in this failure to stop, and that no slight of any kind was meant to your splendid city.

The facts are these: In making the schedule for the Woolaroc flight the difference between central standard time and mountain time at Clovis was not taken into consideration and consequently the tour left Clovis one hour behind schedule. In addition, difficulty was encountered with the oil line connections on the Woolaroc which delayed the plane another half hour, making the tour an hour and thirty minutes late.

Night flying with ships not equipped with night flying facilities is dangerous, therefore, it was deemed necessary for the tour to reach Amarillo before dark in order to prevent any possibility of danger to the famous ship and to Colonel Arthur Goebel, its pilot. Consequently, in the interest of safety, it was felt necessary to pass up the stop at Canyon.

We are extremely sorry that the necessities of the occasion caused this unfortunate set of circumstances and we pledge again that no discourtesy was meant to Canyon and its citizens in any way.

**GREAT SEASON
FOR BUFFALOES
IS PREDICTED**
**COACHES ARE WORKING FOR
GRID SUCCESS.**

Many Letter Men and Large Crop
of New Athletes Will Report
at Training Camp.

Football prospects at West Texas
State Teachers College are better
for the coming season than they
have been for some time. There
will be more men with first team
and squad experience than ever be-
fore, and there will be more good
men from high school this year
than ever before.

Coach Claude Reeds and athle-
tic director S. D. Burton are spend-
ing most of their time this sum-
mer in supervising the rebuilding
the athletic fields and in meet-
ing with the old men for confer-
ences, as well as getting acquainted
with new men who expect to en-
roll at Canyon for the first time
this fall. Nearly every day finds
two or more high school graduates
as visitors on the college campus.
Most of them will be here when
the training camp opens Septem-
ber 5th.

Old Men Back

Coach Reeds will have the fol-
lowing men report, who have had
either first, or second team expe-
rience at the college, besides the
host of new men: for centers there
will be two men who have seen
service on the first team and two
who have played Yearling football.
Bass, a product of Post high
school, lettered in '27, but early
season injuries placed him out of
the running last year. Thompson,
the diminutive center replaced Bass
in most of the games last season,
and although he weighs only 150
pounds, proved himself a great
battler. Reeves, Donnell and Bill
Redfeard, both of last year's
Yearling team are scrappers and
should make sufficient competition
for the other fellows. For guards,
the coaches will have Gillum.
Cooper and Sanders, all letter men
of last year. Captain Golden of
last year's team being the only
guard to be lost. Gillum and Coop-
er are both little men weighing
around 160, while Sanders weighs
185. Sanders will be playing his
last year, while both Cooper and
Gillum are sophomores.

At tackles there will be Logan,
Miller, and Layne. Logan has been
one of the outstanding line men of
the T. I. A. A. for the past two
years. Miller played some last
year but, because of an excessive
amount of school work could not
play all the time. He was a mem-
ber of the Clarendon College Bull-
dogs when that school turned out
the best team in its history. He
weighs about 200 pounds and is a
scrapper. Layne, a product of
Hereford high school and the wild
man of the Yearling squad last
year puts about 180 pounds of bone
and muscle into every play. He is
tall and rangy and always carries
the fight to the opponent.

At ends, Ward and Brown, both
regulars from last year, and Boyce
Bandy, who played at end and
tackle will be back. Ward is cap-
tain-elect and will be playing his
last year. He has been one of the
best ends in the conference for
three years and his fourth year
should be his greatest. Brown is
very small weighing only 135
pounds, but he never failed to
stop runs in his direction last year.
Bandy will probably see much ser-
vice this year. He is a husky bat-
tler.

Back Field

The backs to return are: Jones,
Gerald, Newman, and Barnett. All
with first team experience. H. R.
Harvel, of Hale Center, and Robert
Clark of Turkey, both were out
last fall and expect to make the
going hard for some of the boys.
Jones, has played at quarter and
half. He is a good ground gainer
and a fair field general. Pat Ger-
aid is one of the best broken field
runners ever to wear the Maroon
and White and few men of the
South are more adept at this part
of the game. Newman, a big 190
pound, twenty-year-old lad, is a
bear when it comes to carrying the
ball or blocking. Newman is es-
pecially good at plunging the line
or running off tackle plays. Bar-
rett, another star from Hereford,
saw service last season, and all his
actions were prophetic of a bril-
liant record in football.

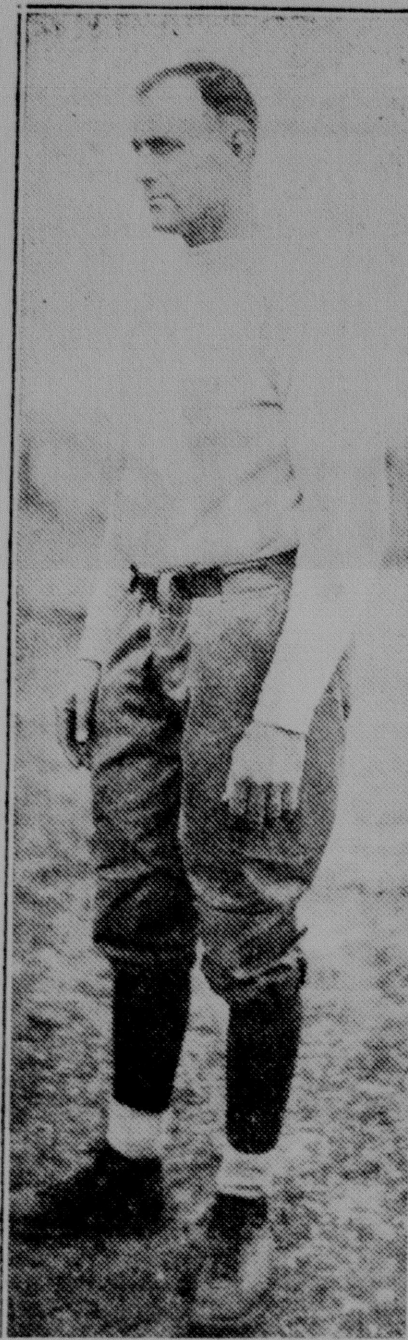

concerning books, methods, etc.
The teachers have observed two
hours per day in conference with
practice teachers and observers.

In the high school, 24 regular
practice teachers are working; 28
regular observers are enrolled; and
170 people have observed irregu-
larly or obtained information about
books, methods, etc. These teach-
ers, too, have averaged two hours
daily in conference with observers
and practice teachers.

The totals show 67 practice
teachers, 103 observers, and 372
people in the general information
group, a total of 542.

No matter what your troubles,
never do anything just for spite.

Buffalo Coach

CLAUDE REEDS

Coach Reeds, formerly assist-
ant coach at the University of
Oklahoma whom Buffalo fans
look to for one of the best
teams in the history of West
Texas State Teachers College.

Coach Reeds will meet his re-
cruits and letter men for train-
ing camp work early in Sep-
tember. He becomes head foot-
ball coach here Sept. 1, suc-
ceeding Mitchell Jones. Mr.
Reeds has been in Canyon for
more than a month, making
preparations for his work and
seeking material with the aid
of other members of the College
athletic committee.

LOCAL NEWS

R. A. Sherman and family of
Austin will arrive this week for a
visit with his sister, Mrs. B. B.
Cluck and family.

Mrs. Boyd and son, Ophie, and
Mrs. McCormick of Norman, Okla.,
have been visiting with Mrs. L. M.
Cousins and daughter, Lee Chris-
tine.

Mr. and Mrs. W. A. Pierce vis-
ited in Petersburg during the past
week with relatives.

Mr. and Mrs. W. B. Haile and
children, Nadine and Bynum of
Clarendon visited with J. B. Haile
Monday while on their way to
California.

Miss Roberta Hutchinson of
Tulsa is spending the week visiting
in the N. E. McIntire home.

Miss Margaret Good of Cana-
dian visited friends here over the
week-end.

Mrs. A. B. Hagan and daughter
returned this week to Pittsburg,
Kans., after spending several days
with her parents, Mr. and Mrs.
L. T. Lester.

Mrs. Walter Kuehn is visiting
friends and relatives in Lockney.

Mrs. O. M. Shore, Mrs. L. L.
Snyder and her two daughters,
and Mrs. E. R. Smith and daugh-
ters, all of Hereford, were guests
of Mr. and Mrs. J. T. Scrutins
Tuesday night.

Mr. and Mrs. J. H. Lisle left
Sunday for Kentucky to be gone
for about six weeks. Mr. Lisle
planned to visit his mother.

THE WORLD'S AUTOS

Interesting figures concerning
the distribution of motor vehicles
throughout the world are contain-
ed in the annual booklet just is-
sued by the National Automobile
Chamber of Commerce, which
shows among other things that
while China has only one automo-
bile for every 17,000 persons, the
United States has one for every
4.9 persons.

Outside of United States terri-
tory, Canada ranks highest in the
number of cars in proportion to
population, having one motor ve-
hicle for every 9 persons.

In respect to actual numbers the
United States registration repre-
sents 77 per cent of all the auto-
mobiles in the world, or 24,493,124.
The United Kingdom stands sec-
ond with 1,318,169, closely follo-
wed by France and Canada with
slightly over one million each.

Among the states, California has
more automobiles in proportion to
population than any other, with
one motor vehicle for every 2.3
persons. Georgia stands lowest,
with one for every 11.5 persons.

DREAD MALADY

Most people of middle age should
cure themselves of chronic Ameri-
canitis, which in plain words is
habitual hurry.

Some evangelists get paid hand-
somerly for bawling out their cus-
tomers.

**Demonstration School Gives Direct
Service to 542 College Students**

That 542 college students are being helped this summer by the Demonstration School to prepare themselves for the teaching profession is shown by figures com-
piled recently by members of the faculty. These people are practice teachers, observers, and persons who have observed irregularly or obtained information concerning books, methods, etc. In addition the librarian of the Training School estimates that 50 per cent of the morning library service for the summer has been

to college people and that practi-
cally all of the afternoon service
has been to college people. Thus
is evidenced more clearly than
ever the vital part the training
school plays in the work of a
Teachers College.

The figures gathered show that
in the primary and elementary
grades 43 regular practice teach-
ers are doing work, 75 regular ob-
servers are doing work, 100 dem-
onstration lessons have been given,
and 202 people have observed ir-
regularly or obtained information

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

The effort of some people to look pleasant are positively painful.

Run-Down

"About seven years ago, I was all run-down, worn-out and never felt good," says Mrs. Harry Cantrell, of Cape Girardeau, Mo. "A chair would be more welcome any time than my work."

"I was so tired when I would arise in the morning. Instead of being rested, I felt terrible."

"At last, mother told me to take Cardui, and I did. After the first bottle, I could tell a difference, and when I had taken five bottles the tired feeling was all gone. I felt like a different person, thanks to Cardui. I hope that other mothers will try Cardui. I have been wonderfully benefited by it."

Try Cardui in your case.

CARDUI
HELPS WOMEN TO HEALTH

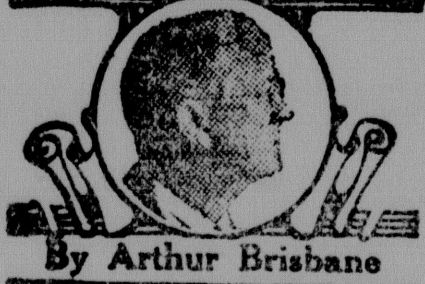

Take Theobald's BLACK DRAUGHT for Constipation, Indigestion, Bilelessness. Costs only 1 cent a dose.

BACK TO STOCKINGS AMERICAN PROSPERITY HOW MUCH FOR FARMERS? WITHOUT HOPE.

Manufacturers of silk and other stockings hope that advertising will enable them to drive out the "bare leg" craze, now afflicting lovely women.

Moralizing appeals to modest refinement won't do. Bare legs must be banished, as the almost universal habit of chewing tobacco was banished by public opinion.

Make women realize that an imitation of a butcher shop is not artistic and they will go back to stockings.

Calvin Coolidge, tanned, smiling, beaming with health, is enthusiastic about American prosperity. He well may be.

Money is made rapidly here. Three years ago an investing company was formed with \$6,500,000. Now it issues \$24,000,000 in six percent preferred stock, and shows profits of over \$40,000,000. Nevertheless DON'T GAMBLE.

That advice is probably useless. The public agrees with the distinguished Mr. B. Baer, who says: "If we cannot get our faces on Government money, the next best thing is to get your hands on it." Too many believe that gambling is the best way to get your hands on it.

Farmers are told that the value of this year's wheat crop has increased \$364,000,000 since June 1. How much of that the farmers will get, how much middlemen and especially wheat gamblers, will get nobody knows.

Farmers must hire an intelligent wheat speculator to sell their crops for future delivery when prices are high. As it is they wait until the wheat is threshed. Then the price is lower.

Present estimates show that the four big crops, wheat, corn, oats, and rye, are worth \$3,545,000,000, an increase of more than a thousand million dollars in two months.

A savage outbreak of convicts in New York's Clinton Prison is easily explained.

Too many "life" and "long term" prisoners were herded together. Such men are willing to risk death because they are hopeless.

Lacking hope and its courage, you have a bad situation. Goethe said "Money lost, SOMETHING lost."

"Honor lost, MUCH lost."
"Courage lost, EVERYTHING lost, better you were never born."

Most Interesting Texas Men Voted on

Five public office holders, two Baptist clergymen, two journalists, two capitalists, and a college president were the 12 "most interesting" Texas men, according to a recent survey.

In answer to questionnaires sent out to all part of the state, the following (in alphabetical order) had the most votes:

Dr. Samuel P. Brooks, president of Baylor University.

Tom Connally, U. S. senator, Marlin.

James E. Ferguson, former governor, Temple.

Marcellus E. Foster (Mefo), editor of the Press, Houston.

Cone Johnson, state highway commissioner, Tyler.

Jesse H. Jones, capitalist, Houston.

John H. Kirby, capitalist, Houston.

Thomas B. Love, state senator, Dallas.

Dan Moody, governor, Austin.

Dr. J. Frank Norris, minister.

It's Certainly Been a Blessing

"Orgatone Has Relieved Me of Nervousness and Has Made a New Woman of Me," Says Amarillo Housewife.

"Since Orgatone relieved me of my nervousness I just can't help praising it to everybody," said Mrs. A. W. Amick of 1018 Buchanan St., Amarillo, Texas.

"For over six months," she continued, "I suffered from extreme nervousness and loss of appetite. At nights I was unable to get any sound sleep or rest on account of my nerves. My appetite kept falling off until I finally got so I hardly eat anything at all."

"My first dose of Orgatone seemed to hit the spot and I have been getting better ever since. I can eat with a relish and have no trouble with gas, my stomach is toned up and I feel better in every way than I have in a long time."

Orgatone has relieved my nervous trouble and at night I can sleep as sound as a dollar and my general health has improved since I began taking Orgatone to the extent that I hardly feel like the same person. Orgatone has certainly been a blessing to me and there is no better Orgatone in this town than I am."

Genuine Orgatone is manufactured by the world's largest laboratories and is not a so-called secret or patent remedy but a new scientific treatment and is sold in Canyon by the Jarrett Drug Co.

Fort Worth.

Joe J. Taylor, State Press, Dallas News, Dallas.

Dr. George W. Truett, minister, Dallas.

The high moral ground occupied by the hypocrite is a bluff.

Librarians Check Out 18,944 Books To 1414 Students

Believe it or not. Some students come to college to get an education. 1414 students patiently or impatiently waited until they could find a seat in the library last month. The 118 chairs had to do over time duty in order to accommodate the rush of students that fill the library throughout the day. These 1414 students managed to use 18,944 books in 25 days. Of these 25 days, four were Mondays and the library is only open a half day on that day.

The reserve book room checked out 14,241 books. This is more than twice the circulation for any month during the past regular session. The last two weeks of the month was 8,288 to 5953 for the first two weeks circulation. This is significant in that it shows that the W. T. students neither cram at the end of the quarter, nor do they put off studying until the quarter is well under way.

July 23 was the big day in the Main Library. On this day there were 225 books checked out. The big day for the reserve room was on July 27 when 758 books were issued during the day and for over night.

EX-STUDENT RECEIVES M. A. FROM CORNELL

Helen White Moore, a niece of Miss Mary Morgan Brown, who was in school here in the 1923-24 session, recently received the Master of Arts degree from Cornell University at Ithaca, New York. Miss Moore did her undergraduate work at Judson College in Alabama.

Help Keep Canyon Clean.

NOTICE OF SALE
STATE OF TEXAS,
County of Randall.
In the 108th District Court of Potter County, Texas.
John E. Toles, Plaintiff, vs. G. W. Roach, et al. Defendants.
No. 7287.

Whereas, by virtue of an order of sale issued out of the 108th District Court of Potter County, Texas, on a judgment rendered in said Court on the 28th day of June, A. D. 1929, in favor of the said John E. Toles, plaintiff, and against the said G. W. Roach, and also against the other defendants, O. W. Gano, E. H. Henderson, and A. G. Hinn, foreclosing a lien against the land hereinafter described, No. 7287 on the docket of said court, I did, on the 24th day of June, A. D. 1929, at 10 o'clock a. m. levy upon the following described tracts and parcels of land situated in the County of Randall, State of Texas, and belonging to the said G. W. Roach, to-wit:

All of section No. Thirty-nine (39), all of the Southwest one-fourth (SW 1/4), and all of the South half (S 1/2) of the Southeast one-fourth (SE 1/4) of Section No. Forty (40), all in Block M-6, S K & K Survey, Randall County, Texas, save and except two acres out of said land heretofore conveyed for school purposes, and being all of the land described in that certain deed from I. P. SoRelle and wife, Clara SoRelle, as grantors in favor of G. W. Roach as grantee, recorded in Volume 54, page 117, Deed Records of Randall County, Texas, to which reference is here made for a particular description of such land;

and on the 3rd day of September, A. D. 1929, being the first Tuesday of said month, between the hours of 10 o'clock a. m. and 4 o'clock p. m. on said day, at the court house door of said county, I will offer for sale and sell at public auction for cash, all the right, title and interest of the said G. W. Roach, O. W. Gano, E. H. Henderson and A. G. Hinn, in and to said property.

Dated at Canyon, Texas, this 24th day of July, A. D. 1929.
JOHN FRY, Sheriff.

A NEW SYMBOL OF A GREATER SERVICE

CONOCO

Two old established oil companies join forces better to serve their millions of customers

A STATEMENT

The consolidation of the Marland Companies and the Continental Oil Company has combined the producing, refining and marketing facilities of these widely known manufacturers and distributors of petroleum products.

The high standards of manufacture which have established and maintained the reputation of the high quality products heretofore sold under the Conoco and Red Triangle brands will be strictly maintained.

The same chemists and engineers, the same refineries and, above all, the same policies, will support the new trade mark "A new symbol of a greater service."

It May Be Urgent

When your Children Cry for It

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. If restless, a few drops soon bring contentment. No harm done, for Castoria is a baby remedy, meant for babies. Perfectly safe to give the youngest infant; you have the doctors' word for that! It is a vegetable product and you could use it every day. But it's in an emergency that Castoria means most. Some night when constipation must be relieved—or colic pains—or other suffering. Never be without it; some mothers keep an extra bottle, unopened, to make sure there will always be Castoria in the house. It is effective for older children, too; read the book that comes with it.

Fletcher's CASTORIA

The effort of some people to look pleasant are positively painful.

Run-Down

"About seven years ago, I was all run-down, worn-out and never felt good," says Mrs. Harry Cantrell, of Cape Girardeau, Mo. "A chair would be more welcome any time than my work."

"I was so tired when I would arise in the morning. Instead of being rested, I felt terrible."

"At last, mother told me to take Cardui, and I did. After the first bottle, I could tell a difference, and when I had taken five bottles the tired feeling was all gone. I felt like a different person, thanks to Cardui. I hope that other mothers will try Cardui. I have been wonderfully benefited by it."

Try Cardui in your case.

CARDUI

HELPS WOMEN TO HEALTH

BACK TO STOCKINGS AMERICAN PROSPERITY HOW MUCH FOR FARMERS? WITHOUT HOPE.

Manufacturers of silk and other stockings hope that advertising will enable them to drive out the "bare leg" craze, now afflicting lovely women.

Moralizing appeals to modest refinement won't do. Bare legs must be banished, as the almost universal habit of chewing tobacco was banished by public opinion.

Make women realize that an imitation of a butcher shop is not artistic and they will go back to stockings.

Calvin Coolidge, tanned, smiling, beaming with health, is enthusiastic about American prosperity. He well may be.

Money is made rapidly here. Three years ago an investing company was formed with \$5,500,000. Now it issues \$24,000,000 in six per cent preferred stock, and shows profits of over \$40,000,000. Nevertheless DON'T GAMBLE.

That advice is probably useless. The public agrees with the distinguished Mr. B. Baer, who says: "If we cannot get our faces on Government money, the next best thing is to get your hands on it." Too many believe that gambling is the best way to get your hands on it.

Farmers are told that the value of this year's wheat crop has increased \$364,000,000 since June 1. How much of that the farmers will get, how much middlemen and especially wheat gamblers, will get nobody knows.

Farmers must hire an intelligent wheat speculator to sell their crops for future delivery when prices are high. As it is they wait until the wheat is threshed. Then the price is lower.

Present estimates show that the four big crops, wheat, corn, oats, and rye, are worth \$3,545,000,000, an increase of more than a thousand million dollars in two months.

A savage outbreak of convicts in New York's Clinton Prison is easily explained.

Too many "life" and "long term" prisoners were herded together. Such men are willing to risk death because they are hopeless.

Lacking hope and its courage, you have a bad situation. Goethe said "Money lost, SOMETHING lost."

"Honor lost, MUCH lost."
"Courage lost, EVERYTHING lost, better you were never born."

Most Interesting Texas Men Voted on

Five public office holders, two Baptist clergymen, two journalists, two capitalists, and a college president were the 12 "most interesting" Texas men, according to a recent survey.

In answer to questionnaires sent out to all part of the state, the following (in alphabetical order) had the most votes:

Dr. Samuel P. Brooks, president of Baylor University.

Tom Connally, U. S. senator, Marlin.

James E. Ferguson, former governor, Temple.

Marcellus E. Foster (Mefo), editor of the Press, Houston.

Cone Johnson, state highway commissioner, Tyler.

Jesse H. Jones, capitalist, Houston.

John H. Kirby, capitalist, Houston.

Thomas B. Love, state senator, Dallas.

Dan Moody, governor, Austin.

Dr. J. Frank Norris, minister,

It's Certainly Been a Blessing"

"Orgatone Has Relieved Me of Nervousness and Has Made a New Woman of Me," Says Amarillo Housewife.

"Since Orgatone relieved me of my nervousness I just can't help praising it to everybody," said Mrs. A. W. Amick of 1018 Buchanan St., Amarillo, Texas.

"For over six months," she continued, "I suffered from extreme nervousness and loss of appetite. At nights I was unable to get any sound sleep or rest on account of my nerves. My appetite kept falling off until I finally got so I hardly eat anything at all."

"My first dose of Orgatone seemed to hit the spot and I have been getting better ever since. I can eat with a relish and have no trouble with gas, my stomach is toned up and I feel better in every way than I have in a long time. Orgatone has relieved my nervous trouble and at night I can sleep as sound as a dollar and my general health has improved since I began taking Orgatone to the extent that I hardly feel like the same person. Orgatone has certainly been a blessing to me and there is no better Orgatone in this town than I am."

Genuine Orgatone is manufactured by the world's largest laboratories and is not a so-called secret or patent remedy but a new scientific treatment and is sold in Canyon by the Jarrett Drug Co.

Fort Worth.

Joe J. Taylor, State Press, Dallas News, Dallas.

Dr. George W. Truett, minister, Dallas.

The high moral ground occupied by the hypocrite is a bluff.

Librarians Check Out 18,944 Books To 1414 Students

Believe it or not. Some students come to college to get an education. 1414 students patiently or impatiently waited until they could find a seat in the library last month. The 118 chairs had to do over time duty in order to accommodate the rush of students that fill the library throughout the day. These 1414 students managed to use 18,944 books in 25 days. Of these 25 days, four were Mondays and the library is only open a half day on that day.

The reserve book room checked out 14,241 books. This is more than twice the circulation for any month during the past regular session. The last two weeks of the month was 8,283 to 5953 for the first two weeks circulation. This is significant in that it shows that the W. T. students neither cram at the end of the quarter, nor do they put off studying until the quarter is well under way.

July 23 was the big day in the Main Library. On this day there were 225 books checked out. The big day for the reserve room was on July 27 when 758 books were issued during the day and for over night.

MAKING GOOD

the Regrettable Default of the Woolaroc!

The Miller-Lybrand Company, Inc., authorized Ford dealer, has secured a monster 14-passenger all-metal Ford Tri-Motored Monoplane for an all day visit to Canyon next Saturday, August 10.

Chagrined and humiliated by the failure of the Woolaroc to arrive here after it had been scheduled correctly and honestly advertised in good faith, the company has determined to make next Saturday the biggest aviation event in Canyon's history.

GIANT TRI-MOTORED FORD MONOPLANE

*Here All
Day
Saturday*

*Here All

Saturday*

*The Ship Will Circle Over Canyon at 9:30 A. M. Saturday Immediately
Before Landing One Mile East of Town*

TO AVOID POSSIBILITY OF ERROR, James M. Lybrand, Jr., manager of the company, Clyde W. Warwick, publisher of the Canyon News and Walter S. Black of the First State Bank will board the plane at Clayton, N. M. early Saturday morning for the trip to Canyon.

SEE THE AIRPLANE RACE WITH THE FAST NEW FORD

AT 4:30 P. M. SATURDAY, THE BIG PLANE, WITH A GROUND SPEED OF 65 MILES AN HOUR WILL RACE WITH A STOCK MODEL FORD, JUST BY WAY OF ADDING EXCITEMENT TO THE DAY.

FREE RIDES!

WITH EACH ORDER FOR A NEW OR USED FORD CAR, ANY TYPE, PLACED WITH US, WE WILL GIVE ONE TICKET FOR A FREE RIDE IN THIS MONSTER PLANE. THIS OFFER IS GOOD FOR FUTURE ORDERS ONLY. BUY YOUR FORD TODAY AND GET A THRILLING RIDE IN ITS BIG BROTHER, THE FORD ALL-METAL MONOPLANE.

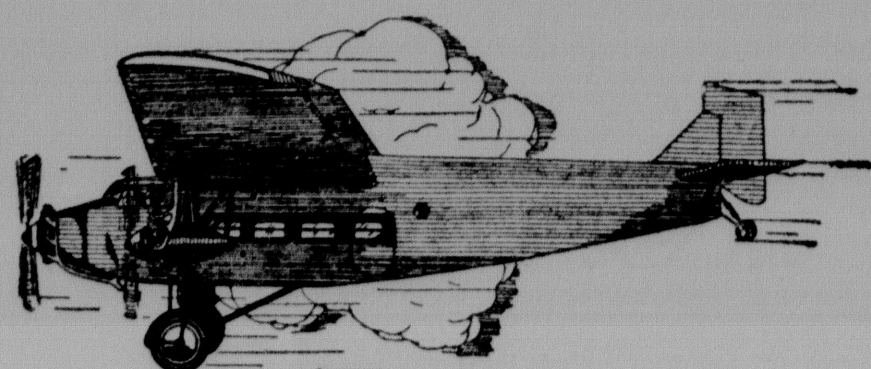

PASSENGER CARRYING

AS AN ADDITIONAL OPPORTUNITY, THE COMPANY HAS PREVAILED ON THE PILOTS TO REMAIN HERE ALL DAY SATURDAY TAKING UP PASSENGERS AT THE NOMINAL CHARGE OF \$3 EACH FOR A FIFTEEN MILE RIDE. It costs \$125 an hour to fly this big plane and you get your ride almost at cost. Children under 14 years of age will be carried for \$2.50. Pilots carry transport licenses issued by the United States Government and are men of many years experience in aviation.

Fitzhugh Lee's Hand-to-Hand Fight With Indian

By AUSTIN CAILAN

(Copyright, 1923, by the Home Color Print Co.)

IN those years immediately preceding the Civil War, Camp Colorado, in Coleman county, was the most fascinating military post on the Texas frontier. Among the men who were stationed there from time to time were E. Kirby Smith, Earl Van Dorn, Fitzhugh Lee and John B. Hood. All of these became famous in that fratricidal contest of the 'sixties.

Camp Colorado is situated on the banks of Jim Ned creek in a section that was once the best game country in America. Back in the 'fifties it was the gateway to the land of the Indian, the buffalo, and the deer. Society center of a vast territory, the post was frequented by knightly riders of the range in those good days when chivalry was in flower.

Robert E. Lee sometimes visited Camp Colorado and frontier belles had an opportunity to dance the Virginia Reel with that greatest captain of any age or any land. In certain of the pioneer homes entertainments were given, where culture, grace and beauty shone in all its refinement and splendor.

It was at this post that General Hood, dauntless commander of Texas troops in many hard fought battles, received his first command. A great "blowout" was given in his honor at the home of John Sheen, one of the pioneers, on the occasion of Hood's promotion, which was attended by brother officers and society folks of the entire settlement.

Trails That Were Dangerous

But "tripping the light fantastic toe" was by no means the only thing of interest in that section. The country was infested with hostile Indians, and army men were often required to take a dangerous trail through wild, uninhabited regions, for the purpose of avenging the murder of a white settler or recover stock stolen by Indians.

These trails lead southward into the

Brady Mountains, northward by Caddo Peak, and westward through Buffalo Gap. There were Indian rendezvous in each of these directions from which Indians could reach the Jim Ned settlement at the end of a one or two days' ride. As a consequence, raids were frequent and it was common occurrence for a citizen to be aroused from his slumber in the middle of the night by an effort on the part of sneaking red devils to break the lock to his stable door and steal his horses. It was necessary to keep animals closely guarded to protect them from these raids.

One of the most serviceable of all the frontier protectors stationed at Camp Colorado, in that historic past, was Fitzhugh Lee, the great Virginian who was in charge of our affairs at Havana, Cuba, in 1898 when we engaged Spain in war. He was a young military graduate at Camp Colorado, handsome, athletic and of fine figure. Those who knew him say he was a true type of that splendid Southern manhood which graced the Old Dominion State back in the early days of our Republic.

Swift and Telling Blows

Lee struck some swift and telling blows at the savage raiders, and was regarded by them as a foe who had brought depletion to their ranks and made it difficult for them to steal stock or commit murder around Camp Colo-

rado. There was nothing that would have pleased one of the savages more than a chance to put him out of the way. However, they never risked an open fight on the range.

Lee was relentless in pursuing and punishing them, and his men gave the government soldiers a reputation for bravery and effective fighting, which, through indifference, they failed to sustain in after years.

"He wheeled around just in time to see a powerful Indian buck advancing upon him with knife in hand."

Friends often warned Lee of the danger which attended his movements around the little military post after nightfall. But he went wherever he chose without fear or bodyguard.

On one occasion this indifference to the perils with which he was surrounded almost cost him his life. He often sought solitude and would retire to some quiet spot on the banks of Jim Ned

creek, or in the nearby woods, to commune with nature. He was called a "star-gazer" because he loved to trace the course of the planets on a clear night or to read alone from the mysterious pages of an open sky.

Attempted Assassination

A certain springtime evening he was out several hundred yards from his quarters engaged in a study which rendered him practically oblivious to everything. Suddenly there was a rustle in the brush behind him, indicating that someone or something was approaching, and he wheeled around just in time to see a powerful Indian buck advancing upon him with a deadly knife in his hand.

The general had side arms, of course, and had been trained in their use. But the savage was so close upon him that it was too late to successfully draw either his pistol or his sword.

Under such circumstances many men would have attempted a hasty retreat. The sudden surprise like that of a savage with murderous intent and blade flashing would have been enough to disconcert the most courageous.

Fitzhugh Lee faced the situation calmly and his mind worked in lightning

tripped his assailant, sending him headlong to the ground.

The Indian dropped the knife as he fell but made a desperate effort to recover it. Then the two clinched and a contest was on for life or death with the brute strength of the plains on one side and the skill of a less-powerfully muscled but better trained man on the other. Over and over they rolled, each grappling for a cinch hold on the other—each struggling with might and main to become master of the situation. Lee was at a disadvantage in the tussle because his sword and uniform were in the way, while the savage was practically naked, but Lee knew that if his antagonist got hold of the knife it meant death to him; therefore he exerted all his strength and skill to possess the weapon.

White Man's Skill Wins

Only a short distance away the lights of the post were gleaming. A window of his own quarters disclosed the presence of men who, had they only known what was going on, would have rushed out there and settled it quickly. But there was no way to communicate with them, and they might just as well have been in some foreign land.

How long the encounter lasted is not definitely known. Sometimes Lee and sometimes the Indian was on top. But either the better management of Lee, or fate itself, made it possible for him to reach out and take hold of the coveted knife. He held to its handle with a firm grip, and despite the fact that the powerful Indian had him by the wrist, he was able, through super-human effort, to slowly sink the keen blade into the breast of the savage.

Gen. Lee was always reluctant to discuss this personal encounter, but later in life he was once heard to remark that at no time in all his military career did he face death as nearly as when he battled with the lone Indian who attempted to assassinate him on the banks of Jim Ned creek.

CARLSBAD CAVERN, a Scenic Wonder

By DeWITT REDDICK

(Copyright, 1923, by the Home Color Print Co.)

CARLSBAD CAVERN, one of the most recently developed scenic wonders of the United States, is about 30 miles from the Texas border, in southeast New Mexico. Last year, according to government records, 30,000 persons from Texas visited the cave. Almost as great a number of tourists from other States also visited it during 1923. The favorite route of Texans who annually visit the cavern is by way of Van Horn, a small station on the Texas & Pacific Railway, in Culberson county. Van Horn is on the Bankhead highway, extending east and west through Texas, from Texarkana to El Paso.

Carlsbad Cave is the biggest hole yet discovered underneath the ground. All of the chambers and their many ramifications have not been explored. At present the cave has been explored for a distance of about 21 miles. Jim White, a cowboy, who rode the range for 28 years, gets credit for discovering the cave, and for many years White was the only guide who conducted tourists through the winding underground passages. He is now employed by the government as head guide. The entrance to the cave and an area of two square miles around it was declared a national monument on October 25, 1923, by President Coolidge. The government has also set aside 129 square miles more in the Carlsbad Cavern district for inspection with the view of making it a national park in conjunction with the cavern.

White's Slender Rope and Bucket

A long flight of wooden steps, 216 feet from the surface, lead down to the first level of the cave. Before these wooden steps were built and before the government took over the cave Jim White used to let down tourists to the first level in a wooden bucket attached to a slender rope. Back in the early days of exploration only the venturesome and stout-hearted would descend into the cave's black depths via White's slender rope and bucket.

At the first level, across a jumble of rocks, the electric lights reveal a bat cave where 3,000,000 or more bats make their home. But this bat cave is not open to tourists, so the tiny creatures still cling to its walls in undisturbed slumber.

Carlsbad Cavern is not just one big cave but a series of caves, large and small, with narrow openings as a rule leading from one cave to another. About seven miles of the cavern is open to tourists, the seven miles having well beaten paths illuminated by electric lights. All around are great stone walls, high and low, enclosing queer formations of stalagmites and stalactites. Some of these take on grotesque forms

that somewhat resemble humans as well as animals. Across a wide chasm topping a great cliff is a stalagmite that closely resembles a baby hippopotamus, stretched in frozen solidity upon a frosted rock. Interspersed are shafts of onyx and marble limestone formations that show forth in sublime grandeur. Here is one of nature's greatest art galleries.

The Giant Dome

In bold relief is a giant dome, enormous pillar of white, stretching upward toward the vaulted roof, said to be the largest known stalagmite in the world. It is 62 feet high and 16 feet in diameter. The guide tells that this formation, like many others, has been built at the rate of about an inch each hundred years. Scientists have estimated the age of the giant dome to be 60,000,000 years.

On and on we go through a wonderland of beauty and art. We are far underground now; have come down another flight of 84 steps and another of 124 steps and have walked down a number of inclines.

We are now in the Big Room, the guide tells us. It is the largest room in the world, being 4,000 feet long and 623 feet wide. In places the ceiling of the Big Room is 300 feet high. When you stop to realize that in the center of that room you are standing 750 feet, almost a quarter of a mile underground, and that you are three miles from the entrance of Carlsbad Cavern, you begin to realize somewhat the stupendousness of this marvelous work of nature.

"Rock of Ages"

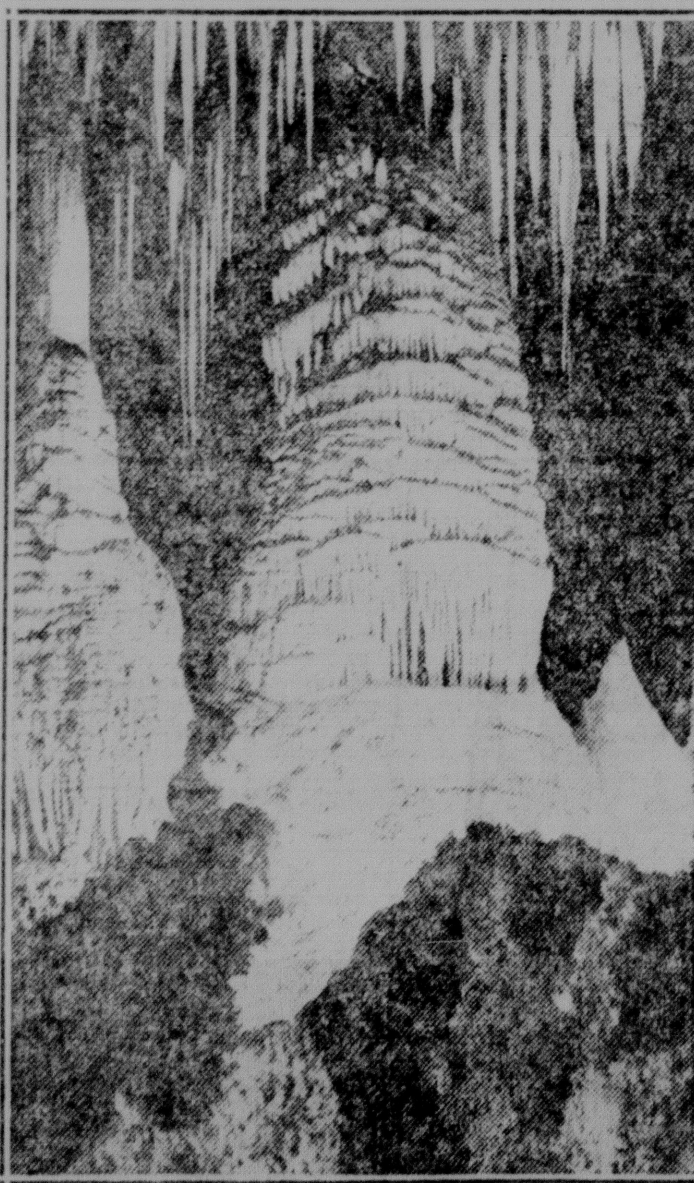

But the climax of the trip comes at the foot of the Rock of Ages. We have circled the Big Room on a path named the "Texas Trail;" we have seen the Bottomless Pit, where the floor of the Big Room drops down into eternal darkness and where the distance to the bottom is as yet unknown; we have looked over the railing at the Jumping Off Place and have been told by the guide that 150 feet down that hole we would find ourselves in another cave that underlies the upper cave and about six miles of which has already been explored; we have walked a path that threaded its way through a valley of lily-shaped rock formations and needle-shaped stalagmites; we have climbed a slight incline and are resting at the foot of the Rock of Ages.

The Rock of Ages is a great stalagmite, built in a series of terraces. It is not smooth and rounded as is the Giant Dome but is formed by a series of columns that run vertically from one terrace to another so that it reminds you

somewhat forcibly of pictures you have seen of the Tower of Pisa.

As we sit there looking back over a valley of strange formations that sink behind ridges of jagged domes the thought recurs to us: "Is this real, or is it a dream?"

The guide now takes off his hat and starts speaking. "Sometimes," he says, "when a group of tourists sit here to rest and look out over yonder" (he points across the underground valley) "and view that masterpiece of creation" (he points to the Rock of Ages) "they like to sing that old familiar gospel song, 'The Rock of Ages.' Is there any-

"The Rock of Ages," a giant stalagmite in Carlsbad Cavern. Scientists estimate this stalagmite to be millions of years old. (Copyright C. L. S., Photo by Leck Studio.)

one here who would like to lead us in the song?"

Song Swells in Volume

There is a long silence. Then a gray-haired little woman begins to sing: "Rock of Ages, cleft for me—." The song swells in volume as others begin to sing. Two or three of the younger men laugh when the guide mentions singing, but their laughter soon subsides into respectful silence. A gray-bearded farmer from Texas removes his hat. One by one the other men remove their hats.

"Rock of Ages—"

The second verse is more impressive than the first, everyone singing, men with hats off, guides standing at attention. The strangeness of it all was the homage to God in a great subterranean cave, far from any church or pulpit.

The song is ended. There are two or three minutes of silence, when no one speaks and no one moves. Then the guide announces that all of the lights are to be turned off for a minute or two; we are in the midst of impenetrable darkness—so black and oppressive that it makes the timid shudder. At last far down the immense dark labyrinths of this part of the cave comes the flash of a light as a section is partly illuminated. Another flash follows, as one by one the lights come on, closer and closer, until they flood the Big Room again. Flashing of lights bring out all the delicate hues of the myriad of formations. It is a sight we shall never forget.

Seven Miles of Exploration

Seven miles of walking underground and then we were ready to come out of Carlsbad Cavern. We entered at 10:30 in the morning. Lunch was served in a central cave. We were given several periods of rest so that the trip would not be too tiresome. It was 4 o'clock in the afternoon when we came to the surface.

The lighting effects within the cavern are most impressive. All of the incandescent lights are hidden from the visitor, secreted in little corners and alcoves; they shoot their rays out to light up the most important objects in the rooms and tunnels like footlights on a stage. During the past five years \$25,000 has been spent on this lighting system by the government.

The freshness and the coolness of the air within the cavern is a surprise to all tourists. The air is never stuffy and the average temperature is 56 degrees. Air currents are in constant circulation. The presence of these currents has led surveyors and geologists to believe that there is another entrance to the cavern not yet discovered.

Carlsbad Cavern is many times larger than the Mammoth Cave of Kentucky. In fact, Kentucky's cave is a mere pigmy in comparison, for just 21 miles of Carlsbad Cave have been explored, while many more miles remain unexplored. It must be seen to be appreciated. Mere words cannot fitly describe its bigness, its geologic structure and its cosmic beauty.

A REAL FOOL—He that trusteth in his own health is a fool. Prov. 28:26.

TEXAS' SOURCES OF REVENUE

Texas' principal sources of revenue are: the inheritance tax, the franchise tax, the ad valorem tax, the occupation tax, the gross receipts tax, the poll tax, the gas tax, the auto tax and federal aid. Last year the various sources mentioned yielded revenue as follows:

Inheritance tax, \$978,997.
Franchise tax, \$2,012,866.
Advalorem tax, \$23,822,261.
Occupation tax, \$306,667.
Gross receipts tax, \$8,336,278.
Poll tax, \$1,737,616.
Gas tax, \$19,214,015.
Auto tax, \$14,559,511.
U. S. aid, \$4,277,455.
Miscellaneous sources, \$14,571,515.

The inheritance tax and the franchise tax go into the general revenue fund.

About half of the ad valorem tax goes into the available school fund, the other half into the general revenue and pension funds.

About three-fourths of the gross receipts tax goes into the general revenue fund, and about one-fourth into the available school fund.

The available school fund receives about three-fourths of the poll tax collections, and the general revenue fund about one-fourth.

Of the gas tax one-fourth goes into the available school fund and about three-fourths into the highway fund.

All of the auto tax and all of the U. S. aid go into the highway fund.

MORE CITIES FOR TEXAS

Texas is not only experiencing a rapid growth of population, but is constantly adding to the number of her cities. The next census is expected to show that in the ten years from 1920 to 1930 the State has nearly doubled the number of her cities of over 10,000 population. The census of 1920 gave Texas only 29 cities of population exceeding 10,000, but it is confidently predicted by students of population that the census of 1930 will show more than 50 cities of a population exceeding 10,000. Four of the cities are expected to go above the 200,000 mark.

CLARKSVILLE TO GET NATURAL GAS.

Clarksville is happy over obtaining a contract for natural gas, a deal for which was recently closed between the Chamber of Commerce and the Community Gas Company.

The gas company will extend its lines from Paris, which at present is the eastern terminus of the line. The company will begin business in Clarksville with over 500 patrons. The work of laying the mains is expected to be under way soon. Detroit, Bagwell and Blossom, towns between Paris and Clarksville, will also be served by the gas company.

Fitzhugh Lee's Hand-to-Hand Fight With Indian

By AUSTIN CALLAN

(Copyright, 1925, by the Home Color Print Co.)

N those years immediately preceding the Civil War, Camp Colorado, in Coleman county, was the most fascinating military post on the Texas frontier. Among the men who were stationed there from time to time were E. Kirby Smith, Earl Van Dorn, Fitzhugh Lee and John B. Hood. All of these became famous in that fratricidal contest of the 'sixties.

Camp Colorado is situated on the banks of Jim Ned creek in a section that was once the best game country in America. Back in the 'fifties it was the gateway to the land of the Indian, the buffalo, and the deer. Society center of a vast territory, the post was frequented by knightly riders of the range in those good days when chivalry was in flower.

Robert E. Lee sometimes visited Camp Colorado and frontier belles had an opportunity to dance the Virginia Reel with that greatest captain of any age or any land. In certain of the pioneer homes entertainments were given, where culture, grace and beauty shone in all its refinement and splendor.

It was at this post that General Hood, dauntless commander of Texas troops in many hard fought battles, received his first command. A great "blowout" was given in his honor at the home of John Sheen, one of the pioneers, on the occasion of Hood's promotion, which was attended by brother officers and society folks of the entire settlement.

Trails That Were Dangerous

But "tripping the light fantastic toe" was by no means the only thing of interest in that section. The country was infested with hostile Indians, and army men were often required to take a dangerous trail through wild, uninhabited regions, for the purpose of avenging the murder of a white settler or recover stock stolen by Indians.

These trails lead southward into the

Brady Mountains, northward by Caddo Peak, and westward through Buffalo Gap. There were Indian rendezvous in each of these directions from which Indians could reach the Jim Ned settlement at the end of a one or two days' ride. As a consequence, raids were frequent and it was common occurrence for a citizen to be aroused from his slumber in the middle of the night by an effort on the part of sneaking red devils to break the lock to his stable door and steal his horses. It was necessary to keep animals closely guarded to protect them from these raids.

One of the most serviceable of all the frontier protectors stationed at Camp Colorado, in that historic past, was Fitzhugh Lee, the great Virginian who was in charge of our affairs at Havana, Cuba, in 1898 when we engaged Spain in war. He was a young military graduate at Camp Colorado, handsome, athletic and of fine figure. Those who knew him say he was a true type of that splendid Southern manhood which graced the Old Dominion State back in the early days of our Republic.

Swift and Telling Blows

Lee struck some swift and telling blows at the savage raiders, and was regarded by them as a foe who had brought depletion to their ranks and made it difficult for them to steal stock or commit murder around Camp Colo-

rado. There was nothing that would have pleased one of the savages more than a chance to put him out of the way. However, they never risked an open fight on the range.

Lee was relentless in pursuing and punishing them, and his men gave the government soldiers a reputation for bravery and effective fighting, which, through indifference, they failed to sustain in after years.

"He wheeled around just in time to see a powerful Indian buck advancing upon him with knife in hand."

Friends often warned Lee of the danger which attended his movements around the little military post after nightfall. But he went wherever he chose without fear or bodyguard.

On one occasion this indifference to the perils with which he was surrounded almost cost him his life. He often sought solitude and would retire to some quiet spot on the banks of Jim Ned

creek, or in the nearby woods, to commune with nature. He was called a "star-gazer" because he loved to trace the course of the planets on a clear night or to read alone from the mysterious pages of an open sky.

Attempted Assassination

A certain springtime evening he was out several hundred yards from his quarters engaged in a study which

rendered him practically oblivious to everything. Suddenly there was a rustle in the brush behind him, indicating that someone or something was approaching, and he wheeled around just in time to see a powerful Indian buck advancing upon him with a deadly knife in his hand.

The general had side arms, of course, and had been trained in their use. But the savage was so close upon him that it was too late to successfully draw either his pistol or his sword.

Under such circumstances many men would have attempted a hasty retreat. The sudden surprise like that of a savage with murderous intent and blade flashing would have been enough to disconcert the most courageous.

Fitzhugh Lee faced the situation calmly and his mind worked in lightning rapidity as he recalled a trick which he had learned in youth upon the old playground back at home. Quicker than words can tell, he sprang to one side and

tripped his assailant, sending him headlong to the ground.

The Indian dropped the knife as he fell but made a desperate effort to recover it. Then the two clinched and a contest was on for life or death with the brute strength of the plains on one side and the skill of a less-powerfully muscled but better trained man on the other. Over and over they rolled, each grappling for a cinch hold on the other—each struggling with might and main to become master of the situation. Lee was at a disadvantage in the tussle because his sword and uniform were in the way, while the savage was practically naked, but Lee knew that if his antagonist got hold of the knife it meant death to him; therefore he exerted all his strength and skill to possess the weapon.

White Man's Skill Wins

Only a short distance away the lights of the post were gleaming. A window of his own quarters disclosed the presence of men who, had they only known what was going on, would have rushed out there and settled it quickly. But there was no way to communicate with them, and they might just as well have been in some foreign land.

How long the encounter lasted is not definitely known. Sometimes Lee and sometimes the Indian was on top. But either the better management of Lee, or fate itself, made it possible for him to reach out and take hold of the coveted knife. He held to its handle with a firm grip, and despite the fact that the powerful Indian had him by the wrist, he was able, through super-human effort, to slowly sink the keen blade into the breast of the savage.

Gen. Lee was always reluctant to discuss this personal encounter, but later in life he was once heard to remark that at no time in all his military career did he face death as nearly as when he battled with the lone Indian who attempted to assassinate him on the banks of Jim Ned creek.

CARLSBAD CAVERN, a Scenic Wonder

By DeWITT REDDICK

(Copyright, 1925, by the Home Color Print Co.)

CARLSBAD CAVERN, one of the most recently developed scenic wonders of the United States, is about 30 miles from the Texas border, in southeast New Mexico. Last year, according to government records, 30,000 persons from Texas visited the cave. Almost as great a number of tourists from other States also visited it during 1928. The favorite route of Texans who annually visit the cavern is by way of Van Horn, a small station on the Texas & Pacific Railway, in Culberson county. Van Horn is on the Bankhead highway, extending east and west through Texas, from Texarkana to El Paso.

Carlsbad Cave is the biggest hole yet discovered underneath the ground. All of the chambers and their many ramifications have not been explored. At present the cave has been explored for a distance of about 21 miles. Jim White, a cowboy, who rode the range for 28 years, gets credit for discovering the cave, and for many years White was the only guide who conducted tourists through the winding underground passages. He is now employed by the government as head guide. The entrance to the cave and an area of two square miles around it was declared a national monument on October 25, 1923, by President Coolidge. The government has also set aside 129 square miles more in the Carlsbad Cavern district for inspection with the view of making it a national park in conjunction with the cavern.

White's Slender Rope and Bucket

A long flight of wooden steps; 216 feet from the surface, lead down to the first level of the cave. Before these wooden steps were built and before the government took over the cave Jim White used to let down tourists to the first level in a wooden bucket attached to a slender rope. Back in the early days of exploration only the venturesome and stout-hearted would descend into the cave's black depths via White's slender rope and bucket.

At the first level, across a jumble of rocks, the electric lights reveal a bat cave where 3,000,000 or more bats make their home. But this bat cave is not open to tourists, so the tiny creatures still cling to its walls in undisturbed slumber.

Carlsbad Cavern is not just one big cave but a series of caves, large and small, with narrow openings as a rule leading from one cave to another. About seven miles of the cavern is open to tourists, the seven miles having well beaten paths illuminated by electric lights. All around are great stone walls, high and low, enclosing queer formations of stalagmites and stalactites. Some of these take on grotesque forms

that somewhat resemble humans as well as animals. Across a wide chasm topping a great cliff is a stalagmite that closely resembles a baby hippopotamus, stretched in frozen solidity upon a frosted rock. Interspersed are shafts of onyx and marble limestone formations that show forth in sublime grandeur. Here is one of nature's greatest art galleries.

The Giant Dome

In bold relief is a giant dome, enormous pillar of white, stretching upward toward the vaulted roof, said to be the largest known stalagmite in the world. It is 62 feet high and 16 feet in diameter. The guide tells that this formation, like many others, has been built at the rate of about an inch each hundred years. Scientists have estimated the age of the giant dome to be 60,000,000 years.

On and on we go through a wonderland of beauty and art. We are far underground now; have come down another flight of 84 steps and another of 124 steps and have walked down a number of inclines.

We are now in the Big Room, the guide tells us. It is the largest room in the world, being 4,000 feet long and 623 feet wide. In places the ceiling of the Big Room is 300 feet high. When you stop to realize that in the center of that room you are standing 750 feet, almost a quarter of a mile underground, and that you are three miles from the entrance of Carlsbad Cavern, you begin to realize somewhat the stupendousness of this marvelous work of nature.

"Rock of Ages"

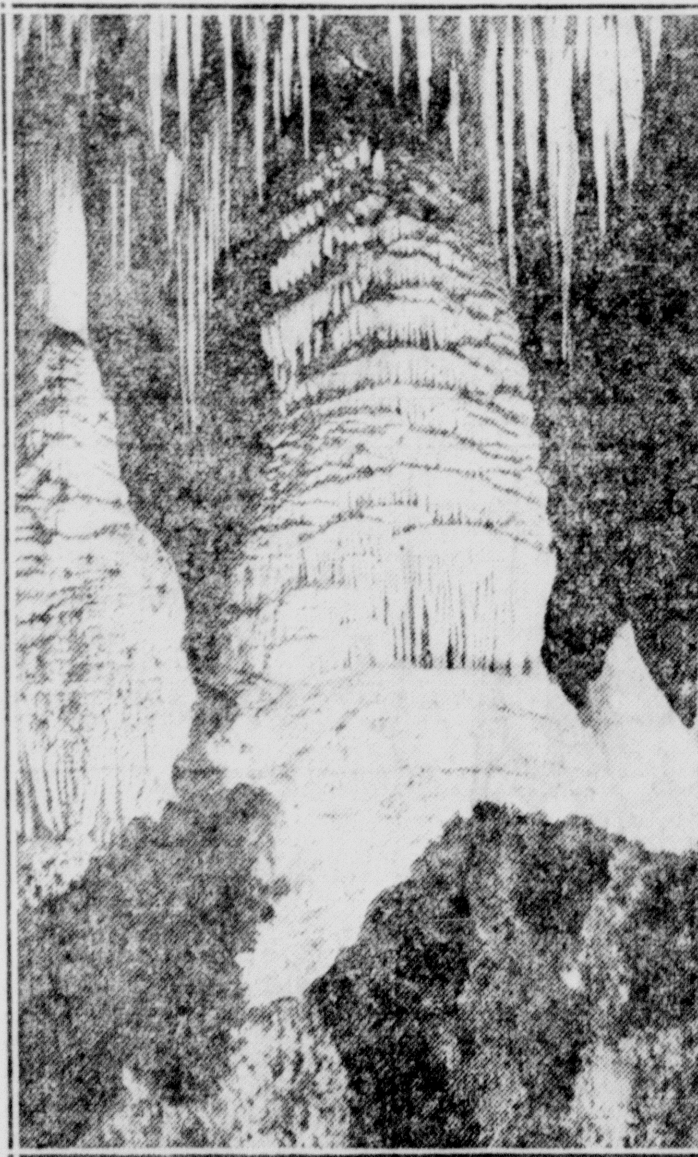

But the climax of the trip comes at the foot of the Rock of Ages. We have circled the Big Room on a path named the "Texas Trail;" we have seen the Bottomless Pit, where the floor of the Big Room drops down into eternal darkness and where the distance to the bottom is as yet unknown; we have looked over the railing at the Jumping Off Place and have been told by the guide that 150 feet down that hole we would find ourselves in another cave that underlies the upper cave and about six miles of which has already been explored; we have walked a path that threaded its way through a valley of lily-shaped rock formations and needle-shaped stalagmites; we have climbed a slight incline and are resting at the foot of the Rock of Ages.

The Rock of Ages is a great stalagmite, built in a series of terraces. It is not smooth and rounded as is the Giant Dome but is formed by a series of columns that run vertically from one terrace to another so that it reminds you

somewhat forcibly of pictures you have seen of the Tower of Pisa.

As we sit there looking back over a valley of strange formations that sink behind ridges of jagged domes the thought recurs to us: "Is this real, or is it a dream?"

The guide now takes off his hat and starts speaking. "Sometimes," he says, "when a group of tourists sit here to rest and look out over yonder" (he points across the underground valley) "and view that masterpiece of creation" (he points to the Rock of Ages) "they like to sing that old familiar gospel song, 'The Rock of Ages.' Is there any-

"The Rock of Ages," a giant stalagmite in Carlsbad Cavern. Scientists estimate this stalagmite to be millions of years old.

(Copyright C. L. S., Photo by Leck Studio.)

one here who would like to lead us in the song?"

Song Swells in Volume

There is a long silence. Then a gray-haired little woman begins to sing: "Rock of Ages, cleft for me—" The song swells in volume as others begin to sing. Two or three of the younger men laugh when the guide mentions singing, but their laughter soon subsides into respectful silence. A gray-bearded farmer from Texas removes his hat. One by one the other men remove their hats,

"Rock of Ages—"

The second verse is more impressive than the first, everyone singing, men with hats off, guides standing at attention. The strangeness of it all was the homage to God in a great subterranean cave, far from any church or pulpit.

The song is ended. There are two or three minutes of silence, when no one speaks and no one moves. Then the guide announces that all of the lights are to be turned off for a minute or two; we are in the midst of impenetrable darkness—so black and oppressive that it makes the timid shudder. At last far down the immense dark labyrinths of this part of the cave comes the flash of a light as a section is partly illuminated. Another flash follows, as one by one the lights come on, closer and closer, until they flood the Big Room again. Flashing of lights bring out all the delicate hues of the myriad of formations. It is a sight we shall never forget.

Seven Miles of Exploration

Seven miles of walking underground and then we were ready to come out of Carlsbad Cavern. We entered at 10:30 in the morning. Lunch was served in a central cave. We were given several periods of rest so that the trip would not be too tiresome. It was 4 o'clock in the afternoon when we came to the surface.

The lighting effects within the cavern are most impressive. CURRENT COMMENT

By J. H. LOWRY

(Copyright, 1929, by the Home Color Print Co.)

August Musings

AUGUST isn't what it used to be—not by two days. Unlike the other months, August has grown since it was born. Considering what it is, August was too long at its beginning, when it had but twenty-nine days, and all of us would gladly see it shortened several days, but the people of the early centuries were hero worshipers and snobbish, just as the people of today; in haste they made August longer, and in leisure the generations which followed them have cursed them for doing so.

The history of August is about like this: The world lived, moved and had its being a long time without any August, and hit on all six cylinders as it moved in its unerring cycles. August wasn't needed any more than the bank clerks need another national holiday, but the people were full of snobbery and hero worship, and so August was brought into being. Old Augustus Caesar was king of Rome at the time of which I speak, and the Romans were as crazy over him as Americans are over Lindbergh at the present time. Augustus pepped up his armies and won a few victories, which made Rome howl. There were many big dances, at which hard liquor was served, and then the Roman Senate got busy. There was a month on the calendar named Sextilis, so called because it was the sixth month of the year, which then began with March. The Republican party met in national convention and whereabout that as Sextilis had never been of any use to Rome, therefore it should be yanked from the calendar and its seat given to August, in honor of great Augustus. The Democrats met a little later and touched about as lightly on the matter as they usually do on the prohibition question. The Republicans won out, as they usually do, quite a number of Democrats voting with them for the sake of their conscience. Augustus rewarded the Republicans by giving each of them a post-

fice or a consulate, and so when the Senate met again and found that August had only twenty-nine days, it stole two days from other months and added them to August. This made August's month as large as the month named in honor of Julius, and of course Augustus was happy. He showed his appreciation by raising taxes a little, and again Rome howled.

August is a very popular month with the rich, but very unpopular with poor folks, bank and postal employees, and dogs. The rich hie themselves away to mountain retreats and seaside resorts, and tantalize their friends and poor kin by writing home that they "are sleeping under blankets every night and wearing wraps every day." They make life even a greater burden for the poor by sending them beautiful post cards of bathing beauties robed in fresh air and sunshine, for which meanness they should be shot. The poor despise August because they have to stay at home and sweat; the postal and bank clerks hate it because no prominent man has a birthday during the month and there is no red figures on the calendar to mark a holiday. The dogs hate it because every time they see a pool they have a brainstorm and get chased to their death by the city authorities.

An educated man is one who has devoured the curriculum of a college. An enlightened man is one who knows which fork to use at a swell dinner. A wise man is one who can look another in the eye and tell whether he is facing real goods or a four-flusher.

The fishermen are perhaps the greatest sufferers from prohibition in this country. Fishermen must have corks for their fishing lines. Time was when a fisherman could pick up a cork on any vacant lot or in any back alley. Now he must go to a drug store and buy a cork.

No matter what your lot is, it could be worse. Suppose you had to go through

chigger time without any finger nails?

It was a real philosopher who said it is mere curiosity that prompts people to cling to life with such a tight grasp. People want to live to see what the future will bring forth. Women want to live to see just how much the prices will be marked down at the next bargain sale, and the men want to continue their existence that they may see how much shorter the skirts will be a few years hence.

Close observation leads me to say that the person converted under the preaching of the high-power evangelist, who receives thousands of dollars for holding a revival, doesn't make any better Christian than the fellow converted under the preaching of the old-fashioned preacher who has to get along with only one suit of clothes a year.

Not every statement that sounds like a fairy story does violence to the truth. I vouch for the things mentioned below, even though you may be shocked and call me hard names: I have sold nice frying chickens at three for a quarter and fresh eggs at a nickel a dozen. Furthermore, I once knew a piano tuner to call at a home, finger the piano keys for a time and then say the piano was in perfect tune.

The gander has but one wife; the rooster has several. The gander helps make the nest, guards his wife when she is incubating a family, and even takes his wife's place on the eggs when madame goes for water or a little rest. The rooster renders no assistance in family matters whatever, and eats the fat worm he has called his wives to see just as they arrive upon the scene. Down with the polygamists.

Many truthful men go fishing, but very few truthful men come home from a fishing trip.

Really, I can not understand why liv-

ing expenses have not been reduced. Very few of the young men wear hats, the women have discarded corsets and only wear hose on Sundays. Dresses have been abbreviated eighty per cent, a suit of men's underwear is not more than twelve inches long, and ladies underwear somewhat shorter. It appears that the more we abbreviate our wardrobes the more they cost us.

Mr. Hoover is a very mild tyrant when compared to my doctor. Eleven years ago Mr. Hoover wouldn't let me have any sugar for my coffee, or any beefsteak, and I did the can-can dance and threw gems of profanity at him. Recently my doctor ordered me to leave coffee, sugar and beefsteak severely alone. I bowed meekly and paid him five dollars for his meanness.

People have different ideas and see things from different angles. Mechanics praise Henry Ford for boosting the price of labor, thousands of consumers praise him for reducing the price of automobiles, but in my humble opinion Mr. Ford's crowning work for mankind was having McGuffey's old Fourth Reader reprinted.

I may be old-fashioned, but I contend that the best way for a woman to keep her husband from lingering too long in the company of other women, or going to the divorce court, is to keep her eye pretty close on the kitchen. The woman who can turn a steak to a delightful brown, compound biscuits that make the innards glad and build a three-story shortcake to perfection, need never be uneasy about her husband not showing up at home regularly and staying a long time.

Somebody said eating liver made women beautiful and all people healthy. And that ruined the poor man's scheme for an economical living. A nickel, in the long ago, would buy enough liver to feed the family and the dog; now you can carry a dollar's worth of liver in your vest pocket.

Men can do what they want to do, provided they are in earnest and a nice profit is made on their efforts. Every day we hear men say the boll weevils can't be exterminated. They can. If the government should offer a dollar each for boll weevils, dead or alive, how many boll weevils do you suppose could be found in the cotton fields three years from now? To be sure the experiment would bust the government, but it could soon get rich again by levying a heavy income tax on the boll weevil catchers. Of course Rockefeller, Mellon and Henry Ford would get the cream of the weevil business, by constructing machines that would catch millions at a grab, but from the leavings the poor but honest hand-pickers would do fairly well for a time.

One who claims to be an authority on the lower animals says the buffalo has less sense than anything that walks or flies. Can't agree with him. I have seen enough of the buffalo to know that it has little gray matter in its ugly head, but compared to the mosquito the buffalo is a Solomon. I have known many a mosquito to contend all night for the liquid plasma of a skinny, crusty old bachelor who didn't have enough blood in his whole anatomy to color the point of a needle, when sleeping in the same house were several radiant maidens, veritable Venus de Milos, upon which they might have dined luxuriously. Could anything else be so brainless??

The Turnip Green Crop

At the present writing I am for rain. Many people fear rain at this season as they would a plague of locusts, contending that late summer rains bring weevils in great numbers, and weevils destroy cotton, but I am for rain, because summer and fall rains are always followed by a luxuriant crop of turnip greens. To me the destruction of the turnip green crop is one of the direst calamities that can befall a country or mankind. There are crops which furnish a greater num-

An Address to the Old Settlers of Bosque County

By JOE SAPPINGTON

(Copyright, 1929, by the Home Color Print Co.)

IDEEM it no less a privilege than a very great pleasure to meet with the old settlers of Bosque county on this historic occasion, since I am an old settler myself, from a county not many miles from here, as the crow flies. Most of you know me by reputation. I am the man who chased the Yankees, Indians and panthers out of the Cave Creek Community and made it possible for the civilization we now have and don't know what to do with, which I think entitles me to honorary membership in this association.

I am now looking into the faces of men and women who were the boys and girls in the golden yesteryears of a generation past and gone. We are the last of the Mohicans, the link that binds the past to the present, the ox cart to the airplane, the bull tongue plow to the double-row cultivator, the scythe blade to the combine, the tallow candle to the electric light.

There is not an old settler here today who would not gladly return to the old

order of things and undergo its hardships, or what this flapper age considers as such. There is not an old timer within the sound of my voice who would not like to sneak away from his family at the dead hours of night and go to another old-fashioned square dance, kick up his heels, bow his neck, swing corners with the girls and hear the fiddler play "Sallie Gooden," "The Devil's Dream," "Shake That Wooden Leg," and other soulful tunes that were popular back in the days of the Kansas grasshopper and the paper collar.

When "Four-Bits" Had Real Value

There is not one of us who would not be delighted to go to one more picnic and ride the flying jennie and drink lemonade, no matter if it cost us "four bits" to take in the whole thing. Don't you old stiff-legs remember the little fans we used to carry in the breast pockets of our coats to picnics, where we would shyly sit down close to a crowd of girls and begin fanning with might and main, ever and anon casting sheep eyes at some particular girl that we had been losing sleep over for many moons. And

who among us would not like to go to another brush arbor camp meeting where men and women were truly converted and not ashamed to shout the glad tidings of souls redeemed from sin. What a relief it would be to hear one of those old-fashioned servants of the Lord preach a real gospel sermon and not ring in politics and prohibition.

But those glorious days are past and we can never return to them except in retrospect, which, thank the Lord, is one sweet privilege still accorded to us. And don't you remember those country debates in which we orated over and over as to "Who deserves the most honor, Columbus for discovering America, or Washington for defending it?" and "Which affords the most pleasure, pursuit of or possession of riches?" and "Which has caused more suffering to the human family, war or intemperance?" How we did debate these subjects and try to convince the judges, hoping they would bring in decisions for our side!

A "No Decision" Debate

I took a leading part one night in which no decision was ever rendered.

The subject discussed was, "Which is the mother, the hen that lays the egg or the hen that hatches it?" Some of the debaters became personal in their remarks which precipitated a fist fight between John Hawkins and Bill Stephens, whose fathers were acting as judges. Each of the judges went to the aid of his son and then the fight became general all over the house and the president broke a good gavel and split a bench leg pounding upon the table before order was restored. The matter was never settled and to this good day I don't know which is the lawful mother, the hen that sat upon the egg until it hatched or the hen that laid it.

On an average we boys went to school about thirteen months all told. I shall never forget my first school and its teacher. He was a stern-visaged one-eyed man with a peg leg, smoked a clay pipe, suffered from catarrh and asthma and thumped my head every time I whispered or missed a word. I still have knots on my head as the result of his thumping. We didn't learn much, but considering our opportunities I'll be damned if I know how we got as much education as we did.

Handsome Body of Young Men

We old settlers are not much to look at. We are wrinkled and bald, our hands are gnarled, our joints are stiff; we are bow-legged, full of aches and pains; our eyes have grown dim, but take thirty or forty years from our shoulders and we would show you the handsomest body of young men that mortal man ever flopped his eye upon. Of course, we didn't have bathtubs in those days and our bathing season was short, but you couldn't tell it on us when we went courting. We used lots of Hoyt's German cologne. Another thing about us old settlers, nearly all of us are Democrats and that don't mean Hoover Democrats, either. We are not color-blind by a blamed sight.

In conclusion, permit me to say a few words concerning the wives of these old settlers. They were beautiful girls, modest, industrious and have made the truest, most self-sacrificing wives and mothers that ever graced this earth. If the truth must be told, not one of them ever clamored for woman's suffrage and they believe even now that their husbands and sons are eminently able to do the voting for the entire family.

FISHING IN THE BRAZOS RIVER

By SAM E. MILLER

(Copyright, 1929, by the Home Color Print Co.)

FISHING in the Brazos River, and probably in all other rivers in Texas, is getting better from year to year," said a man who has fished in the Brazos regularly for a great many years, and has caught more and larger fish than any other fisherman. "This is due," he believes, "to the fact that within the last few years so many artificial lakes have been built, stocked with fish and fitted up conveniently as fishing quarters, that they have called away from the river banks hundreds of men and women who formerly knew only river fishing."

Aside from its lure as a fishing stream the Brazos River has been intimately connected with some of the most interesting events in the history of Texas. To know the history of the Brazos, together with the history of the towns and cities along its banks, is to know a large part of Texas history from the time of the establishing of San Felipe de Austin to the latest effort of engineers to establish a system of locks and dams to control its flood waters.

Shaded Pools the Best

The Brazos River lends itself to fishing more than other Texas river for two reasons: First, because of its great

length, extending across the State diagonally for a distance of eight hundred and forty miles. Second, because of its meanderings through such a long stretch of foothills in the central and northwestern part of the State. Palo Pinto county is thirty miles across, yet this county contains about one hundred and sixty miles of the Brazos River from its point of entry across the line of Young county until it leaves near the Parker county line. This tendency of the river to bend back upon itself in its search for an outlet through the valleys gives it added advantage for fishing. The rugged terrain and tortuous windings create shaded pools that become favorite feeding grounds for fish.

On an enlarged map of Palo Pinto county there appears thirty-four bends in the Brazos River properly marked and named. Many are named in honor of early pioneers who took up and stocked ranches in or near these bends, while others are named to commemorate some local characteristic. There is "Possum Bend," "Cyclone Bend," "Loving Bend," "Fortune Bend," "Pecan Bend," etc.

If the Signs Are Right

Interviews with a number of old-time Brazos River fishermen bring out the fact that practically each fishermen had

Fish caught from the Brazos River by Bill Owens of Mineral Wells, Texas.

a favorite bend in which to fish, claiming it to be the best. One fisherman,

who has fished in the river for forty years, when asked which was the better bend in which to fish replied: "One's just as good as another, if the signs are right and the fish bite." I've fished in every hole in every bend in the Brazos River and sometimes I've caught 'em and sometimes I haven't, but most of the time I've brought home a mess of fish. I've fished in most of the streams of the State and found out that the fish bite more uniformly in the Brazos than anywhere else. My dad taught me how to fish in the Brazos and he used to tell me that this river in the early days was the main dependence of the Comanche and Kiowa Indians for their fish supply. After they had been corralled and put on reservations in the Indian Territory bands of 'em used to slip off and come down here to fish and hunt. And furthermore, there's never a fisherman had an accident while fishing on the Brazos so far as I know or ever heard of. No fisherman was ever drowned in the river or bitten by a rattlesnake or moccasin while fishin'. There's been a few deaths by drownin' in the old river, but it always happened while folks was in bathin' which makes me believe that the Brazos was created 'specially for fishin' and was never intended for bathin'."

Harris Bend Popular

While "Hog Bend," "Carter Bend" and "Possum Bend," in Palo Pinto county are favorite fishing grounds for many experienced fishermen, yet "Harris Bend" is said to be the best, most picturesque and also the most inaccessible. This bend is heavily wooded and in season a favorite locality for squirrel hunting.

Fish can be usually caught in the Brazos River the year round, with possibly a few exceptions during winter months. Some very large catfish are caught, weighing as much as 50 pounds each. These are usually caught with trot lines across or up and down stream, or set lines from banks.

There are no better fish in the world to eat than channel catfish from the Brazos River, weighing from one to two pounds, and the flavor is much better when cooked and served in camp after a day of hard fishing. It's a real treat to sit down to a fish fry of young channel catfish on a rocky bluff overlooking the Brazos River, with its misty blue hills in the background, adding picturesqueness and charm to each graceful sweep of the river. The rugged scenery along the Brazos in the western part of Texas would rival that of Colorado or California.

CURRENT COMMENT

By J. H. LOWRY

(Copyright, 1929, by the Home Color Print Co.)

August Musings

OLD AUGUST isn't what is used to be—not by two days. Unlike the other months, August has grown since it was born. Considering what it is, August was too long at its beginning, when it had but twenty-nine days, and all of us would gladly see it shortened several days, but the people of the early centuries were hero worshipers and snobbish, just as the people of today; in haste they made August longer, and in leisure the generations which followed them have cursed them for doing so.

The history of August is about like this: The world lived, moved and had its being a long time without any August, and hit on all six cylinders as it moved in its unerring cycles. August wasn't needed any more than the bank clerks need another national holiday, but the people were full of snobbery and hero worship, and so August was brought into being. Old Augustus Caesar was king of Rome at the time of which I speak, and the Romans were as crazy over him as Americans are over Lindbergh at the present time. Augustus pepped up his armies and won a few victories, which made Rome howl. There were many big dances, at which hard liquor was served, and then the Roman Senate got busy. There was a month on the calendar named Sextilis, so called because it was the sixth month of the year, which then began with March. The Republican party met in national convention and whereased that as Sextilis had never been of any use to Rome, therefore it should be yanked from the calendar and its seat given to August, in honor of great Augustus. The Democrats met a little later and touched about as lightly on the matter as they usually do on the prohibition question. The Republicans won out, as they usually do, quite a number of Democrats voting with them for the sake of their conscience. Augustus rewarded the Republicans by giving each of them a post-

fice or a consulate, and so when the Senate met again and found that August had only twenty-nine days, it stole two days from other months and added them to August. This made Augustus' month as large as the month named in honor of Julius, and of course Augustus was happy. He showed his appreciation by raising taxes a little, and again Rome howled.

August is a very popular month with the rich, but very unpopular with poor folks, bank and postal employees, and dogs. The rich hie themselves away to mountain retreats and seaside resorts, and tantalize their friends and poor kin by writing home that they "are sleeping under blankets every night and wearing wraps every day." They make life even a greater burden for the poor by sending them beautiful post cards of bathing beauties robed in fresh air and sunshine, for which meanness they should be shot. The poor despise August because they have to stay at home and sweat; the postal and bank clerks hate it because no prominent man has a birthday during the month and there is no red figures on the calendar to mark a holiday. The dogs hate it because every time they see a pool they have a brainstorm and get chased to their death by the city authorities.

An educated man is one who has devoured the curriculum of a college. An enlightened man is one who knows which fork to use at a swell dinner. A wise man is one who can look another in the eye and tell whether he is facing real goods or a four-flusher.

The fishermen are perhaps the greatest sufferers from prohibition in this country. Fishermen must have corks for their fishing lines. Time was when a fisherman could pick up a cork on any vacant lot or in any back alley. Now he must go to a drug store and buy a cork.

No matter what your lot is, it could be worse. Suppose you had to go through

chigger time without any finger nails?

It was a real philosopher who said it is mere curiosity that prompts people to cling to life with such a tight grasp. People want to live to see what the future will bring forth. Women want to live to see just how much the prices will be marked down at the next bargain sale, and the men want to continue their existence that they may see how much shorter the skirts will be a few years hence.

Close observation leads me to say that the person converted under the preaching of the high-power evangelist, who receives thousands of dollars for holding a revival, doesn't make any better Christian than the fellow converted under the preaching of the old-fashioned preacher who has to get along with only one suit of clothes a year.

Not every statement that sounds like a fairy story does violence to the truth. I vouch for the things mentioned below, even though you may be shocked and call me hard names: I have sold nice frying chickens at three for a quarter and fresh eggs at a nickel a dozen. Furthermore, I once knew a piano tuner to call at a home, finger the piano keys for a time and then say the piano was in perfect tune.

The gander has but one wife; the rooster has several. The gander helps make the nest, guards his wife when she is incubating a family, and even takes his wife's place on the eggs when madame goes for water or a little rest. The rooster renders no assistance in family matters whatever, and eats the fat worm he has called his wives to see just as they arrive upon the scene. Down with the polygamists.

Many truthful men go fishing, but very few truthful men come home from a fishing trip.

Really, I can not understand why liv-

ing expenses have not been reduced. Very few of the young men wear hats, the women have discarded corsets and only wear hose on Sundays. Dresses have been abbreviated eighty per cent, a suit of men's underwear is not more than twelve inches long, and ladies underwear somewhat shorter. It appears that the more we abbreviate our wardrobes the more they cost us.

Mr. Hoover is a very mild tyrant when compared to my doctor. Eleven years ago Mr. Hoover wouldn't let me have any sugar for my coffee, or any beefsteak, and I did the can-can dance and threw gems of profanity at him. Recently my doctor ordered me to leave coffee, sugar and beefsteak severely alone, I bowed meekly and paid him five dollars for his meanness.

People have different ideas and see things from different angles. Mechanics praise Henry Ford for boosting the price of labor, thousands of consumers praise him for reducing the price of automobiles, but in my humble opinion Mr. Ford's crowning work for mankind was having McGuffey's old Fourth Reader reprinted.

I may be old-fashioned, but I contend that the best way for a woman to keep her husband from lingering too long in the company of other women, or going to the divorce court, is to keep her eye pretty close on the kitchen. The woman who can turn a steak to a delightful brown, compound biscuits that make the innards glad and build a three-story shortcake to perfection, need never be uneasy about her husband not showing up at home regularly and staying a long time.

Somebody said eating liver made women beautiful and all people healthy. And that ruined the poor man's scheme for an economical living. A nickel, in the long ago, would buy enough liver to feed the family and the dog; now you can carry a dollar's worth of liver in your vest pocket.

Men can do what they want to do, provided they are in earnest and a nice profit is made on their efforts. Every day we hear men say the boll weevils can't be exterminated. They can. If the government should offer a dollar each for boll weevils, dead or alive, how many boll weevils do you suppose could be found in the cotton fields three years from now? To be sure the experiment would bust the government, but it could soon get rich again by levying a heavy income tax on the boll weevil catchers. Of course Rockefeller, Mellon and Henry Ford would get the cream of the weevil business, by constructing machines that would catch millions at a grab, but from the leavings the poor but honest hand-pickers would do fairly well for a time.

One who claims to be an authority on the lower animals says the buffalo has less sense than anything that walks or flies. Can't agree with him. I have seen enough of the buffalo to know that it has little gray matter in its ugly head, but compared to the mosquito the buffalo is a Solomon. I have known many a mosquito to contend all night for the liquid plasma of a skinny, crusty old bachelor who didn't have enough blood in his whole anatomy to color the point of a needle, when sleeping in the same house were several radiant maidens, veritable Venus de Milos, upon which they might have dined luxuriously. Could anything else be so brainless??

The Turnip Green Crop

At the present writing I am for rain. Many people fear rain at this season as they would a plague of locusts, contending that late summer rains bring weevils in great numbers, and weevils destroy cotton, but I am for rain, because summer and fall rains are always followed by a luxuriant crop of turnip greens. To me the destruction of the turnip green crop is one of the direst calamities that can befall a country or mankind. There are crops which furnish a greater num-

An Address to the Old Settlers of Bosque County

By JOE SAPPINGTON

(Copyright, 1929, by the Home Color Print Co.)

DEEM it no less a privilege than a very great pleasure to meet with the old settlers of Bosque county on this historic occasion, since I am an old settler myself, from a county not many miles from here, as the crow flies. Most of you know me by reputation. I am the man who chased the Yankees, Indians and panthers out of the Cave Creek Community and made it possible for the civilization we now have and don't know what to do with, which I think entitles me to honorary membership in this association.

I am now looking into the faces of men and women who were the boys and girls in the golden yesterdays of a generation past and gone. We are the last of the Mohicans, the link that binds the past to the present, the ox cart to the airplane, the bull tongue plow to the double-row cultivator, the scythe blade to the combine, the tallow candle to the electric light.

There is not an old settler here today who would not gladly return to the old

order of things and undergo its hardships, or what this flapperage considers as such. There is not an old timer within the sound of my voice who would not like to sneak away from his family at the dead hours of night and go to another old-fashioned square dance, kick up his heels, bow his neck, swing corners with the girls and hear the fiddler play "Sallie Gooden," "The Devil's Dream," "Shake That Wooden Leg," and other soulful tunes that were popular back in the days of the Kansas grasshopper and the paper collar.

When "Four-Bits" Had Real Value

There is not one of us who would not be delighted to go to one more picnic and ride the flying jennie and drink lemonade, no matter if it cost us "four bits" to take in the whole thing. Don't you old stiff-legs remember the little fans we used to carry in the breast pockets of our coats to picnics, where we would shyly sit down close to a crowd of girls and begin fanning with might and main, ever and anon casting sheep eyes at some particular girl that we had been losing sleep over for many moons. And

who among us would not like to go to another brush arbor camp meeting where men and women were truly converted and not ashamed to shout the glad tidings of souls redeemed from sin. What a relief it would be to hear one of those old-fashioned servants of the Lord preach a real gospel sermon and not ring in politics and prohibition.

But those glorious days are past and we can never return to them except in retrospect, which, thank the Lord, is one sweet privilege still accorded to us. And don't you remember those country debates in which we orated over and over as to "Who deserves the most honor, Columbus for discovering America, or Washington for defending it?" and "Which affords the most pleasure, pursuit of or possession of riches?" and "Which has caused more suffering to the human family, war or intemperance?" How we did debate these subjects and try to convince the judges, hoping they would bring in decisions for our side!

A "No Decision" Debate

I took a leading part one night in which no decision was ever rendered.

The subject discussed was, "Which is the mother, the hen that lays the egg or the hen that hatches it?" Some of the debaters became personal in their remarks which precipitated a fist fight between John Hawkins and Bill Stephens, whose fathers were acting as judges. Each of the judges went to the aid of his son and then the fight became general all over the house and the president broke a good gavel and split a bench leg pounding upon the table before order was restored. The matter was never settled and to this good day I don't know which is the lawful mother, the hen that sat upon the egg until it hatched or the hen that laid it.

On an average we boys went to school about thirteen months all told. I shall never forget my first school and its teacher. He was a stern-visaged one-eyed man with a peg leg, smoked a clay pipe, suffered from catarrh and asthma and thumped my head every time I whispered or missed a word. I still have knots on my head as the result of his thumping. We didn't learn much, but considering our opportunities I'll be damned if I know how we got as much education as we did.

Handsome Body of Young Men

We old settlers are not much to look at. We are wrinkled and bald, our hands are gnarled, our joints are stiff; we are bow-legged, full of aches and pains; our eyes have grown dim, but take thirty or forty years from our shoulders and we would show you the handsomest body of young men that mortal man ever flopped his eye upon. Of course, we didn't have bathtubs in those days and our bathing season was short, but you couldn't tell it on us when we went courting. We used lots of Hoyt's German cologne. Another thing about us old settlers, nearly all of us are Democrats and that don't mean Hoover Democrats, either. We are not color-blind by a blamed sight.

In conclusion, permit me to say a few words concerning the wives of these old settlers. They were beautiful girls, modest, industrious and have made the truest, most self-sacrificing wives and mothers that ever graced this earth. If the truth must be told, not one of them ever clamored for woman's suffrage and they believe even now that their husbands and sons are eminently able to do the voting for the entire family.

FISHING IN THE BRAZOS RIVER

By SAM E. MILLER

(Copyright, 1929, by the Home Color Print Co.)

FISHING in the Brazos River, and probably in all other rivers in Texas, is getting better from year to year," said a man who has fished in the Brazos regularly for a great many years, and has caught more and larger fish than any other fisherman. "This is due," he believes, "to the fact that within the last few years so many artificial lakes have been built, stocked with fish and fitted up conveniently as fishing quarters, that they have called away from the river banks hundreds of men and women who formerly knew only river fishing."

Aside from its lure as a fishing stream the Brazos River has been intimately connected with some of the most interesting events in the history of Texas. To know the history of the Brazos, together with the history of the towns and cities along its banks, is to know a large part of Texas history from the time of the establishing of San Felipe de Austin to the latest effort of engineers to establish a system of locks and dams to control its flood waters.

Shaded Pools the Best

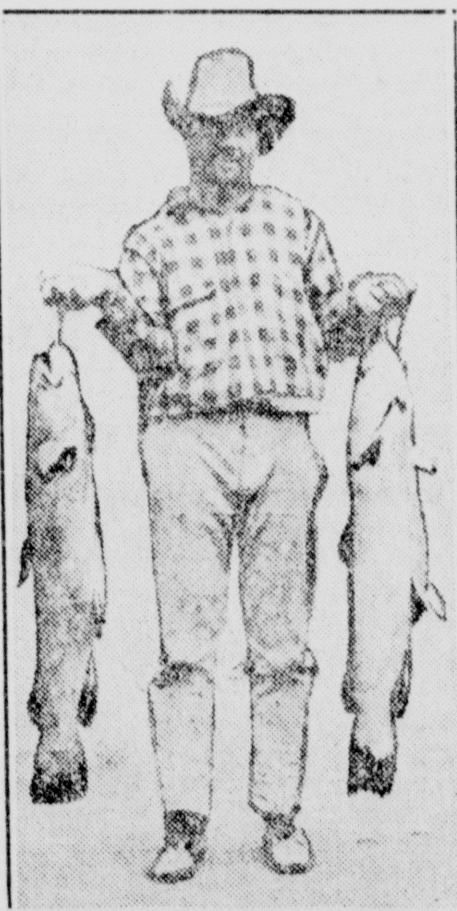

The Brazos River lends itself to fishing more than other Texas river for two reasons: First, because of its great

length, extending across the State diagonally for a distance of eight hundred and forty miles. Second, because of its meanderings through such a long stretch of foothills in the central and northwestern part of the State. Palo Pinto county is thirty miles across, yet this county contains about one hundred and sixty miles of the Brazos River from its point of entry across the line of Young county until it leaves near the Parker county line. This tendency of the river to bend back upon itself in its search for an outlet through the valleys gives it added advantage for fishing. The rugged terrain and tortuous windings create shaded pools that become favorite feeding grounds for fish.

On an enlarged map of Palo Pinto county there appears thirty-four bends in the Brazos River properly marked and named. Many are named in honor of early pioneers who took up and stocked ranches in or near these bends, while others are named to commemorate some local characteristic. There is "Possum Bend," "Cyclone Bend," "Loving Bend," "Fortune Bend," "Pecan Bend," etc.

If the Signs Are Right

Interviews with a number of old-time Brazos River fishermen bring out the fact that practically each fisherman had

Fish caught from the Brazos River by Bill Owens of Mineral Wells, Texas.

a favorite bend in which to fish, claiming it to be the best. One fisherman,

who has fished in the river for forty years, when asked which was the better bend in which to fish replied: "One's just as good as another, if the signs are right and the fish bitin'." I've fished in every hole in every bend in the Brazos River and sometimes I've caught 'em and sometimes I haven't, but most of the time I've brought home a mess of fish. I've fished in most of the streams of the State and found out that the fish bite more uniformly in the Brazos than anywhere else. My dad taught me how to fish in the Brazos and he used to tell me that this river in the early days was the main dependence of the Comanche and Kiowa Indians for their fish supply. After they had been corralled and put on reservations in the Indian Territory bands of 'em used to slip off and come down here to fish and hunt. And furthermore, there's never a fisherman had an accident while fishing on the Brazos so far as I know or ever heard of. No fisherman was ever drowned in the river or bitten by a rattlesnake or moccasin while fishin'. There's been a few deaths by drownin' in the old river, but it always happened while folks was in bathin' which makes me believe that the Brazos was created 'specially for fishin' and was never intended for bathin'."

Harris Bend Popular

While "Hog Bend," "Carter Bend" and "Possum Bend," in Palo Pinto county are favorite fishing grounds for many experienced fishermen, yet "Harris Bend" is said to be the best, most picturesque and also the most inaccessible. This bend is heavily wooded and in season a favorite locality for squirrel hunting.

Fish can be usually caught in the Brazos River the year round, with possibly a few exceptions during winter months. Some very large catfish are caught, weighing as much as 50 pounds each. These are usually caught with trot lines across or up and down stream, or set lines from banks.

There are no better fish in the world to eat than channel catfish from the Brazos River, weighing from one to two pounds, and the flavor is much better when cooked and served in camp after a day of hard fishing. It's a real treat to sit down to a fish fry of young channel catfish on a rocky bluff overlooking the Brazos River, with its misty blue hills in the background, adding picturesqueness and charm to each graceful sweep of the river. The rugged scenery along the Brazos in the western part of Texas would rival that of Colorado or California.

CITRUS PACKING PLANT

Construction of a new packing plant for the Texas Citrus Fruit Growers' Exchange has been started at La Feria.

SHIP POWDERED MILK

One car of processed milk powder has been shipped to the Philadelphia market from the Tennessee plant at Decatur, Texas, preceded by two carloads of sweet cream.

AIRPORT FOR KERRVILLE

Recently Kerrville's new airport was formally opened. The airport was a gift to the community by Louis Schreiner, a Kerrville banker. The landing field contains 118 acres.

FINE HOTEL FOR NACOGDOCHES

Arrangements have virtually been completed for the erection of an eight-story hotel at Nacogdoches. The new hotel would have 116 rooms and the cost would be approximately \$400,000.

PESTS IN PECAN ORCHARDS

The walnut caterpillar has ruined hundred of pecan trees in Texas in recent years, according to C. B. Nickels, associate entomologist, United States Department of Agriculture, at Brownwood.

LARGEST AND SMALLEST COUNTIES

Brewster is the largest county in Texas, its area being 3,798,400 acres, which is the equivalent of 5,935 square miles. Rockwall is the smallest county in Texas, having 95,360 acres, or 147 square miles.

TEXAS RAINFALL

Average rainfall over Texas as a whole is 31.08 inches. There is a difference of 35 inches between the annual rainfall in extreme East and extreme West Texas—the Beaumont area showing 45 inches and the El Paso area 10 inches.

MONUMENT FOR DAVY CROCKETT

The Texas Legislature voted an appropriation of \$100,000 to erect a monument, at Crockett, in honor of the hero of the Alamo. The Senate resolution called for a monument of Texas granite, to be erected in a 48-acre park along the old San Antonio road. The park was a camping place of Crockett, when he was on his way to San Antonio to battle for Texas independence.

TEXAS SEVENTH IN AUTOS

Texas stands seventh in automobile registrations, with 1,214,297 motor vehicles licensed to use its roads. New York is first with 2,033,942, and California, Ohio, Pennsylvania, Illinois and Michigan follow in order ahead of Texas. Oklahoma, with 829,843, is nearest to Texas in the South and Southwest, and North Carolina, with 464,376, leads in the "Old South."

ONLY QUAKER COLONY IN TEXAS

The only Quaker colony in Texas was founded thirty years ago at Friendwood, near Houston. In 1889 F. C. Brown came to Texas from Iowa and located at what is now Friendwood, where he founded Friends Academy. He was a minister of the Quaker sect. A little later he was joined by 60 or 70 Quaker families, that became the nucleus of Friendwood. Mr. Brown died a few weeks ago at the age of 79.

NEW GAS LINE

One of the largest gas pipe lines in the country is to be built by the Lone Star Gas Company—135 miles from Petrolia, Clay county, to Fort Worth. Twenty inches in diameter, the line will handle 100,000,000 cubic feet of gas daily, according additional services to the many cities and towns served by that company. This will give the company four lines into Dallas and Fort Worth, two of the others being 10-inch and one 16-inch.

NEW RAIL LINE PLANNED

Plans for the building of a new railroad from Abilene to Cross Plains have been announced from Abilene. The proposed new line is 45 miles in length, and connects with the Missouri, Kansas & Texas line.

The total cost of the project has been estimated at \$1,100,000. The road, if allowed by the Interstate Commerce Commission, will be built under the direction of Frank Kell, and he will also operate the rail line.

AIRPLANE SERVICE TEXAS TO MISSISSIPPI

Air service between Dallas, Texas, and Jackson, Miss., was put into operation a few weeks ago by the Delta Air Service, of Monroe, La. It is the intention of the operators to extend the line to Birmingham, Ala., in a short time. The announcement was made that airships would leave Dallas, east bound, on Mondays, Wednesdays and Fridays, and leave Jackson, Miss., west bound, on Tuesdays, Thursdays and Saturdays. The time between Dallas and Jackson is five hours and forty minutes, with stops at Shreveport and Monroe.

WORK IN PROGRESS ON RAILWAY EXTENSION

Work is now in progress on the extension of the Santa Fe railway line from San Angelo to Sonora, a distance of 65 miles. The contract was let a few weeks ago to the Lone Star Construction Company of San Antonio. The distance is 65 miles.

SHERMAN MAN GRANTED PATENT ON AIRPLANE ENGINE

B. L. Edds, of Sherman, has been granted a patent on a two-cycle radial type airplane engine. The working model is of 41 cubic inches displacement, 30 horse-power and 1,440 revolutions per minute. It is equipped with cylinders 1 3/16 inches bore and 2 3/4-inch stroke. The propeller blades are four feet long with pitch of 2 1/2 inches.

TO AID POLK COUNTY INDIANS

Under a bill passed by the Legislature the Alabama and Coushatti Indians are to receive aid from the State for the next two years. The Indians will receive \$30,000 for building fifty homes and \$7,500 for building twenty-six miles of fence. The Indians will also receive \$1,500 a year to pay half the salary of an agent, \$1,500 a year for a nurse, \$1,500 a year for dental and \$1,200 a year for medical service.

TEXAS FERTILIZER SALES

An increase of nearly 55,000 tons of fertilizer sales in Texas for the present crop year as compared with sales for the preceding year is shown in a report on fertilizer tag sales issued by Dr. G. S. Fraps who, as State chemist, has administration of the Texas fertilizer law. More than half of the fertilizer used in Texas is used for cotton. Dr. Fraps pointed out, much of the remaining being used for fruits and vegetables.

TEACHERS COLLEGE TO ERECT MEMORIAL

A campaign was recently inaugurated by the North Texas State Teachers' College, located at Denton, to raise funds for the purpose of building a tower on the college campus as a memorial to those of the college who lost their lives in the World War. It is planned to raise a fund of \$225,000 for this purpose. At last report the movement was meeting with splendid success.

PERMANENT AIRPORT FOR PECOS

Plans for the purchase of a permanent municipal airport for Pecos have been completed with the acquisition of a 150-acre tract one mile south of the city limits by the Chamber of Commerce. For the last few years Pecos has operated an adequate landing field which has served the many hundred planes which landed there, but because of the fact that the land could not be purchased, no permanent improvements were made. The new field is almost in the shape of a square, and will allow a half-mile runway in any direction.

WEALTH OF TEXAS INCREASES

\$100,000,000 ANNUALLY
Taxable values of Texas for the current year are \$4,144,446,118, according to an announcement by the State Comptroller of Public Accounts. This is the first time in history the State has reached the \$4,000,000,000 mark. Texas taxable values reached the \$3,000,000,000 mark for the first time in 1918, hence the average increase for the intervening years has been a little less than \$100,000,000 annually. This year, however, an increase of \$169,036,982 over last year is indicated.

GULF COMPANY PIPE LINE NEARLY FINISHED

The Gulf Pipe Line Company's West Texas line, from Midland to Port Arthur, a distance of approximately 450 miles of eight, ten and twelve-inch, which is being constructed in five sections, is now nearly completed. It is expected to have the line in operation by August 15 or a little later.

This new line will increase the Gulf's capacity from West Texas to the coast from 25,000 to 50,000 barrels daily. Five thousand of this, however, will be dropped off at Sweetwater to supply crude for the Gulf's refinery at that point.

GYPSUM MINED IN TEXAS

Total gypsum mined in Texas in 1928 was 509,472 tons, according to a recent release of Bureau of Mines, United States Department of Commerce. The total value of gypsum sold was \$3,094,145. Texas is the fourth ranking State in production of gypsum and has five gypsum plants.

Both gypsite, which is gypsum earth, and rock gypsum are recovered at most of these plants and among the products are the following gypsum products: Wallboard, sheetrock, lath, sheathing, plasters of many kinds, dryfill insulation, stucco, tile and gypsum cement. The Texas plants supply products, not only for a large market in this State, but ship extensively to Louisiana, Arkansas, Oklahoma and New Mexico.

BUTTON FACTORY FOR MERCEDES

A factory has been erected at Mercedes for the manufacture of buttons from shell taken from the canals and resacas about the city. A manufacturer has contracted also with the Cameron county water improvement district for shell to be taken from the canals around Cameron. A branch factory, it is said, will be erected by the Automatic Pearl Button Company, Muscatine, Iowa.

NEW CEMENT PLANT NEAR WACO

Manufacture of cement has started at the plant of the Atlas Portland Cement Company of Texas, nine and a half miles west of Waco. The plant will produce, it is estimated, 4,000,000 bags of cement a year, each bag having a weight of ninety-four pounds. Work on the construction of the plant, said to be one of the largest and most complete of its kind in the country, began several months ago. It represents an investment of about \$3,000,000.

NUMBER OF NEWSPAPERS IN TEXAS

At the beginning of the present year there were 944 newspapers and periodicals in Texas. Of these publications 121 were daily papers, one was issued tri-weekly, 29 semi-weekly, 617 weekly, nine semi-monthly, 74 monthly and eight quarterly. There were 80 publications listed under the head of periodicals, of which 77 were issued weekly and three semi-weekly.

Papers were printed in 572 Texas towns, of which 220 were county sites.

YOUNGEST COLLEGE STUDENT

The South Texas State Teachers' College, at Kingsville, Texas, claims one of the youngest college students in the United States in the person of William Conner, 13-year-old son of J. E. Conner, head of the history department of the college.

Young Conner was the youngest of the 81 students to graduate from the high school at Kingsville in May of the present year. He entered the teachers college for the summer term, taking Latin and two physics courses. He expects to complete his work leading to the Bachelor's degree at the age of 16.

The young man began his public school work when he was seven, starting in the fourth grade, and during his high school career made A or B in all subjects. He found chemistry his most interesting study in high school.

MINERALS IN TEXAS

Dr. Payne, consulting engineer of the American Mining Congress, who visited Texas recently, said there are not less than fifty valuable minerals in this State. The purpose of Dr. Payne's visit was to discuss with educational and business leaders the possibility of greater utilization of these great mineral resources.

The total annual value of the minerals produced in Texas is now around \$400,000,000. Of this amount \$70,000,000 is represented by production of minerals other than petroleum. Though this figure does not look large in comparison with the whole, yet it is large enough to give Texas the rank of approximately twelfth among the States of the union on the basis of mineral values, even if no petroleum was produced in the State. Texas, according to the latest reports of the Bureau of Mines, ranks fourth among the States in mineral values.

Undoubtedly the greater part of the Texas mineral wealth is still undeveloped.

TEXAS' FUEL RESOURCES

Texas is an outstanding State as a producer of fuels. It is one of the leading petroleum and natural gas producing States, and has a vast reserve of lignite, with an appreciable amount of bituminous coal.

The greatest bituminous coal area of the State lies in North Central and Middle Western Texas, in some fifteen or twenty counties, having an estimated total volume of 8,000,000,000 tons. The principal production has been from Erath, Palo Pinto, Wise and Young counties. Undoubtedly this would have been a far greater industry today than it is had it not been for the fact that one of the country's greatest petroleum fields was discovered in this region. A sub-bituminous grade of coal, known as cannel coal, is mined near Eagle Pass, in Maverick county, and near Laredo, in Webb county. The greatest coal field of Texas, however, is the great lignite belt which stretches across the State approximately from Laredo to Texarkana. Twenty or more mines are in operation in this region in Bastrop, Milam, Henderson, Hopkins, Harrison and other counties. The recent discovery of the value of this fuel, when fed under boilers in powdered form, has greatly advanced it in the estimation of engineers as an industrial fuel. Large electric generating plants located in Henderson and Comal counties are now operating with lignite.

CHEESE AND MILK PLANTS IN TEXAS

A few weeks ago a cheese factory, which will turn out 1,000 pounds of cheese daily, was opened at Abernathy, Hale county. New cheese and prepared milk enterprises constitute the outstanding industrial development of Texas in recent months, more than \$2,000,000 having been invested. Kraft cheese plants are located at Wichita Falls and Denison, and local plants are in operation at Valley Mills, Round Rock, Taylor and one or two other points besides Abernathy, heretofore mentioned. Allied enterprises are the Borden Milk plant at Waco, the milk plants of the Douthitt interests at Marshall and Tyler, and the Meadolake plant at Sherman. The Carnation Milk Company is erecting a factory at Schulenberg and will shortly begin the erection of a plant at Sulphur Springs.

NAMES OF A TEXAS COUNTY

Cass county, like several other East Texas counties, has had several names. It was known as Paschal county under the old Spanish reign from 1824 to 1836. Under the Republic of Texas, from 1836 to 1845, it was known as a part of Red River county, which at that time embraced Red River, Cass, Bowie, Marion, Morris, Titus and Franklin territory. When Texas was admitted to the union in 1846, Cass county was named, and embraced Marion and Bowie counties, and Jefferson was the county site until 1852, when Linden was made the county capitol. Marion and Bowie counties were cut off from Cass county during the 50's. The legislature in session December 17, 1861, changed the name of Cass county to Davis county, and it was changed back to Cass county by an act of the legislature May 16, 1871.

THE NEW BUILDINGS FOR BAYLOR COLLEGE

Work is now in progress on two new buildings for Baylor College, Belton. One of the new structures is to be a building for student activities, the other is to be known as Presser Music Hall. It is hoped to have both buildings ready for the beginning of the fall term of the school.

The Student Activity Building has been named in honor of Dr. J. C. Hardy, who has been president of the College seventeen years. At the ground-breaking for this structure Dr. Hardy, Mrs. Annie Whitfield, who has been the college dietitian twenty years, and Mrs. Elli Moore Townsend, who was graduated from the college fifty years ago, lifted shovels of dirt from the site.

For the Presser Music Hall the Presser Foundation made a contribution of \$50,000, and Mr. and Mrs. Kokernot, of San Antonio, a gift of \$25,000.

PIONEER BROOM FACTORY AT ROUND ROCK

One of the pioneer manufacturing plants in Texas is the broom factory at Round Rock, Williamson county. This factory was established in 1876 and has been in continuous operation. It is said to be the largest plant of its kind in the State. The factory had its beginning in a small plant with a floor area of only 400 square feet. Today it has 17,300 square feet and makes over a half million brooms a year.

The broom corn comes from Oklahoma (although Texas can grow broom corn), some of the handles from the fir forests of Washington, some from Louisiana pine and others from the bamboo thickets of China. The cord, white and colored, comes from the cotton mills of Georgia.

The wire used to bind the stub of the brush comes from Pennsylvania. The paper labels that denote the brand of the product are lithographed in Indiana from paper made in the mills of Minnesota. The brooms for shipment are wrapped in burlap that comes from India, or paper that was made from trees that grow in Canada.

TEXAS CITIES, TOWNS AND VILLAGES, 3,136

Recent publication of the principal commercial rating concerns show that there are about 3,136 cities, towns and villages in Texas. The figures given include everything from the largest city in the State to the smallest cross roads distribution center. There are approximately 92,500 business concerns in the State, including industrial, commercial, financial, mining and all others.

Approximately two-thirds of the total number of distribution centers listed by the large credit-rating concerns are found also in the postoffice guide. Approximately 975 of these places have State or National banks, and about two-thirds as many are incorporated municipalities. Texas has within its bounds more counties, as well as more commercial centers of all sizes, than any other State.

The number of postoffices, number of banks, and number of distribution centers of all sizes has decreased steadily since 1920 in Texas and throughout the United States.

NEW BRIDGE ACROSS COLORADO

The contract has been let for the construction of a bridge across the Colorado River at Wharton, Wharton county. The contract was awarded the Austin Bridge Company of Dallas. The contract was let by the State for the sum of \$246,137. Under the provisions of the contract the bridge must be completed within 240 working days after the issuance of the work order.

The job will require 967,000 pounds of steel. One of the spans will be 320 feet, one 150 feet and one 80 feet. The foundation for the large span on each end is to be 29 feet in diameter, and will be sunk 60 feet below the water. Concrete tressels are used at both ends.

BIG SPRING TO DEDICATE AIRFIELD

Plans have been made by the Big Spring Airport Company, Inc., and the Chamber of Commerce to dedicate the Big Spring airport, known as Wilcox field, on August 23 and 24. There is under construction on the field two hangars, 60x80 and 80x100 feet, machine shop 40x60 feet and a five-room administration building. The field will be lighted by flood, beacon and boundary lights, and when completed will meet the requirements of the Department of Commerce as an A-1 landing field.

Flying celebrities will be asked to take part in the program on these days.

TEXAS INCREASES PRODUCTION OF CARBON 100 PER CENT

Figures released by the United States Department of Commerce recently show that Texas produced 100,828,000 pounds of carbon black in 1928 as against 56,396,000 in 1927. Louisiana still ranks ahead of Texas with 136,320,000 pounds production in 1928, as against 124,188,000 pounds for 1927. With the construction of several large plants in the Binger vicinity since the first of the present year, it seems probable that Texas will lead the entire country in carbon black production from natural gas during the current year.

The value of the Texas carbon, at the plants, was given at approximately \$5,540,000. The value of the production of the entire United States was given at \$13,782,000, the total output in the United States being 248,792,000 in 1928, as against 198,429,000 in 1927. Wyoming, Kentucky and West Virginia are the leading States outside Texas and Louisiana, but the two last mentioned States produce about 95 per cent of the total. The estimated quantity of natural gas used in the United States in the manufacture of carbon black was 175,137,000,000 cubic feet. About 75,000,000,000 cubic feet were consumed in Texas.

Most of the carbon black produced in Texas is utilized in the manufacture of automobile tires, though there are hundreds of other uses. About 25 per cent of the Louisiana-Texas production is exported.

Current Comment

(Continued from Page 3.)

ber of people employment, crops that contribute far more coin to the country's till, crops that make it possible for more merchant ships to plough the waters of the trackless seas, but there is no crop that does so much to dissipate the aches and gastronomic disturbances of man than the humble turnip crop. The parching of this succulent, toothsome foliage of the homely rutabaga is a catastrophe as dire as a seismic disturbance, a calamity as terrible as the ravages of insects or the sweeping of mad flood waters. I have seen man held in the cruel grip of dyspepsia. There was a hollowness in his eyes that stared like dark abysses. His lips curled into a frown that would frighten a lean wolf from a chicken coop, and his saffron-hued cheeks gave evidence of the poison of malaria. I have seen this same man, after a week's diet of turnip greens, change from a grinning skeleton to a laughing Judge Taft. Sunny smiles played about his face, his step was as quick and graceful as the gazelle's, and his twinkling eyes spoke the joys that his innards felt. No liver is so grouchy, no stomach so sensitive, no organ of digestion or assimilation so overworked or out of repair that a liberal feed of turnip green will not be welcomed, even as a sweetheart welcomes a lover's kiss, or a sorrow-stricken soul welcomes a friendly hand-clasp. I have "paced much this weary mortal round" and suffered most of the pains known to the human frame. Of sourness of stomach, of shooting pains that play hide and seek with the vermiform appendix for home base, of the lead-like fullness and all the horrors of indigestion I have had my share, but even these can not chase away the memories of happy days of yore, when with the big dish of turnip greens, the big oven of candied potatoes and the big pitcher of buttermilk before me, I could remove every suspicion of hunger, defy the laws of gastronomy and laugh to scorn the doctor's solemn warnings.

CITRUS PACKING PLANT

Construction of a new packing plant for the Texas Citrus Fruit Growers' Exchange has been started at La Feria.

SHIP POWDERED MILK

One car of processed milk powder has been shipped to the Philadelphia market from the Tennessee plant at Decatur, Texas, preceded by two carloads of sweet cream.

AIRPORT FOR KERRVILLE

Recently Kerrville's new airport was formally opened. The airport was a gift to the community by Louis Schreiner, a Kerrville banker. The landing field contains 118 acres.

FINE HOTEL FOR NACOGDOCHES

Arrangements have virtually been completed for the erection of an eight-story hotel at Nacogdoches. The new hotel would have 116 rooms and the cost would be approximately \$400,000.

PESTS IN PECAN ORCHARDS

The walnut caterpillar has ruined hundred of pecan trees in Texas in recent years, according to C. B. Nickels, associate entomologist, United States Department of Agriculture, at Brownwood.

LARGEST AND SMALLEST COUNTIES

Brewster is the largest county in Texas, its area being 3,798,400 acres, which is the equivalent of 5,935 square miles. Rockwall is the smallest county in Texas, having 95,360 acres, or 147 square miles.

TEXAS RAINFALL

Average rainfall over Texas as a whole is 31.08 inches. There is a difference of 35 inches between the annual rainfall in extreme East and extreme West Texas—the Beaumont area showing 45 inches and the El Paso area 10 inches.

MONUMENT FOR DAVY CROCKETT

The Texas Legislature voted an appropriation of \$100,000 to erect a monument, at Crockett, in honor of the hero of the Alamo. The Senate resolution called for a monument of Texas granite, to be erected in a 48-acre park along the old San Antonio road. The park was a camping place of Crockett, when he was on his way to San Antonio to battle for Texas independence.

TEXAS SEVENTH IN AUTOS

Texas stands seventh in automobile registrations, with 1,214,297 motor vehicles licensed to use its roads. New York is first with 2,083,942, and California, Ohio, Pennsylvania, Illinois and Michigan follow in order ahead of Texas. Oklahoma, with 829,843, is nearest to Texas in the South and Southwest, and North Carolina, with 464,376, leads in the "Old South."

ONLY QUAKER COLONY IN TEXAS

The only Quaker colony in Texas was founded thirty years ago at Friendwood, near Houston. In 1889 F. C. Brown came to Texas from Iowa and located at what is now Friendwood, where he founded Friends Academy. He was a minister of the Quaker sect. A little later he was joined by 60 or 70 Quaker families, that became the nucleus of Friendwood. Mr. Brown died a few weeks ago at the age of 79.

NEW GAS LINE

One of the largest gas pipe lines in the country is to be built by the Lone Star Gas Company—135 miles from Petrolia, Clay county, to Fort Worth. Twenty inches in diameter, the line will handle 100,000,000 cubic feet of gas daily, according additional services to the many cities and towns served by that company. This will give the company four lines into Dallas and Fort Worth, two of the others being 10-inch and one 16-inch.

NEW RAIL LINE PLANNED

Plans for the building of a new railroad from Abilene to Cross Plains have been announced from Abilene. The proposed new line is 45 miles in length, and connects with the Missouri, Kansas & Texas line.

The total cost of the project has been estimated at \$1,100,000. The road, if allowed by the Interstate Commerce Commission, will be built under the direction of Frank Kell, and he will also operate the rail line.

AIRPLANE SERVICE TEXAS TO MISSISSIPPI

Air service between Dallas, Texas, and Jackson, Miss., was put into operation a few weeks ago by the Delta Air Service, of Monroe, La. It is the intention of the operators to extend the line to Birmingham, Ala., in a short time. The announcement was made that airships would leave Dallas, east bound, on Mondays, Wednesdays and Fridays, and leave Jackson, Miss., west bound, on Tuesdays, Thursdays and Saturdays. The time between Dallas and Jackson is five hours and forty minutes, with stops at Shreveport and Monroe.

WORK IN PROGRESS ON RAILWAY EXTENSION

Work is now in progress on the extension of the Santa Fe railway line from San Angelo to Sonora, a distance of 65 miles. The contract was let a few weeks ago to the Lone Star Construction Company of San Antonio. The distance is 65 miles.

SHERMAN MAN GRANTED PATENT ON AIRPLANE ENGINE

B. L. Edds, of Sherman, has been granted a patent on a two-cycle radial type airplane engine. The working model is of 41 cubic inches displacement, 30 horse-power and 1,440 revolutions per minute. It is equipped with cylinders 1 3/16 inches bore and 2 3/4-inch stroke. The propeller blades are four feet long with pitch of 2 1/2 inches.

TO AID POLK COUNTY INDIANS

Under a bill passed by the Legislature the Alabama and Coushatti Indians are to receive aid from the State for the next two years. The Indians will receive \$30,000 for building fifty homes and \$7,500 for building twenty-six miles of fence. The Indians will also receive \$1,500 a year to pay half the salary of an agent, \$1,500 a year for a nurse, \$1,500 a year for dental and \$1,200 a year for medical service.

TEXAS FERTILIZER SALES

An increase of nearly 55,000 tons of fertilizer sales in Texas for the present crop year as compared with sales for the preceding year is shown in a report on fertilizer tag sales issued by Dr. G. S. Fraps who, as State chemist, has administration of the Texas fertilizer law. More than half of the fertilizer used in Texas is used for cotton. Dr. Fraps pointed out, much of the remaining being used for fruits and vegetables.

TEACHERS COLLEGE TO ERECT MEMORIAL

A campaign was recently inaugurated by the North Texas State Teachers' College, located at Denton, to raise funds for the purpose of building a tower on the college campus as a memorial to those of the college who lost their lives in the World War. It is planned to raise a fund of \$225,000 for this purpose. At last report the movement was meeting with splendid success.

PERMANENT AIRPORT FOR PECOS

Plans for the purchase of a permanent municipal airport for Pecos have been completed with the acquisition of a 150-acre tract one mile south of the city limits by the Chamber of Commerce.

For the last few years Pecos has operated an adequate landing field which has served the many hundred planes which landed there, but because of the fact that the land could not be purchased, no permanent improvements were made. The new field is almost in the shape of a square, and will allow a half-mile runway in any direction.

WEALTH OF TEXAS INCREASES \$100,000,000 ANNUALLY

Taxable values of Texas for the current year are \$4,144,446,118, according to an announcement by the State Comptroller of Public Accounts. This is the first time in history the State has reached the \$4,000,000,000 mark. Texas taxable values reached the \$3,000,000,000 mark for the first time in 1918, hence the average increase for the intervening years has been a little less than \$100,000,000 annually. This year, however, an increase of \$169,036,932 over last year is indicated.

GULF COMPANY PIPE LINE NEARLY FINISHED

The Gulf Pipe Line Company's West Texas line, from Midland to Port Arthur, a distance of approximately 450 miles of eight, ten and twelve-inch, which is being constructed in five sections, is now nearly completed. It is expected to have the line in operation by August 15 or a little later.

This new line will increase the Gulf's capacity from West Texas to the coast from 25,000 to 50,000 barrels daily. Five thousand of this, however, will be dropped off at Sweetwater to supply crude for the Gulf's refinery at that point.

GYPSUM MINED IN TEXAS

Total gypsum mined in Texas in 1928 was 509,472 tons, according to a recent release of Bureau of Mines, United States Department of Commerce. The total value of gypsum sold was \$3,094,145. Texas is the fourth ranking State in production of gypsum and has five gypsum plants.

Both gypsite, which is gypsum earth, and rock gypsum are recovered at most of these plants and among the products are the following gypsum products: Wallboard, sheetrock, lath, sheathing, plasters of many kinds, dryfill insulation, stucco, tile and gypsum cement. The Texas plants supply products, not only for a large market in this State, but ship extensively to Louisiana, Arkansas, Oklahoma and New Mexico.

BUTTON FACTORY FOR MERCEDES

A factory has been erected at Mercedes for the manufacture of buttons from shell taken from the canals and resacas about the city. A manufacturer has contracted also with the Cameron county water improvement district for shell to be taken from the canals around Cameron. A branch factory, it is said, will be erected by the Automatic Pearl Button Company, Muscatine, Iowa.

NEW CEMENT PLANT NEAR WACO

Manufacture of cement has started at the plant of the Atlas Portland Cement Company of Texas, nine and a half miles west of Waco. The plant will produce, it is estimated, 4,000,000 bags of cement a year, each bag having a weight of ninety-four pounds. Work on the construction of the plant, said to be one of the largest and most complete of its kind in the country, began several months ago. It represents an investment of about \$3,000,000.

NUMBER OF NEWSPAPERS IN TEXAS

At the beginning of the present year there were 944 newspapers and periodicals in Texas. Of these publications 121 were daily papers, one was issued tri-weekly, 29 semi-weekly, 617 weekly, nine semi-monthly, 74 monthly and eight quarterly. There were 80 publications listed under the head of periodicals, of which 77 were issued weekly and three semi-weekly.

Papers were printed in 572 Texas towns, of which 220 were county sites.

YOUNGEST COLLEGE STUDENT

The South Texas State Teachers' College, at Kingsville, Texas, claims one of the youngest college students in the United States in the person of William Connor, 13-year-old son of J. E. Connor, head of the history department of the college.

Young Connor was the youngest of the 81 students to graduate from the high school at Kingsville in May of the present year. He entered the teachers college for the summer term, taking Latin and two physics courses. He expects to complete his work leading to the Bachelor's degree at the age of 16.

The young man began his public school work when he was seven, starting in the fourth grade, and during his high school career made A or B in all subjects. He found chemistry his most interesting study in high school.

MINERALS IN TEXAS

Dr. Payne, consulting engineer of the American Mining Congress, who visited Texas recently, said there are not less than fifty valuable minerals in this State. There is under construction on the field two hangars, 60x80 and 80x100 feet, machine shop 40x60 feet and a five-room administration building. The field will be lighted by flood, beacon and boundary lights, and when completed will meet the requirements of the Department of Commerce as an A-1 landing field.

Flying celebrities will be asked to take part in the program on these days.

TEXAS INCREASES PRODUCTION OF CARBON 100 PER CENT

Figures released by the United States Department of Commerce recently show that Texas produced 100,828,000 pounds of carbon black in 1928 as against 56,396,000 in 1927. Louisiana still ranks ahead of Texas with 136,320,000 pounds production in 1928, as against 124,188,000 pounds for 1927. With the construction of several large plants in the Borger vicinity since the first of the present year, it seems probable that Texas will lead the entire country in carbon black production from natural gas during the current year.

The value of the Texas carbon, at the plants, was given at approximately \$5,540,000. The value of the production of the entire United States was given at \$13,782,000, the total output in the United States being 248,792,000 in 1928, as against 198,429,000 in 1927. Wyoming, Kentucky and West Virginia are the leading States outside Texas and Louisiana, but the two last mentioned States produce about 95 per cent of the total. The estimated quantity of natural gas used in the United States in the manufacture of carbon black was 175,137,000,000 cubic feet. About 75,000,000,000 cubic feet were consumed in Texas.

Most of the carbon black produced in Texas is utilized in the manufacture of automobile tires, though there are hundreds of other uses. About 25 per cent of the Louisiana-Texas production is exported.

(Continued from Page 3.)

ber of people employment, crops that contribute far more coin to the country's till, crops that make it possible for more merchant ships to plough the waters of the trackless seas, but there is no crop that does so much to dissipate the aches and gastronomic disturbances of man than the humble turnip crop. The parching of this succulent, toothsome foliage of the homely rutabaga is a catastrophe as dire as a seismic disturbance, a calamity as terrible as the ravages of insects or the sweeping of mad flood waters. I have seen man held in the cruel grip of dyspepsia. There was a hollowness in his eyes that stared like dark abysses. His lips curled into a frown that would frighten a lean wolf from a chicken coop, and his saffron-hued cheeks gave evidence of the poison of malaria. I have seen this same man, after a week's diet of turnip greens, change from a grinning skeleton to a laughing Judge Taft. Sunny smiles played about his face, his step was as quick and graceful as the gazelle's, and his twinkling eyes spoke the joys that his innards felt. No liver is so grouchy, no stomach so sensitive, no organ of digestion or assimilation so overworked or out of repair that a liberal feed of turnip green will not be welcomed, even as a sweetheart welcomes a lover's kiss, or a sorrow-stricken soul welcomes a friendly hand-clasp. I have "paced much this weary mortal round" and suffered most of the pains known to the human frame. Of sourness of stomach, of shooting pains that play hide and seek with the vermiform appendix for home base, of the lead-like fullness and all the horrors of indigestion I have had my share, but even these can not chase away the memories of happy days of yore, when with the big dish of turnip greens, the big oven of candied potatoes and the big pitcher of buttermilk before me, I could remove every suspicion of hunger, defy the laws of gastronomies and laugh to scorn the doctor's solemn warnings.

FIRST AIR NAVIGATION IN TEXAS

The first successful attempt to navigate the air in Texas was made by Frank Goodall, in a dirigible balloon, October 18, 1909. Starting at the fair grounds in Dallas, the air navigator sailed over the city of Dallas and back again, a distance of about five miles, and descended without accident. The dirigible was 54 feet long and 13½ feet across. The motive power was furnished by a small gasoline engine which weighed 52 pounds.

A LITTLE FUN Jokes to Make You Laugh

In the Poultry Yard

Old Hen—"Let me give you a piece of good advice."
Young Hen—"What is it?"
Old Hen—"An egg a day keeps the ax away."

What Lem Saw

Lem Frisby, who has just returned from his vacation, says there are poor people in the Tennessee mountains who live in such dilapidated shacks that every time it rains they have to go out and get in the sedan.

How the English Advertise

While visiting London Slim Slokum was greatly impressed with the way the English advertise. Walking down the Strand one day he noticed two bakeries next door to each other. In the window of one it said: "We serve bread to His Majesty, the King." On the other window it said: "God Save the King."

A Tale of Tails

Rastus: "Here am a telegram from de boss in Africa. He say dat he's sending us some lions' tails."
Circus Owner's Wife: "Lions tails, Rastus? What are you talking about?"
Rastus: "Well, read it yourself. It say plain: 'Jest captured two lions. Sending details by mail.'"

Home-Raised

Lady Customer—"How much are these chickens?"
Butcher—"A dollar and a half."
Lady Customer—"Did you raise them yourself?"
Butcher—"Yes, they were \$1.25 yesterday."

At the Altar

"Dinah, wilt thou take Erastus for thy wedded husband to have and to hold from this day forward, for better, for worse, for richer, for poorer, in sickness, in health, to love, cherish and obey, 'till death do you part?"
"No, sah, I takes him jest as he is. If he gets any better he'll go to heaben. If he gets any worse I'll jest bust him on de head."

Tragedy

Two faces were close together, the man's grim, tense; the other face was small and white, with two slender hands pressed tightly against it. It was those frail hands that riveted the man's horrified gaze.
"Lost!" he said staring, and in his voice was hopeless, stark tragedy; for that other face was the face of his watch, and those little hands told him that he had missed the last train home.

No Faculty Plus No Students

The college assembly had gathered. The members of the faculty were seated on the platform and the students were having a lively time singing college songs. With great enthusiasm they joined in the song:
"In heaven above where all is love
There will be no faculty there."
After enjoying the fun for awhile, a member of the faculty arose and said, "Of course, there will be no faculty in heaven, for there will be no students there."

POULTRY FACTS By F. W. KAZMEIER Poultry Breeder, Bryan, Texas.

Feed More Grain and Less Mash to Early Hatched Pullets

Each year more people are hatching chicks earlier, because they are more profitable, also easier to raise. White Leghorn pullets hatched before April unless handled properly will go into a premature or so-called neck moult. Sometimes the moult is more extensive. To prevent this premature moult, we recommend a much more liberal feeding of grains, and a decreased feeding of mash. The idea is to keep the pullets from starting to lay too early or too soon. Decreasing the feeding of all mash mixtures will help accomplish this. It may be that you can accomplish the desired results by feeding one-third mash and two-thirds grain—based on daily consumption. If this proportion does not seem to hold them back enough, then feed only grains and liberal quantities of succulent green food and plenty of fresh water.

Forced Feeding.
Forced feeding of early hatched pullets is a very great mistake. It matures the pullets too fast—sometimes stunting them in size. Forced feeding of early hatched pullets for rapid development causes them to lay too early and too heavy. The result is the pullets soon start losing body weight—and then trouble begins. Heavy production of these pullets, because of too heavy feeding of mash feeds, high in protein—is responsible for a lowered vitality and resistance—because of heavy strain due to laying—as a result such pullets often are more subject to chicken pox and colds. Heavy production reduces body weight, decreases resistance to disease and very generally paves the way to the dreaded neck moult. A gradual but continued loss of body weight in early hatched pullets, due to laying or other causes at this time of the year, leads directly to the premature moult. It is nature's way of protecting the pullet from a complete breakdown. One way to keep up body weight is to

At Least the Ad Was Read

"Do you find that advertising brings quick results?"
"I should say it does! The other day we advertised for a night watchman, and that night the safe was robbed."

Many More Jude Johnsons

Jude Johnson called on the Atchison Globe the other day, the editor reports, and laid before the staff a plan as to how the federal government should re-finance itself. Before he departed Jude borrowed two bits from the editor.

They Fixed It

"Half the City Council Are Crooks," was the glaring headline.
A retraction in full was demanded of the editor under penalty of a libel suit.
Next afternoon the headline read: "Half the City Council Aren't Crooks."

A filling-station owner tells us that tourists stop for free crankcase service, free information, free air, free water, and blame him for the condition of the roads.

Needed Spiritual Strength

"Rastus," said the negro minister, "dis am de fast time Ise ebber seen yo' in dis here church, an' Ise mighty glad to hab you here."
"Parson," replied Rastus, "Ah jest had to come. Ah surely needs strength 'cause Ah's got a job hauling water-melons to de loadin' cars and it's ten miles to de railroad."

Horse vs. Donkeys

The students of an old Virginia college placed a horse in the classroom of one of the old professors one night. They gathered in the professor's lecture room at the recitation hour on the next day with great anxiety to listen to his comments on the practical joke. After the roll call the old professor said, "My lecture room was highly honored last night: A horse spent the night here. Ordinarily it is occupied by donkeys."

The Peaceful Celt

Two County Cork boys were in a mopping-up party that had followed the main assault. In a large shell hole they found a group of ten or twelve Germans sound asleep, apparently missed by the first wave.

"Well," said Sean, "shall we shoot 'em or stick 'em?"
"Ho, hum," said Dennis, looking up at the sky, "it's a foine day. Let's wake 'em up and have a foight."

Potent Stuff

Two tramps, walking along the railroad, found a bottle of high powered moonshine. One took a drink and passed it to the other. And so forth, until the bottle was empty.
After awhile one puffed out his chest and said, "You know, Bill, tomorrow I'm going to buy this railroad. I'm going to buy all the railroads in the country, all the automobiles, all the steamships—everything. What do you think of that?"
Bill looked at his companion disparagingly and replied, "Impossible, can't do it."
"Why not?"
"I won't sell."

feed more liberally on grains and grain mixtures and decreasing the consumption of forcing mash or rations high in protein like most egg mashers. It may be necessary to place the early pullets on an exclusive grain ration supplemented with green food—fresh water, shade and clean environments. Leghorn stock is not alone subject to this premature moult under these conditions. It also applies to such breeds as Rocks and Reds.

Worms and Vermin.
Feeding too heavily on mash is not the only cause of pullets losing in body weight. Remember the successful handling of pullets for greatest profit requires you to hold or maintain their body weight. Pullets infested with intestinal worms are sure to lose body weight and be subject to the neck moult in the fall or early winter. Examine several of the lightweight individuals in the flock—especially the contents of intestines for intestinal worms. If these are found give two individual treatments 10 days or two weeks apart. Use any of the reliable worm remedies for individual treatment in preference to flock treatment. Other factors that may cause the birds to lose weight and thus contribute to a premature moult are heavy vermin infestation, such as lice and mites, crowding in houses—on roosts or around feed troughs, and keeping more than one size or age in a flock.

Shade and Green Food
A liberal supply of succulent and tender green food will mean much to your flock. Better make some plans now for a fall pasture, since you are too late already for growing summer green food. For summer green food Sudan grass is good and grows better in hot dry weather than most of the grasses. In the fall oats as a green pasture or barley or wheat is very desirable. Now is the time to prepare for that.
Natural shade is of course best but, if not available, artificial shade should by all means be provided. All it requires on your part is a little work and planning. There are many ways of providing artificial shade. All require the expenditure of a little elbow grease and brow perspiration on the part of somebody.

IMPROVEMENTS AT SUGAR LAND

Civic improvements at Sugar Land, Texas, have made rapid strides during the first half of 1929, according to a recent survey made of that busy industrial community. There have been completed twenty-four brick and twenty-one frame residences, with many more either in the course of construction or contemplated. The activity in building is mainly due to the employment of many additional workers by the Imperial Sugar Company.

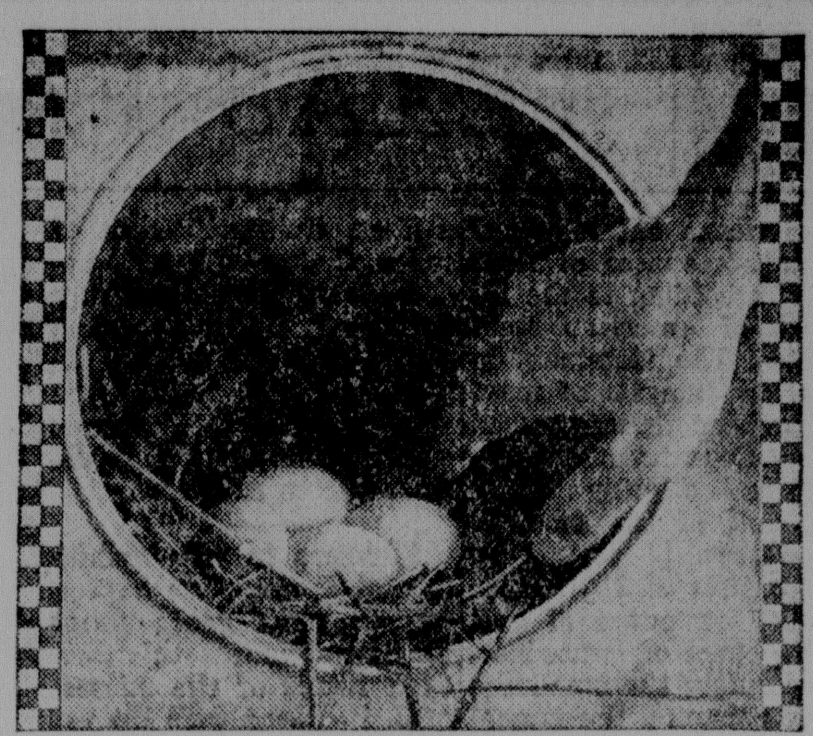

In keeping with the residential demand, a large program of paving in the downtown business section of the city is under way. Concrete street paving, building of sidewalks, laying of storm and sanitary sewers is being rapidly pushed by contractors, together with connections with the residential streets and putting in of railroad crossings.

In addition to above improvements, radio station K P R C, of Houston, is constructing a new transmitter station at Sugar Land, representing an expenditure of nearly \$100,000.00.

DAIRY FARM WITHOUT A COW

About thirty miles from San Antonio there is a dairy farm, on which there is not a cow. This dairy farm is owned by Mrs. L. O. Johnson and the milk is supplied by purebred Nubian milch goats. These goats are noted more for the richness of their milk than for the quantity furnished.

Goat milk is used in hospitals, for invalids, young children and babies. It is easily digested, since the fat globules are but one-fifth as large as those in cow's milk. It requires but twenty minutes for digestion, while cow's milk requires about two hours. There is a heavy demand for the goat milk and it sells for 30 cents a quart in San Antonio.

Who Said Luck?

The neighbors always say "lucky" when Purina-fed pullets begin laying and paying in the early fall. "Luck" they say when Purina-fed flocks keep nests full all winter.

Call it luck if you will . . . but be lucky. It pays. Feed your pullets Purina Growena and Intermediate Hen Chow. Build up the egg factories now so they will be ready to make you "lucky" when egg prices go up.

WORLD'S LARGEST SELLING INSECTICIDE

Stanco, Inc. 1929

TEXAS FARM NEWS

Americans eat an average of six ounces of meat a day, according to the Institute of American Meat Packers. The statement is based on analysis of meat consumption figures issued by the Department of Agriculture. Slightly more than half of the amount, 3 1/4 ounces, is pork. The rest consists of 2 1/2 ounces of beef, 1-3 ounce of veal and 1/4 ounce of lamb. Notwithstanding the smallness of the amounts, the annual consumption of meat last year averaged 138 pounds per capita, or a total of more than 16,500,000,000 pounds for the entire population.

To provide plenty of home-grown fruits so that farm families in Fannin county may come up to the standard of adequate diet, Miss Eldridge, home demonstration agent for the county, started an orchard and small fruit planting program last year, which has resulted in the planting of 20,570 trees and small fruits by 500 women. The home demonstration clubs of the county set as a goal the planting of at least six kinds of fruits by each member, and in eleven clubs this goal was reached. The goal was far exceeded as a whole, however, for the 500 women set out an average of 41 fruits each. Land owners in many cases furnished their tenants fruit trees, and committees of women in each community made it their business to assist those who were financially unable to purchase plants and trees. Strawberries lead the list of plantings, followed by blackberries, dewberries, grapes, peaches, plums, pecans, figs, pears, cherries, raspberries, apples, apricots, nectarines, currants and peaches.

More than 300 cars of cedar timber will be shipped out of San Saba county this year, and will bring thousands of dollars to farmers. The timber is shipped as posts, and from one to twenty posts are obtained from each tree.

Farmers in the vicinity of Hot Springs are expecting to grow green beans for fall shipment this year as a result of the success of J. F. Reece with his fall bean crop last year. Mr. Reece grew an acre of Kentucky Wonder beans last year, producing 244 bushels. He sold his crop at an average of 3 cents a pound, securing a gross receipt of \$205 for the acre.

Charles Meuer, a farmer who resides near Fredericksburg, reports that in proportion to time and labor spent, five acres of top-worked pecans made him more money than any other five acres on his farm. Five years ago he began budding native trees to papershell varieties, and last year he sold 1000 pounds of pecans at 35 cents a pound. Native nuts brought only nine to ten cents per pound.

Retail food prices for the spring of this year were slightly lower than in the same month last year and were approximately four points lower than in 1927, according to the Bureau of Labor Statistics. Food prices as a rule declined during the spring months as poultry and dairy products and fresh vegetables became more plentiful, rising again in mid-summer as these commodities grow scarce. The downward trend this year has been slower than last, but prices have gone to somewhat lower levels.

Eighteen head of registered Jerseys, ten young animals and eight heifers, imported from Jersey Island, arrived in Denison recently, and were placed on Grayson county farms. This is the largest single shipment of registered cattle ever received in North Texas.

Texas was the fourth largest shipper of dressed poultry to the Chicago market in May, according to the report of the Bureau of Agricultural Economics. Texas sent to Chicago 209,943 pounds for the month, compared to 546,000 from Iowa, 369,000 from Missouri, and 318,000 from Kansas.

Ground maize heads were worth \$86 per ton when properly balanced and fed to a wellbred beef calf, a demonstration carried on by J. C. Northcutt, 4-H club member of a Michigan community, as the report of the county agent shows. Last fall Northcutt bought a 579-pound Hereford calf just off the range for \$50. He fed it ground maize heads, cotton seed meal, hulls, cake, and a small amount of blackstrap molasses, and after 134 days on feed it had gained 271 pounds. It sold for \$119.85. The calf made an average daily gain of 2.01 pounds and produced a pound of gain for 11 cents. To make this gain the calf ate feed as follows: 733 pounds of hulls at \$10 per ton cost \$3.66; 733 pounds of sorghum fodder at \$12 cost \$4.39; 1175 pounds of maize at \$20 cost \$11.75; 338 pounds of meal at \$46 cost \$77.77; 94 pounds of molasses at \$45 cost \$2.12; commercial sweet feed costing 55 cents. Total feed cost of the calf \$30.24.

James Uland, a young farmer who lives near Plano, Collin county, milks only one Jersey cow, but sells more than a dollar's worth of cream a day, besides providing butter for his own table. Last month he sold \$36.45 worth of cream from the one cow.

In Newton county, J. B. Dorman, county agent, tells of a demonstrator, W. D. Roberts, of Lee's Mill, who plowed ten acres of cotton instead of chopping, at a saving of seven days labor. A six-inch buzzard sweep was used directly across the rows, after which three hands thinned the cotton to a stand in one day.

One of the big deals of the year in the Uvalde section was consummated recently when J. E. Robbins, of Camp Wood, sold to A. N. Welch 7,100 head of Angora muttons at \$4.50 a head. Included in the transaction was the salt and transfer of a four-year lease on thirty and one-half sections of land comprising the Connell, Miles and Richardson Well ranches.

Chinese red cow peas, used extensively in South Texas as a dairy feed and soil builder, are being successfully grown by R. L. Rains and J. R. Burkett, Lynn county farmers. Mr. Rains has raised the peas for three years. The first year he harvested two tons, the crop being planted in May and harvested in August. Last year he planted cow peas every third row with his maize. After harvesting the maize, dairy stock grazed the field, and then the stalks and peas were plowed under to furnish the soil needed legumes. Chinese red cowpeas are drought-resisting and were imported years ago by the United States Department of Agriculture and developed by Texas experiment stations. They mature in about 65 days.

Proof that Texas farmers are diversifying more than ever is given in a report by the government statistician at Austin. This report estimates that 12,423,000 acres will be planted this year to crops other than cotton. Estimates of these crops, already planted and to be planted, are as follows: Corn, 4,297,000 acres; grain sorghums, 2,815,000 acres; winter wheat, 2,576,000 acres; oats, 1,472,000 acres; barley, 172,000 acres; tame hay, 605,000 acres; sweet potatoes, 114,000 acres; peanuts, 160,000 acres; rice, 175,000 acres; in addition to substantial acreage in watermelons, Irish potatoes, sorghum forage, cabbage, onions and a variety of garden crops.

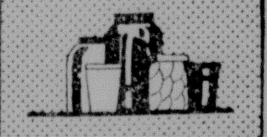

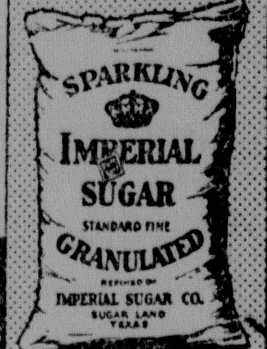

Madison county is achieving quite a reputation as a producer of farm champions among the boys. The latest boy farm champion reported is Luther Hensarling, Jr., a 15-year-old son of Mr. and Mrs. Luther Hensarling, of Madisonville. This young man was notified recently that he had been awarded a prize of \$75 as a vocational champion cotton grower of Texas, this bringing further farm honors to the family, his father having been designated as one of the State's master farmers in 1927. Young Mr. Hensarling not only won the Texas championship, but won second place among all the boys from all the cotton-growing States. His yield of 2.804 pounds of seed cotton last year on one acre of land was the highest in the vocational cotton records, so he was informed by the district manager of the Chilean nitrate of soda educational bureau. The awarding of this honor gave Madison county the banner in both cotton and corn production for the State. Another Madisonville boy, Eddie Mitchell, 16 years old, won the eighth prize of \$10 in the State cotton contest. Another Madison county boy, Paul Robison, broke the corn record last year by producing 154 bushels on one acre.

Russell Hoch, of Van Ormy, Bexar county, fed his club pig a balanced ration, and when the animal was six and a half months old it weighed 325 pounds. His father fed two litter mates the ordinary way, and they had a combined weight of only 275 pounds in the same length of time and sold for \$4.65 less.

A few weeks ago wheat was reaped from a field near Ranger, threshed and rushed to the mill near the field and made into flour. The flour was conveyed to a restaurant in Ranger, where it was baked into biscuits. In 18 minutes and 38 seconds from the time the wheat was cut it had been converted into biscuits and was ready for table use. So far as is known this establishes a new record for the world from field-to-bread. Last year there was a similar test in the same section which required 41 minutes from field to biscuit.

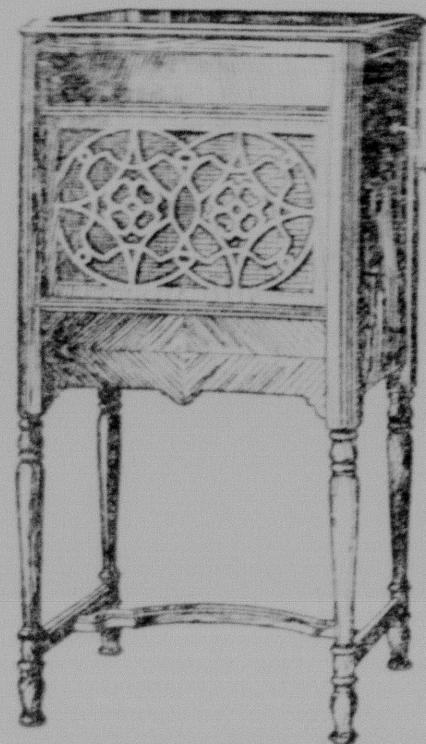

A market may soon be developed for the Irish potatoes that are now thrown away or fed to the hogs, if the idea of a California chemist goes over. The chemist was instrumental in opening a cannery for these culls in Florida. The plant has just finished its first season. It is planned to operate the cannery three months in each year. Most of the work of canning potatoes is done with machinery which removes the skins without bruising the potatoes.

TEXAS FARM NEWS

Americans eat an average of six ounces of meat a day, according to the Institute of American Meat Packers. The statement is based on analysis of meat consumption figures issued by the Department of Agriculture. Slightly more than half of the amount, 3 1/4 ounces, is pork. The rest consists of 2 1/2 ounces of beef, 1-3 ounce of veal and 1/4 ounce of lamb. Notwithstanding the smallness of the amounts, the annual consumption of meat last year averaged 138 pounds per capita, or a total of more than 16,500,000,000 pounds for the entire population.

To provide plenty of home-grown fruits so that farm families in Fannin county may come up to the standard of adequate diet, Miss Eldridge, home demonstration agent for the county, started an orchard and small fruit planting program last year, which has resulted in the planting of 20,570 trees and small fruits by 500 women. The home demonstration clubs of the county set as a goal the planting of at least six kinds of fruits by each member, and in eleven clubs this goal was reached. The goal was far exceeded as a whole, however, for the 500 women set out an average of 41 fruits each. Land owners in many cases furnished their tenants fruit trees, and committees of women in each community made it their business to assist those who were financially unable to purchase plants and trees. Strawberries lead the list of plantings, followed by blackberries, dewberries, grapes, peaches, plums, pecans, figs, pears, cherries, raspberries, apples, apricots, nectarines, currants and peonies.

More than 300 cars of cedar timber will be shipped out of San Saba county this year, and will bring thousands of dollars to farmers. The timber is shipped as posts, and from one to twenty posts are obtained from each tree.

Farmers in the vicinity of Hot Springs are expecting to grow green beans for fall shipment this year as a result of the success of J. F. Reece with his fall bean crop last year. Mr. Reece grew an acre of Kentucky Wonder beans last year, producing 244 bushels. He sold his crop at an average of 3 cents a pound, securing a gross receipt of \$205 for the acre.

Charles Meuer, a farmer who resides near Fredericksburg, reports that in proportion to time and labor spent, five acres of top-worked pecans made him more money than any other five acres on his farm. Five years ago he began budding native trees to papershell varieties, and last year he sold 1000 pounds of pecans at 35 cents a pound. Native nuts brought only nine to ten cents per pound.

For Our BOYS and GIRLS

By AUNT MARY

CLEVER STUNT NO. 13

Filling a Globe with Water in less than Five Seconds

SUNSHINE NEWS.

I am always thinking that my little readers want to hear the Sunshine News first of all each month, so we will start the Boys' and Girls' page with this news. There were an unusual amount of letters for a summer month; also many new members, which we are very happy to welcome into the club. Here are some of the letters:

Louise Dugan, Conute, Okla., writes: "I have been reading your boys and girls page for only a short time and find it very interesting. I would like very much to join your club."

Lula Jones, Winchester, Okla., says: "I am joining your club because I thought it real interesting. I thought the poem of Aunt Susan Hughes real pretty."

Maye Randolph, Ford City, Texas, says there is a mistake in the initials of Mrs. Jones; they should be N. H. and NOT N. J. We will make the correction, Maye, and certainly thank you.

Emma Ingersol, Stillwater, Okla.: "I have read the Sunshine News for some time and am now sending in my application for membership." We shall be very happy for the suggestions, Emma; send them as soon as you can.

Anna Edwards, Coalgate, Okla., says: "I surely do enjoy being a member of your wonderful club. There is nothing I would enjoy better than to visit you and your two dear little children." Anna suggests we have some pin or button to indicate our membership in the club. Yes, Anna, that would be fine and, maybe, Aunt Mary can work that out later. Aunt Mary would like to write you a personal letter, but with so many boys and girls in the club making demands on my time, I find this impossible; therefore I must confine myself to little personal messages on this page.

Gwendolyn Black, Canyon, Texas: "I again wish to become a member of your club. When I was in your club a couple of years ago I enjoyed my membership very much." Glad to have you back, Gwen.

Ruby Williams, Santa Anna, Texas. "I thought I would write and tell you how much I am enjoying the club. I like it better every month. I can hardly wait each month until we get our paper to see what the club is doing. How are your two little children? I would love to see them. * * * I have been sending Sunshine every month and I certainly do enjoy it. I enjoy the pretty summer days. It makes me sad to think of the Shut-Ins who cannot enjoy them. Well, I must close. Love to you and the club. A Sunshiner."

Thank you for the compliment, Ruby. Freddie Mae Saxon, Boerne, Texas, says: "I have just finished reading your club letters and would like to be a member very much. I live here in the West where people come for their health, therefore I make lots of calls on the sick, which I dearly love to do."

Nellie Copeland, route 1, Hamlin, Texas, writes a most interesting letter: I am sending in my membership coupon and want to join the club. I have written to all the names in the last two assignments but have had two letters returned, unclaimed. One was to Alice Beon Stitt, Stillwater, Okla., and the other was to Ina Miller. I think the club is great. I know the shut-ins enjoy the letters very much. Aunt Susan Hughes wrote me the sweetest letter. We are happy for your membership in the club, dear, and hope it will continue to bring you happiness.

Jewell Mankin, Wolfe City, Texas, says: "I am so glad to join your club. I am willing to help the Shut-Ins."

Effie Mae Klum, Millsap, Texas: "I have been a member of the Sunshine Club for only a short time. I think it is wonderful. It only takes us a few minutes to write a letter to an unfortunate and they are so thankful for their letters."

Aunt Susan Hughes, Galveston, Texas, sends her usual sweet letter. * * * "All last month I was on special duty nursing one of the ladies that had been operated on. * * * Thank God the operation was a success. * * * Your write-up about the little bird parents was so pathetic. I do hope means can be found whereby our birds will be protected. Indeed, the world would be a dreary place without the birds to sing and to help the farmer keep down insects. I am enclosing some bird rhymes * * * With love for all."

Other members are: Mrs. May Taliaferro, Troup, Texas. Delia Mae Smith, Route 3, Chattanooga, Okla. Emma Ingersol, 1324 Main St., Stillwater, Okla. Roy R. Robbins, Stigler, Okla. Louise Stevens, Route 7, Marshall, Texas. Alma Olive, Route 1, Tyler, Texas. Helen Jones, Ford City, Texas. Bessie Kasper, Ganona, Texas. Juanita Bagwell, Clarendon, Texas. Miss Bernice Hargrave, Weatherford, Okla. Irene Garner, Spur, Texas. Georgie Alexander, Marshall, Texas. Frankie Stovall, King, Texas. Vera White, Hollis, Okla. Mrs. W. C. Rainbolt, Garrison, Texas.

Shut-In Assignments

Our next thought is to which Shut-In are we going to write? Here is the list. Which is your letter?

"A"—Alfred Good, Whon, Texas. In bed.
"B"—Mrs. Cora Woodward, San Saba, Texas. Age 58. In a chair.
"C"—Jewell Quattlebaum, Leedey, Okla. In bed. Age 18.
"D"—Mable Brown, Route 1, Hamlin, Texas. In a chair. Age 28.
"E"—Zelmer Arthur, Skip, Ky. Cripple.
"F"—Jimmie Duggar, London, Ky. In bed.
"G"—Eliza Hill, Route 1, Box 58, Ravenden, Ark. Age 67. In a chair.
"H"—Elbert Gandy, Route 3, Athens, Texas. Age 18.
"I"—Mr. Ernest Moreland, Tanglewood, Texas. Age 40.
"J"—David Holcomb, Baskoshe, Okla. Age 14.

"K"—Clark Wright, St. Pauls Hospital, Dallas, Texas. Age 21. In bed.
"L"—Dr. J. M. Miller, Clyde, Texas. In the house.
"M"—Mrs. N. H. Jones, Foard City, Texas. Cripple.
"N"—Marian Fosterling, 2440 Townsend Ave, Detroit, Mich. Age 30. In bed.
"O"—Oscar Jones, Anson, Texas. Age 15. In bed.
"P"—Mrs. Joe Lack, Millsap, Texas. Age 28. Blind.
"R"—Mrs. L. E. Rape, Sonora, Texas. Age 28. In bed.
"S"—Lola Hallman, Route A, Anson, Texas. Age 20. In bed.
"T"—Frank Hug, Nazareth, Texas.
"U"—Jewel Anderson, Best, Texas. Age 19.
"V"—Clarence Anders, Route 2, Lexington, Texas. Age 17. Cripple.
"W"—Exie Tompkins, Box 72, Antlers, Okla. Age 17. In a chair.
"X"—Florence M. Garrison, Eureka Springs, Ark. In bed.
"Y"—Pearl Elsworth, 1105 First Ave., Alpena, Mich. In bed.
"Z"—Mrs. J. A. Grimes, Blackwell, Texas. Age 71.
"AA"—Jay McNutt, Perkins, Okla. Age 80. Blind.
"AB"—Clay Beam, Troup, Texas. Route 1. Age 48. In bed.
"AC"—Josephine Saladin, Box 263, Anson, Texas. In bed.
"AD"—Luther Darter, Route 1, Box 14, Millsap, Texas. In a chair.
"AE"—Rose Lee Yeeton, Box 22, Claude, Texas.
"AAF"—Cort Maud Cantrell, 11. Route 6, Mount Pleasant, Texas. In bed.

How to Be a Sunshine Member

If you are not now a member of our Sunshine for Shut-Ins Club and would like to know about it and how to join read the following: The membership is free to all readers of this page whether they are young or old, rich or poor. There are no dues or fees of any kind. All that is required is to send us the filled-in membership coupon, and upon receipt of your membership card you will note a letter or letters that will indicate your position in the club. Each month there will be printed on this page the names and addresses of our Shut-In members and before each will appear the letter or letters of the members that are to write to this Shut-In.

If you want to be a member fill in the membership coupon and mail to Aunt Mary, Box 1012, Fort Worth, Texas.

Here is the poem Aunt Susan wrote for her boys and girls.

THE MOCKING BIRD

The air about our home
Is filled with a mocking bird's song;
His notes are sweet and liquid,
Pouring forth clear and strong.

His joy just bubbles over
In the notes that he trills out;
He seems to tell all the world
There is nothing to worry about.

'Tis true he steals his songs,
Though careful to return them again;
Giving them back with such harmony
That other birds hardly complain.

But he is an honest warbler,
For while he steals the other bird's song
He returns it in golden melody
Therefore committing no wrong.

When perched high upon a bough—
So blithely does he sing,
That we listen in awe and wonder
As he makes the welkin ring.

With song and whistle he tells
The world of his joy and gladness;
He never wails or moans
Or voices one note of sadness.

—SUSAN F. HUGHES.

Are You a Shut-In?

Are you a Shut-In or do you know one that is confined to the bed or wheel chair all of the time, or some one that is blind? We especially want the names of those that are very lonely. Fill in the I Am a Shut-In Coupon and mail to Aunt Mary, Box 1012, Fort Worth, Texas.

LITTLE JOURNEYS.

Looking back into history we are going to snatch a bit that occurred about 58 years before the birth of Christ.

Holvetil, a powerful Celtic people, dwelt in what is now the west of Switzerland. Their chief town was Aventicum. About 58 years B. C. they resolved, on the advice of Orgetorix, one of their chiefs, to migrate from their country with their wives and children, and to seek a new home in Gaul. They were however, defeated by Caesar and driven back into their own territories, which became thenceforth a Roman colony. In the commotions that followed the death of Nero (A. D. 68) they were almost exterminated. When we read these little snatches from history we cannot help but think how much better off we would all be if we were only contented with our share in life and not try to snatch the other fellow's share, whereby we usually lose that which we have.

ROBERT BURNS AND THE BIRDS

Robert Burns, whose 170th anniversary was observed January 25 last, in writing of his pleasure in walking "in the sheltered side of a wood or high plantation on a cloudy winter day" when he heard "the stormy wind howling among the trees and raving over the plain," adds: "I listened to the birds, and frequently turned out of my path lest I should disturb their little songs or frighten them to another station."

NEW HIGHWAY FROM DALLAS TO PRESIDIO

Location of a new south-west highway from Dallas to Presidio has been ordered by the State Highway Commission. The route of the new highway will be through Cleburne, Ballinger, San Angelo, Fort Stockton and Marfa. The State Highway Engineer was ordered several months ago to make a survey of the need for the highway and his survey resulted in the order for the location.

The new highway is the result of a long period of effort, and will open a new territory, not only in Texas, but in the Republic of Mexico, it is said. Mileage from Dallas to the Pacific coast will be reduced 400 miles when the building of the new highway is completed, through co-operation with the Mexican government, which has agreed to build a highway from a point south of the Rio Grande at Presidio to Tolopampo, in the delta of the San Blas River, on the west coast of Mexico. The Mexican part of the highway will be by way of Ojinaja and Chihuahua.

Counties through which the new highway will pass and where an improved highway does not exist, have the funds for improving the roads or contemplate issuance of bonds for the purpose. The route to the southwest is already improved or financed as far as San Angelo, except in two counties, and these counties are preparing to vote bonds.

NEW SALT SHAFT AT GRAND SALINE

A company is digging a new shaft 900 feet deep at Grand Saline, Van Zandt county, to penetrate a salt dome which extends within 217 feet of the surface of the earth and is known to be at least 700 feet thick. Geologists estimate that the dome extends to a depth of at least 2,000 feet. The salt industry is one of the large manufacturing industries of the State, and much of the salt produced in this country comes from Van Zandt county.

Surface salt is found on the beds of dry lakes in some parts of West Texas. The principal production of salt in Texas is from Van Zandt, Anderson and Harris counties, although there has been production from Mitchell, Smith and other counties. The value of the salt produced in Texas in 1920 was \$667,835.

WORK ON DALLAS POSTOFFICE

Actual construction work is now in progress on the new postoffice building for Dallas. The building is being erected on Bryan, Ervay, Federal and St. Paul streets, and will be one of the finest federal buildings in the Southwest. The first shovel of dirt from the foundation was moved by Postmaster Philp.

EARLIEST TEXAS SNOW

The earliest snow in Texas of which there is record was in the year 1909. In that year there was a heavy fall of snow in the upper Panhandle on October 14. Northeast Texas has never had a snow earlier than November 20.

COME TO T.C.U.

A University where the mental, moral and physical equations are developed to the highest degree. Every form of gymnasium and field sports and athletics features in correct proportion to develop that physical fitness which augments mental capacity. A University with a strong faculty of 125 mature people of high moral character selected from the best universities of Europe and America, assuring students of best instructions to be had in Texas. There are 100 professors of the T. C. U. is highly cultural and inspirational. Its situation on the heights overlooking entire Fort Worth and the Trinity Valley is most delightful and its \$2,000,000 plant, comprising beautiful campus, seven splendid buildings and huge stadium offers every facility for education and progress. Enroll now in this great Southwestern University and assure yourself a future place in world affairs. Fall Term Opens for Freshmen 9 A. M. Friday, September 12. For Transfer Students, 5 A. M., Monday, Sept. 16. Write for full particulars and catalogue.

By AUNT MARY

CLEVER STUNT NO. 13

SUNSHINE NEWS.

I am always thinking that my little readers want to hear the Sunshine News first of all each month, so we will start the Boys' and Girls' page with this news. There were an unusual amount of letters for a summer month; also many new members, which we are very happy to welcome into the club. Here are some of the letters:

Louise Dugan, Conute, Okla., writes: "I have been reading your boys and girls page for only a short time and find it very interesting. I would like very much to join your club."

Lula Jones, Winchester, Okla., says: "I am joining your club because I thought it real interesting. I thought the poem of Aunt Susan Hughes real pretty."

Maye Randolph, Foard City, Texas, says there is a mistake in the initials of Mrs. Jones; they should be N. H. and NOT N. J. We will make the correction, Maye, and certainly thank you.

Emma Ingersol, Stillwater, Okla.: "I have read the Sunshine News for some time and am now sending in my application for membership. We shall be very happy for the suggestions, Emma; send them as soon as you can."

Anna Edwards, Coalgate, Okla., says: "I surely do enjoy being a member of your wonderful club. There is nothing I would enjoy better than to visit you and your two dear little children." Anna suggests we have some pin or button to indicate our membership in the club. Yes, Anna, that would be fine and, maybe, Aunt Mary can work that out later. Aunt Mary would like to write you a personal letter, but with so many boys and girls in the club making demands on my time, I find this impossible; therefore I must confine myself to little personal messages on this page.

Gwendolyn Black, Canyon, Texas: "I again wish to become a member of your club. When I was in your club a couple of years ago I enjoyed my membership very much." Glad to have you back, Gwen.

Ruby Williams, Santa Anna, Texas: "I thought I would write and tell you how much I am enjoying the club. I like it better every month. I can hardly wait each month until we get our paper to see what the club is doing. How are your two little children? I would love to see them. * * * I have been sending Sunshine every month and I certainly do enjoy it. I enjoy the pretty summer days. It makes me sad to think of the Shut-Ins who cannot enjoy them. Well, I must close. Love to you and the club. A Sunshiner."

Thank you for the compliment, Ruby. Freddie Mae Saxon, Boerne, Texas, says: "I have just finished reading your club letters and would like to be a member very much. I live here in the West where people come for their health, therefore I make lots of calls on the sick, which I dearly love to do."

Nellie Copeland, route 1, Hamlin, Texas, writes a most interesting letter: I am sending in my membership coupon and want to join the club. I have written to all the names in the last two assignments but have had two letters returned, unclaimed. One was to Alice Beon Stick, Stillwater, Okla., and the other was to Ina Miller. I think the club is great. I know the shut-ins enjoy the letters very much. Aunt Susan Hughes wrote me the sweetest letter. We are happy for your membership in the club, dear, and hope it will continue to bring you happiness.

Jewell Mankin, Wolfe City, Texas, says: "I am so glad to join your club. I am willing to help the Shut-Ins."

Effie Mae Klum, Millsap, Texas: "I have been a member of the Sunshine Club for only a short time. I think it is wonderful. It only takes us a few minutes to write a letter to an unfortunate and they are so thankful for their letters."

Aunt Susan Hughes, Galveston, Texas, sends her usual sweet letter. * * * "All last month I was on special duty nursing one of the ladies that had been operated on. * * * Thank God the operation was a success. * * * Your write-up about the little bird parents was so pathetic. I do hope means can be found whereby our birds will be protected. Indeed, the world would be a dreary place without the birds to sing and to help the farmer keep down insects. I am enclosing some bird rhymes * * * With love for all."

Other members are: Mrs. May Taliaferro, Troup, Texas. Delia Mae Smith, Route 3, Chattanooga, Okla.

Emma Ingersol, 1324 Main St., Stillwater, Okla. Roy R. Robbins, Stigler, Okla. Louise Stevens, Route 7, Marshall, Texas. Alma Olive, Route 1, Tyler, Texas. Helen Jones, Foard City, Texas. Bessie Kasper, Ganona, Texas. Juanita Bagwell, Clarendon, Texas. Miss Bernice Hargrave, Weatherford, Okla. Irene Garner, Spur, Texas. George Alexander, Marshall, Texas. Frankie Stovall, King, Texas. Vera White, Hollis, Okla. Mrs. W. C. Rainbolt, Garrison, Texas.

Shut-In Assignments

Our next thought is to which Shut-in are we going to write? Here is the list. Which is your letter?

- "A"—Alfred Good, Whon, Texas. In bed.
- "B"—Mrs. Cora Woodward, San Saba, Texas. Age 58. In a chair.
- "C"—Jewell Quattlebaum, Leedey, Okla. In bed. Age 18.
- "D"—Mable Brown, Route 1, Hamlin, Texas. In a chair. Age 28.
- "E"—Zelmer Arthur, Skip, Ky. Cripple.
- "F"—Jimmie Dugan, London, Ky. In bed.
- "G"—Eliza Hill, Route 1, Box 58, Ravenden, Ark. Age 67. In a chair.
- "H"—Elbert Gandy, Route 3, Athens, Texas. Age 18.
- "I"—Mr. Ernest Moreland, Tanglewood, Texas. Age 40.
- "J"—David Holcomb, Baskoshe, Okla. Age 14.

- "K"—Clark Wright, St. Pauls Hospital, Dallas, Texas. Age 21. In bed.
- "L"—Dr. J. M. Miller, Clyde, Texas. In the house.
- "M"—Mrs. N. H. Jones, Foard City, Texas. Cripple.
- "N"—Marian Fosterling, 2440 Townsend Ave., Detroit, Mich. Age 30. In bed.
- "O"—Oscar Jones, Anson, Texas. Age 15. In bed.
- "P"—Mrs. Joe Lack, Millsap, Texas. Age 28. Blind.
- "R"—Mrs. L. E. Rape, Sonora, Texas. Age 28. In bed.
- "S"—Lola Hallman, Route A, Anson, Texas. Age 20. In bed.
- "T"—Frank Hug, Nazareth, Texas.
- "U"—Jewel Anderson, Best, Texas. Age 19.
- "V"—Clarence Anders, Route 2, Lexington, Texas. Age 17. Cripple.
- "W"—Exie Tompkins, Box 72, Antlers, Okla. Age 17. In a chair.
- "X"—Florence M. Garrison, Eureka Springs, Ark. In bed.
- "Y"—Pearl Elsworth, 1105 First Ave., Alpena, Mich. In bed.
- "Z"—Mrs. J. A. Grimes, Blackwell, Texas. Age 71.
- "AA"—Jay McNutt, Perkins, Okla. Age 80. Blind.
- "AB"—Clay Beam, Troup, Texas. Route 1. Age 48. In bed.
- "AC"—Josephine Saladin, Box 263, Anson, Texas. In bed.
- "AD"—Luther Darter, Route 1, Box 14, Millsap, Texas. In a chair.
- "AE"—Rose Lee Yeeton, Box 22, Claude, Texas.
- "AF"—Cort Maud Cantrell, 11. Route 6, Mount Pleasant, Texas. In bed.

How to Be a Sunshine Member

If you are not now a member of our Sunshine for Shut-Ins Club and would like to know about it and how to join read the following: The membership is free to all readers of this page whether they are young or old, rich or poor. There are no dues or fees of any kind. All that is required is to send us the filled-in membership coupon, and upon receipt of your membership card you will note a letter or letters that will indicate your position in the club. Each month there will be printed on this page the names and addresses of our Shut-In members and before each will appear the letter or letters of the members that are to write to this Shut-In.

If you want to be a member fill in the membership coupon and mail to Aunt Mary, Box 1012, Fort Worth, Texas.

Here is the poem Aunt Susan wrote for her boys and girls.

THE MOCKING BIRD

The air about our home
Is filled with a mocking bird's song;
His notes are sweet and liquid,
Pouring forth clear and strong.

His joy just bubbles over
In the notes that he trills out;
He seems to tell all the world
There is nothing to worry about.

'Tis true he steals his songs,
Though careful to return them again;
Giving them back with such harmony
That other birds hardly complain.

But he is an honest warbler,
For while he steals the other bird's song
He returns it in golden melody
Therefore committing no wrong.

When perched high upon a bough—
So blithely does he sing,
That we listen in awe and wonder
As he makes the welkin ring.

With song and whistle he tells
The world of his joy and gladness;
He never wails or moans
Or voices one note of sadness.

—SUSAN F. HUGHES.

Are You a Shut-In?

Are you a Shut-In or do you know one that is confined to the bed or wheel chair all of the time, or some one that is blind? We especially want the names of those that are very lonely. Fill in the I Am a Shut-In Coupon and mail to Aunt Mary, Box 1012, Fort Worth, Texas.

LITTLE JOURNEYS.

Looking back into history we are going to snatch a bit that occurred about 58 years before the birth of Christ.

Holvetii, a powerful Celtic people, dwelt in what is now the west of Switzerland. Their chief town was Aventicum. About 58 years B. C. they resolved, on the advice of Orgetorix, one of their chiefs, to migrate from their country with their wives and children, and to seek a new home in Gaul. They were however, defeated by Caesar and driven back into their own territories, which became thenceforth a Roman colony. In the commotions that followed the death of Nero (A. D. 68) they were almost exterminated. When we read these little snatches from history we cannot help but think how much better off we would be if we were only contented with our share in life and not try to snatch the other fellow's share, whereby we usually loose that which we have.

ROBERT BURNS AND THE BIRDS

Robert Burns, whose 170th anniversary was observed January 25 last, in writing of his pleasure in walking "in the sheltered side of a wood or high plantation on a cloudy winter day" when he heard "the stormy wind howling among the trees and raving over the plain," adds: "I listened to the birds, and frequently turned out of my path lest I should disturb their little songs or frighten them to another station."

NEW HIGHWAY FROM DALLAS TO PRESIDIO

Location of a new south-west highway from Dallas to Presidio has been ordered by the State Highway Commission. The route of the new highway will be through Cleburne, Ballinger, San Angelo, Fort Stockton and Marfa. The State Highway Engineer was ordered several months ago to make a survey of the need for the highway and his survey resulted in the order for the location.

The new highway is the result of a long period of effort, and will open a new territory, not only in Texas, but in the Republic of Mexico, it is said. Mileage from Dallas to the Pacific coast will be reduced 400 miles when the building of the new highway is completed, through co-operation with the Mexican government, which has agreed to build a highway from a point south of the Rio Grande at Presidio to Tolopampo, in the delta of the San Blas River, on the west coast of Mexico. The Mexican part of the highway will be by way of Ojinaga and Chihuahua.

Counties through which the new highway will pass and where an improved highway does not exist, have the funds for improving the roads or contemplate issuance of bonds for the purpose. The route to the southwest is already improved or financed as far as San Angelo, except in two counties, and these counties are preparing to vote bonds.

NEW SALT SHAFT AT GRAND SALINE

A company is digging a new shaft 900 feet deep at Grand Saline, Van Zandt county, to penetrate a salt dome which extends within 217 feet of the surface of the earth and is known to be at least 700 feet thick. Geologists estimate that the dome extends to a depth of at least 2,000 feet. The salt industry is one of the large manufacturing industries of the State, and much of the salt produced in this country comes from Van Zandt county.

Surface salt is found on the beds of dry lakes in some parts of West Texas. The principal production of salt in Texas is from Van Zandt, Anderson and Harris counties, although there has been production from Mitchell, Smith and other counties. The value of the salt produced in Texas in 1920 was \$667,835.

WORK ON DALLAS POSTOFFICE

Actual construction work is now in progress on the new postoffice building for Dallas. The building is being erected on Bryan, Ervay, Federal and St. Paul streets, and will be one of the finest federal buildings in the Southwest. The first shovel of dirt from the foundation was moved by Postmaster Philp.

EARLIEST TEXAS SNOW

The earliest snow in Texas of which there is record was in the year 1909. In that year there was a heavy fall of snow in the upper Panhandle on October 14. Northeast Texas has never had a snow earlier than November 20.

COME TO T.C.U.

A University where the mental, moral and physical equations are developed to the highest degree. Every form of gymnasium and field sports and athletics features in correct proportion to develop that physical fitness which augments mental capacity. Baylor University School of Nursing

Dallas, Texas.

Receives a new class September 1st. All but personal expenses provided. High School course or its equivalent required for entrance. Address at once for full particulars

MISS LUCILE BURLEW, R. N., Dean.

Keep them strong - healthy and happy

ALL children like Karo because it's so delicious and satisfying to their youthful craving for sweets —

But parents now learn from leading doctors that Karo is more than a delicious syrup —

"It is the *IDEAL* energy food for growing children!"

Because there are 120 calories in each ounce of Karo — nearly twice the energy value of eggs and lean beef, weight for weight —

And because Karo is so easily digested — supplying quickly the muscular energy growing children need daily.

Serve plenty of Karo to the entire family — keep them strong, healthy and happy.

DELICIOUS ON SLICED BREAD

HOME PROBLEMS.

REMOVAL OF STAINS

From time to time many of the readers of this page have written me regarding the removal of stains. So I am going to answer them all at once, hoping to cover as many kinds of stains as seem the most common.

From the letters I received, I have concluded that ink stains give the most trouble, because ink is something used in almost every home, and sooner or later some member of the household comes in contact with it. Many persons believe ink stains can not be removed and discard useful articles of clothing that are ink-stained, or go on wearing them with the spots unremoved.

Where the materials are washable the method of removing ink stains are simple. Place an absorbent material under the ink stain and remove as much of the stain as possible by lightly pressing with a cloth wrung out of lukewarm water. After the color stops coming out, supply fresh hydrogen peroxide with a dropper to the stain, adding to it a few flakes of some mild soap. Saturate with the peroxide solution and then hold over steam for a few minutes, rinsing in a luke warm water the whole garment. This treatment is described for white materials, as peroxide will remove many dyes. After the steam treatment, should there be left a brownish stain, apply a few drops of diluted oxalic acid, one half concentrated strength. If the ink persists in reappearing repeat the whole treatment. When the spot is removed the whole garment should be thoroughly washed and rinsed.

In the case of yellowed or stained linens and other washable white materials the process is still simple and easily accomplished. A good washing with warm soapy water is the first requirement. If the material is not soiled, only a few minutes in a washing machine is necessary, or a gentle rubbing on the board. Rinse the cloth free of soap and soak in warm clear water to which Javelle water has been added, one cupful to four gallons of water. Soak from eight to ten minutes, stirring frequently and be sure there is enough water to let the material move freely. Four rinses are then given in warm water, two cups of white vinegar being added to the third rinsing. The clothes may, if necessary, be dried indoors and will be white and odorless. However, if one is so equipped it is best to hang cloths out-of-doors and let nature's best bleacher, the sun, help you.

When materials are stained with something that is soluble in water the processes of removing are even more simple. First, however, it is wise to try a drop of water on the underside of the hem to see if water will spot the material which is often more difficult to handle than most stains. Where the materials do not water spot, all that is needed is a soft absorbent rag and a bowl of luke warm clear water. Arrange the garment so that you can work rapidly and freely. Touching the material as lightly as possible and rub in all directions quickly; this is to avoid a "ring." In using any liquid commercial cleaner work quickly and freely, pressing only hard enough to do the work.

The materials that stain with water, a method that is quite successful is as follows: Several thicknesses of cheese-cloth can be wrapped around the end of a glass rod or an orange-wood stick; dip in clear water and all the excessive moisture wrung out. Wrap two or three thicknesses of dry cheese-cloth over the wet

pad and by rubbing this very gently over the spot (just barely touching it) the stain will be dissolved. If the stain is very bad it is advisable to change the pad several times to thus avoid staining the material again.

If white cotton or linen are stained with mercurchrome it may be bleached out with equal parts of Javelle water and boiling water. The fabric should remain but a few minutes in this bleach, then rinsed well and examined, and the bleaching repeated if necessary. For small stains the material may be stretched over a bowl of hot water and the Javelle, full strength, is applied directly with a dropper to the stain. After a minute the material is allowed to drop into the hot water. It will probably require several applications of Javelle to remove the stain entirely. This must also be followed by a thorough washing and rinsing as Javelle weakens the fabric if allowed to remain in it.

Any stain of an oily composition, such as salves and ointments, should be cleaned first with grease solvent such as carbon tetrachloride then thoroughly washed with warm soapy water. This treatment should be followed for stains from compounds oily in nature. In the case of cod liver oil stain, remove as soon as possible, for after it is once set it is difficult to remove. A popular magazine suggested that baby be given his cod liver oil while in his bath, thus avoiding stains. In removing an oil or grease stain of any kind from a garment, the chief problem is to avoid forming of a ring. This often occurs because not enough of the grease solvent has been used to flush out the dissolved grease. The cleaning fluid dissolves the grease and carries the soil with it farther out into the material, where it evaporates, leaving the grease and soil and thus causing a ring. Many times this can be avoided by placing a thick pad of absorbent material, such as cheese-cloth under the material and applying the cleansing fluid freely with a soft cloth large enough to hold considerable quantity of the fluid. The pad under the stain absorbs the soil and should be moved from time to time to put a clean surface under the stain. The cleaning cloth should be folded over to clean surface or changed as it becomes soiled. Should the "ring" show a tendency to form, brush the garment lightly with the wet cloth in long even strokes towards the seams or edges. When sponging material in this way it is best to use a piece of the same material or something as nearly the same color as possible. Never use a white rag to clean dark material. Sometimes a light ring is formed in cleaning dark material. In this case the whole garment must be cleaned. A simple way to keep summer silk dresses looking fresh is to sprinkle the dress where it comes in contact with the body with Fuller's earth. Leave the powder on over night or until the dress is to be worn again and then brush it off. Fuller's earth removes the slight natural oiliness that comes from the skin and prevents dust from clinging to the fabric, causing it to darken.

The spots of salad dressing that so often soil the front of a delicate dress are usually best left alone till the garment can be removed and the spots cleaned quickly with Fuller's earth. This should remain on the fabric at least twenty-four hours, and two or more applications may be necessary, according to the extent and oiliness of the stain.

Where expensive clothing is stained, or there is doubt about ones ability at cleaning, it is best to send the garment to reliable cleaners with a note attached that gives them information as to the nature of the stain.

One should practice taking stains out of cheap material first. With expensive dresses that are home made or made by a dressmaker, samples of the dress should be preserved so as to test the removal of stains that may occur to the garment.

A druggist can, as a rule, tell you the solvent of any drugs that may cause stains.

TESTED RECIPES

Here are some delicious recipes that we have tested and tasted and found them delicious and so are passing them on to you:

Lamb Chops, Swiss Style.

Prepare the desired number of French chops. Sprinkle with salt and pepper, spread with sauce Soubise and pan broil. "SAUCE SOUBISE"—Melt two tablespoons butter, add two tablespoons flour, one-half teaspoon salt, one-half cup onion puree (onions chopped, boiled, drained and rubbed through a sieve), add enough cream to make the consistency to spread.

Baked Beans, Isthmus Style.

Pick over one pint yellow-eyed beans. Wash, drain, cover with cold water and let stand over night. Drain, rinse with cold water, again cover with cold water and heat slowly to the boiling point, reduce heat and simmer five minutes, adding one teaspoon soda one minute before draining and rinsing again with cold water. Arrange two thin slices bacon in bottom of bean pot, add a layer of bean, sprinkle beans with finely chopped mild red peppers and salt, cover with two thin slices bacon, cut in shreds. Repeat layers until beans are used. Cover beans with stewed and strained thick tomato pulp, well seasoned with onion, bay leaf, salt and pepper. Cover and bake in a hot oven five hours. Add more tomato pulp if necessary.

Scalloped Guinea Chicken With Rice Border.

Butter a baking dish. Arrange alternate layers of cold thinly sliced left over guinea chicken and boiled rice. Pour over tomato sauce. Cover with buttered cracker crumbs and bake in a hot oven until heated through and crumbs are nicely browned.

Swiss Chard, Cooked With Ham Knuckles.

Pick over, wash and drain one package Swiss chard. Cook a ham knuckle slowly in plenty of boiling water, in a stock pot or large kettle. The last half-hour of cooking add the prepared Swiss chard, press the leaves down as they wilt, until all are covered with water; add more boiling water if necessary. Cook until chard is tender. Add salt if necessary. Drain, chop, reheat and serve on hot platter with ham knuckle arranged in center. Many people like to use vinegar on the chard.

Fried Nuggets of Rice.

Pour one-half cup boiling water over one cup washed rice. Cook over hot water in double boiler until water is absorbed. Add one cup scalded milk and salt to season to taste, continue cooking until rice is soft, adding more milk if necessary. Add one-fourth cup butter and one teaspoon parsley. Turn on a platter, when cool, separate with a fork in pieces the size of English walnuts. Fry a golden brown in deep hot fat; drain on brown paper and serve as a substitute for French fried potatoes.

EXPERIMENTING WITH FLAX NEAR WICHITA FALLS

An experiment in flax growing has been made in the Wichita Falls district with very satisfactory results. It has been proven beyond doubt that flax will grow in this section.

In the recent experiment the plant seeded well and the yield is reported good. The seed, however, is more or less a by-product, the fiber being the main crop. The yield in fiber was two and a half tons per acre. The crop was developed under irrigation, and if it proves to be as successful as it now promises, it may prove quite an addition to the income of lands where irrigation is possible.

The crop was planted March 20 and was harvested the latter part of June, showing about ninety days for development. With irrigation the crop was kept in splendid condition. Experiments will be made this fall with a fall-seeded crop. The present price of flax is \$25 per ton, with a production cost of approximately \$26 per acre.

NEW RAIL LINE OPENS RICH FARM AREA

An event of much significance in the development of Texas was the opening recently of the new line of the Rock Island Railway from Amarillo, Texas, to Liberal, Kansas. This line is about 153 miles long and will serve much fertile agricultural territory hitherto largely undeveloped in Texas, Oklahoma and Kansas. In the northern part of the Texas Panhandle, north of the Canadian River, is much fine territory which has hitherto been poorly located with respect to railroad transportation. The new line will traverse the heart of this territory, much of which is as level as a floor and excellently adapted to the production of wheat, grain sorghums and diversified farming, as well as stock farming and dairying. A number of new towns have sprung up along the line in the Texas Panhandle, including Gruver, Morse, Stinnett, Sanford, Fritch and Greenough.

TEXAS RAILROAD MILEAGE

In 1854 Texas had 32 miles of railroad in operation. In 1864 there were 451 miles. Ten years later, in 1874, the railway mileage had jumped to 1,650 miles. In 1884 the Texas railway mileage was 6,198 miles. The mileage had increased to 9,153 miles in 1894. In 1904 the railway mileage had run to 11,536

Corns

Stop Hurting Instantly then Lift Right Off!

Drop "Freezone" on that aching corn. Instantly it stops hurting; then shortly you lift the corn right off with your fingers. You'll laugh, really! It is so easy and doesn't hurt one bit! Works like a charm, every time.

A tiny bottle of "Freezone" costs only a few cents at any drug store, and is sufficient to remove every hard corn, soft corn, and callouses. Try it!

PARKLAND HOSPITAL SCHOOL OF NURSING, Dallas, Texas

Offers a three-year course in nursing to high school graduates. A hospital of 300 beds located on 40 acres of beautiful grounds. Modern equipment and recreation facilities. Maintenance and liberal allowances. Classes enter in September and January. For further information write Superintendent of Nurses, Parkland Hospital, Dallas, Texas.

S I
SCHREINER INSTITUTE
KERRVILLE, TEXAS
A fully equipped Modern Junior College for Boys, located in the "Heart of the Hills" of Texas.
Four years of High School and two years of College work accepted by all universities and colleges.
Large campus, new buildings, modern gymnasium, golf course, athletics and debating under efficient coaches. Individual attention stressed. Small classes. Limited enrollment.
A JUNIOR COLLEGE OF THE FIRST CLASS
For catalog and pictorial bulletin, address J. J. Delaney, M. A., Litt. D., President, Kerrville, Texas.

AIRPLANE FACTORY FOR DALLAS

Construction of a plant for the manufacture of airplanes is now under way at Dallas. The plant is to be near Love Field, where four acres of land have been purchased by the company. Plans of the company call for four types of ships to be manufactured, two open and two closed models, all to be monoplanes.

Eleven planes a month have been set as the factory output for the first few months after the opening of the plant. The price of the planes will run from \$3500 to \$7000.

ONLY ONE UNORGANIZED COUNTY

In Texas there are 254 counties. All of these counties are organized except one, the single exception being Loving county. Three counties have been organized the last few years.

MILK PLANT FOR JACKSONVILLE

Construction work has started on a milk concentration plant at Jacksonville. This plant will cost \$20,000, and will be operated in connection with the Tyler Milk Products Company.

The milk will be concentrated at Jacksonville, from the surrounding territory, cooled in the refrigeration equipment of the plant and transferred to Tyler for manufacture into powdered milk and by-products.

CANNING FACTORY IS OPENED AT NACOGDOCHES

A new canning factory was opened in Nacogdoches July 1 and is now in operation. The plant is owned by the Nacogdoches Canning Company and cost \$30,000. The company employs about fifty people, most of whom are women.

HOME PROBLEMS.

REMOVAL OF STAINS

From time to time many of the readers of this page have written me regarding the removal of stains. So I am going to answer them all at once, hoping to cover as many kinds of stains as seem the most common.

From the letters I received, I have concluded that ink stains give the most trouble, because ink is something used in almost every home, and sooner or later some member of the household comes in contact with it. Many persons believe ink stains can not be removed and discard useful articles of clothing that are ink-stained, or go on wearing them with the spots unremoved.

Where the materials are washable the method of removing ink stains are simple. Place an absorbent material under the ink stain and remove as much of the stain as possible by lightly pressing with a cloth wrung out of lukewarm water. After the color stops coming out, supply fresh hydrogen peroxide with a dropper to the stain, adding to it a few flakes of some mild soap. Saturate with the peroxide solution and then hold over steam for a few minutes, rinsing in a lukewarm water the whole garment. This treatment is described for white materials, as peroxide will remove many dyes. After the steam treatment, should there be left a brownish stain, apply a few drops of diluted oxalic acid, one-half concentrated strength. If the ink persists in reappearing repeat the whole treatment. When the spot is removed the whole garment should be thoroughly washed and rinsed.

In the case of yellowed or stained linens and other washable white materials the process is still simple and easily accomplished. A good washing with warm soapy water is the first requirement. If the material is not soiled, only a few minutes in a washing machine is necessary, or a gentle rubbing on the board. Rinse the cloth free of soap and soak in warm clear water to which javelle water has been added, one cupful to four gallons of water. Soak from eight to ten minutes, stirring frequently and be sure there is enough water to let the material move freely. Four rinses are then given in warm water, two cups of white vinegar being added to the third rinsing. The clothes may, if necessary, be dried indoors and will be white and odorless. However, if one is so equipped it is best to hang cloths out-of-doors and let nature's best bleacher, the sun, help you.

When materials are stained with something that is soluble in water the processes of removing are even more simple. First, however, it is wise to try a drop of water on the underside of the hem to see if water will spot the material which is often more difficult to handle than most stains. Where the materials do not water spot, all that is needed is a soft absorbent rag and a bowl of lukewarm clear water. Arrange the garment so that you can work rapidly and freely. Touching the material as lightly as possible and rub in all directions quickly; this is to avoid a "ring." In using any liquid commercial cleaner work quickly and freely, pressing only hard enough to do the work.

The materials that stain with water, a method that is quite successful is as follows: Several thicknesses of cheese-cloth can be wrapped around the end of a glass rod or an orange-wood stick; dip in clear water and all the excessive moisture wrung out. Wrap two or three thicknesses of dry cheese-cloth over the wet

pad and by rubbing this very gently over the spot (just barely touching it) the stain will be dissolved. If the stain is very bad it is advisable to change the pad several times to thus avoid staining the material again.

If white cotton or linen are stained with mercurochrome it may be bleached out with equal parts of javelle water and boiling water. The fabric should remain but a few minutes in this bleach, then rinsed well and examined, and the bleaching repeated if necessary. For small stains the material may be stretched over a bowl of hot water and the javelle, full strength, is applied directly with a dropper to the stain. After a minute the material is allowed to drop into the hot water. It will probably require several applications of javelle to remove the stain entirely. This must also be followed by a thorough washing and rinsing as javelle weakens the fabric if allowed to remain in it.

Any stain of an oily composition, such as salves and ointments, should be cleaned first with grease solvent such as carbon tetrachloride then thoroughly washed with warm soapy water. This treatment should be followed for stains from compounds oily in nature. In the case of cod liver oil stain, remove as soon as possible, for after it is once set it is difficult to remove. A popular magazine suggested that baby be given his cod liver oil while in his bath, thus avoiding stains. In removing an oil or grease stain of any kind from a garment, the chief problem is to avoid forming a ring. This often occurs because not enough of the grease solvent has been used to flush out the dissolved grease. The cleaning fluid dissolves the grease and carries the soil with it farther out into the material, where it evaporates, leaving the grease and soil and thus causing a ring. Many times this can be avoided by placing a thick pad of absorbent material, such as cheese-cloth under the material and applying the cleansing fluid freely with a soft cloth large enough to hold considerable quantity of the fluid. The pad under the stain absorbs the soil and should be moved from time to time to put a clean surface under the stain. The cleaning cloth should be folded over to clean surface or changed as it becomes soiled. Should the "ring" show a tendency to form, brush the garment lightly with the wet cloth in long even strokes towards the seams or edges. When sponging material in this way it is best to use a piece of the same material or something as nearly the same color as possible. Never use a white rag to clean dark material. Sometimes a light ring is formed in cleaning dark material. In this case the whole garment must be cleaned. A simple way to keep summer silk dresses looking fresh is to sprinkle the dress where it comes in contact with the body with Fuller's earth. Leave the powder on over night or until the dress is to be worn again and then brush it off. Fuller's earth removes the slight natural oiliness that comes from the skin and prevents dust from clinging to the fabric, causing it to darken.

The spots of salad dressing that so often soil the front of a delicate dress are usually best left alone till the garment can be removed and the spots covered quickly with Fuller's earth. This should remain on the fabric at least twenty-four hours, and two or more applications may be necessary, according to the extent and oiliness of the stain.

Where expensive clothing is stained, or there is doubt about one's ability at cleaning, it is best to send the garment to reliable cleaners with a note attached that gives them information as to the nature of the stain.

One should practice taking stains out of cheap material first. With expensive dresses that are home made or made by a dressmaker, samples of the dress should be preserved so as to test the removal of stains that may occur to the garment.

A druggist can, as a rule, tell you the solvent of any drugs that may cause stains.

TESTED RECIPES

Here are some delicious recipes that we have tested and tasted and found them delicious and so are passing them on to you:

Lamb Chops, Swiss Style.

Prepare the desired number of French chops. Sprinkle with salt and pepper, spread with sauce Soubise and pan broil. "SAUCE SOUBISE"—Melt two tablespoons butter, add two tablespoons flour, one-half teaspoon salt, one-half cup onion puree (onions chopped, boiled, drained and rubbed through a sieve), add enough cream to make the consistency to spread.

Baked Beans, Isthmus Style.

Pick over one pint yellow-eyed beans. Wash, drain, cover with cold water and let stand over night. Drain, rinse with cold water, again cover with cold water and heat slowly to the boiling point, reduce heat and simmer five minutes, adding one teaspoon soda one minute before draining and rinsing again with cold water. Arrange two thin slices bacon in bottom of bean pot, add a layer of bean, sprinkle beans with finely chopped mild red peppers and salt, cover with two thin slices bacon, cut in shreds. Repeat layers until beans are used. Cover beans with stewed and drained thick tomato pulp, well seasoned with onion, bay leaf, salt and pepper. Cover and bake in a hot oven five hours. Add more tomato pulp if necessary.

Scalloped Guinea Chicken With Rice Border.

Butter a baking dish. Arrange alternate layers of cold thinly sliced left over guinea chicken and boiled rice. Pour over tomato sauce. Cover with buttered cracker crumbs and bake in a hot oven until heated through and crumbs are nicely browned.

Swiss Chard, Cooked With Ham Knuckles.

Pick over, wash and drain one package Swiss chard. Cook a ham knuckle slowly in plenty of boiling water, in a stock pot or large kettle. The last half-hour of cooking add the prepared Swiss chard, press the leaves down as they wilt, until all are covered with water; add more boiling water if necessary. Cook until chard is tender. Add salt if necessary. Drain, chop, reheat and serve on hot platter with ham knuckle arranged in center. Many people like to use vinegar on the chard.

Fried Nuggets of Rice.

Pour one-half cup boiling water over one cup washed rice. Cook over hot water in double boiler until water is absorbed. Add one cup scalded milk and salt to season to taste, continue cooking until rice is soft, adding more milk if necessary. Add one-fourth cup butter and one teaspoon parsley. Turn on a platter when cool, separate with a fork in pieces the size of English walnuts. Fry a golden brown in deep hot fat; drain on brown paper and serve as a substitute for French fried potatoes.

miles, in 1914, to 15,536 miles, and in 1924 to 15,852 miles. At the end of 1927 Texas had more railroad main line trackage than any other State of the union, Illinois being second. The railway mileage of Texas at that time was 16,287 miles. There has been a considerable gain in the railway mileage of Texas since that time.

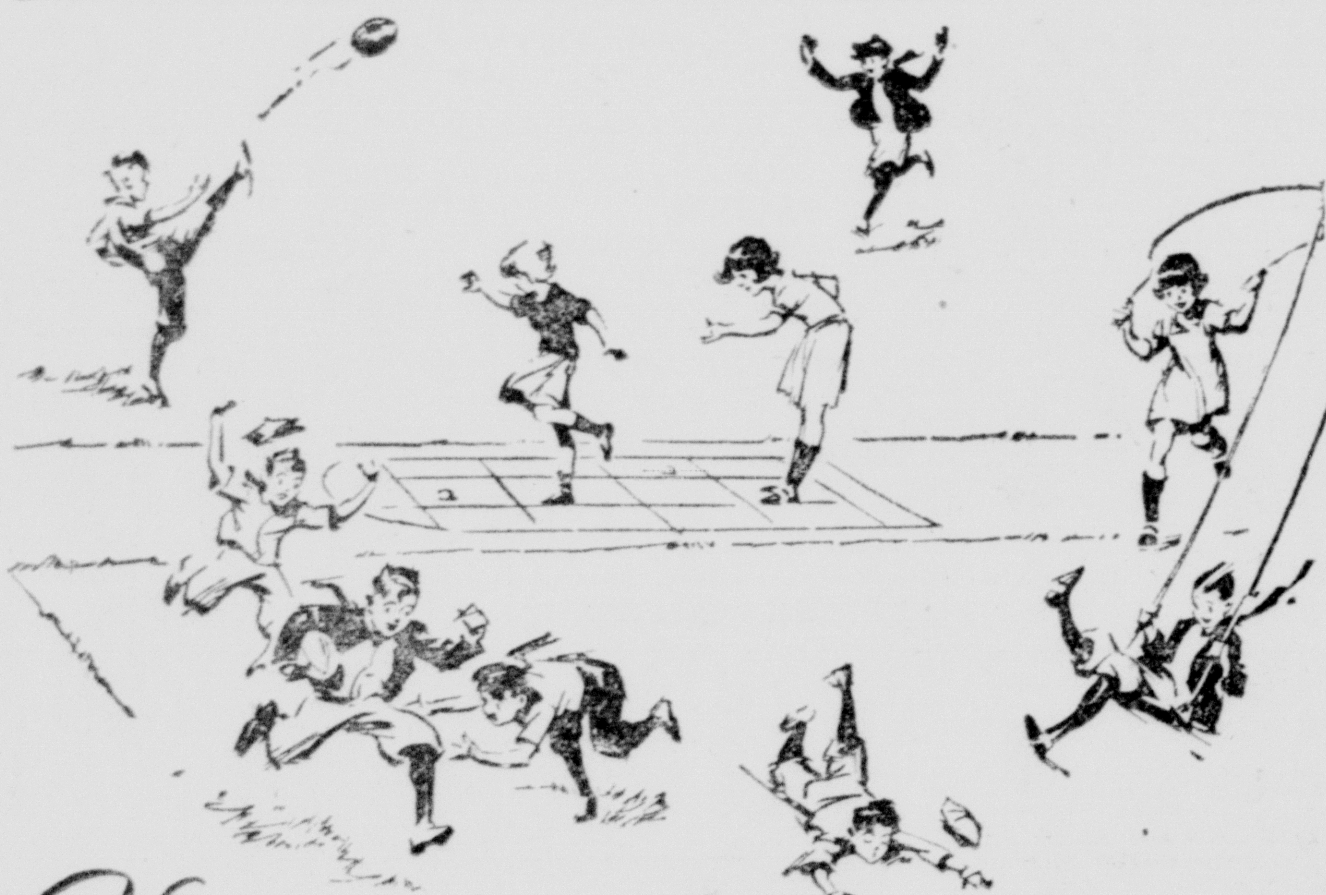

INVESTING A WOMAN'S LIFE

TO HIGHEST PURPOSE

Baylor University School of Nursing
Dallas, Texas.

Receives a new class September 1st. All but personal expenses provided. High School course or its equivalent required for entrance. Address at once for full particulars

MISS LUCILE BURLEW, R. N., Dean.

Keep them strong, healthy and happy

ALL children like Karo because it's so delicious and satisfying to their youthful craving for sweets—

But parents now learn from leading doctors that Karo is more than a delicious syrup—

"It is the IDEAL energy food for growing children!"

Because there are 120 calories in each ounce of Karo—nearly twice the energy value of eggs and lean beef, weight for weight—

And because Karo is so easily digested—supplying quickly the muscular energy growing children need daily.

Serve plenty of Karo to the entire family—keep them strong, healthy and happy.

DELICIOUS ON SLICED BREAD
